STATE OF MISSOURI
DEPARTMENT OF NATURAL RESOURCES

Jeremiah W. (Jay) Nixon, Governor • Kip A. Stetzler, Acting Director

www.dnr.mo.gov

October 1, 2010

Ms. Linda Luebbering, Director
Office of Administration
Division of Budget & Planning
State Capitol Building, Rooms 124/129
Jefferson City, MO 65101

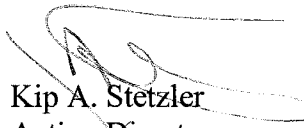

Dear Ms. Luebbering:

The Department of Natural Resources is pleased to submit our FY12 Budget Request. The department will continue to preserve, protect, restore and enhance Missouri's natural, cultural and energy resources. On behalf of myself and my staff, I look forward to working with the Administration to move Missouri forward on the department's FY12 Budget Request.

Thank you for your assistance and support of the Department of Natural Resources.

Sincerely,

DEPARTMENT OF NATURAL RESOURCES

Kip A. Stetzler
Acting Director

The Department of Natural Resources preserves, protects, restores and enhances Missouri's natural, cultural and energy resources. We take seriously our responsibility of stewardship to protect and enhance the environment in which we work and live, and we will consider all aspects of the environment when making decisions.

Preserving, Protecting, Restoring and Enhancing Missouri's Natural Resources – The Department of Natural Resources works to ensure clean air, land and water by cleaning up pollution from the past, addressing pollution problems of today and identifying potential pollution issues of the future.

We help Missourians protect their environment, protect employment opportunities and enhance their quality of life. We work with citizens, including landowners, local governments, small businesses and industry to protect Missouri's environment. Monitoring, partnerships, technical environmental assistance and training allow the department the opportunity to help Missourians and to protect their natural resources.

The department enforces environmental rules and regulations related to air and water pollution; hazardous and solid waste; land reclamation; soil and water conservation and safe public drinking water. The Department of Natural Resources' regional and satellite offices provide field inspections, complaint investigation and front-line troubleshooting, problem solving and technical assistance on environmental issues and emergencies.

The department interprets the state's geological and hydrological setting. We also interpret the character and availability of Missouri's water, energy and mineral resources, ensure that dams in the state are constructed, maintained and operated in a safe manner. This is accomplished by regulation of all non-agricultural, non-federal dams more than 35 feet in height and by providing technical assistance and informational resources to all dam owners.

Cultural Resources –Working with citizens and groups throughout Missouri, we identify, evaluate and protect the state's diverse range of historic, architectural and archaeological resources. The department also funds and coordinates surveys to identify historic, architectural and archaeological resources throughout Missouri.

Energy Resources – The department works to protect the environment and stimulate the economy through energy efficiency initiatives, energy policy analysis and development, and efforts to increase Missouri's renewable energy resources and technologies. We provide technical and financial assistance for energy efficiency and renewable energy projects to state and local governments, school districts, industries, and Missouri citizens; assess energy supplies; and help ensure adequate energy resources. We also assist low-income Missourians in improving the energy-efficiency of their homes, thus helping them save money on the cost of heating and cooling.

Inspire Their Enjoyment...Missouri boasts more than 145,000 acres in 85 state parks and historic sites. Visitors can step into the past to experience our state's history, explore Missouri's natural landscapes such as forests, prairies and savannas, and enjoy opportunities for hiking, bicycling, camping, picnicking, fishing and swimming. To further promote the visitors' understanding and appreciation of these resources, the department provides programs about these natural and cultural resources.

For More Information...An important element in the successful completion of the Department of Natural Resources' mission is helping Missourians and visitors who seek our services. The department offers a number of technical and educational services designed to help individuals, groups and businesses better understand our natural resources and the rules that exist to protect them. The department also maintains a vast amount of information available to the public in the form of fact sheets, guidance documents, geologic maps, technical books and publications on a wide variety of issues.

Federal Economic Stimulus... The department is continuing to spend and monitor the dollars received through the Recovery Act. Major efforts include the Weatherization Program, projected to weatherize 21,506 homes as a result of stimulus funds. In addition, approximately 80 communities are benefitting from the use of stimulus funds for their wastewater and drinking water systems.

Service... The department is a service agency responsible for delivering service to the public. This direction underscores the reality that the people who have the day-to-day contact with the public determine how the department is perceived. In reality, service is an attitude, not an activity.

Satellite Offices... Satellite offices complement and extend services provided by the regional offices. They are a part of the department's Division of Environmental Quality, which oversees five regional offices, 13 satellite offices, the department's Environmental Services Program and other key field activities. The department serves communities and facilities more directly by placing more staff in the field. Providing local staff assistance helps the agency get environmental help closer to where it is needed.

Permit Improvements... The department's permit process is easier and more accessible to Missouri citizens and businesses through the use of eServices, www.dnr.mo.gov/eservices.htm. The department's online tool, Permit Assistant, makes it easier to do business in Missouri. Permit Assistant helps those seeking permits by making information easily accessible on the department's Web site. Anyone with access to the Web may answer a series of questions to determine which permits or registrations his or her businesses will need from the department and then link to the necessary forms. Permit Assistant enables business owners to find all the needed permits without having to contact individual programs. The Environmental Council of the States, a national non-profit, non-partisan association of state and territorial environmental agency leaders, awarded the department with the Best State Innovation Award for Permit Assistant in 2007. Other operational changes have reduced the time to issue permits.

Also, citizens can fill out electronic forms for dry cleaner registrations, petroleum storage tanks registrations, open burning of vegetative waste and hazardous generator ID numbers online. This speeds up the permitting process for citizens and businesses. The agency also has its permit manuals available online.

Improved Online Information and Services for Department Customers... Continual improvements have simplified the department's Web site and made it easier for Missouri citizens and businesses to find information. A Google search engine allows the user to search the department's and the State of Missouri's Web sites for information by key words or phrases at www.dnr.mo.gov.

Electronic Forms Now Online... The Department of Natural Resources makes permit, license and certification forms available in Microsoft Word, Microsoft Works, Open Office and other word processing software. This enables businesses to complete these forms electronically and save them so they can easily be updated for future submissions. This is another component in the department's larger, ongoing effort to simplify the way it does business. By easing the paperwork process, the department hopes to help its permittees focus on running successful businesses in a way that's sensitive to Missouri's natural resources.

Est. Fringe	0	0	0	0
--------------------	----------	----------	----------	----------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: State Parks Earnings (0415); DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Solid Waste Management Fund (0570); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649)

Notes: Request retention of estimated appropriations for Contract Audits (Other Funds). The number of contract audits that will be conducted and the cost per audit is unknown. In addition, 25% flexibility is requested between General Revenue Personal Services and Expense and Equipment for FY 2012.

Core Reductions: The FY 2012 budget request includes core reductions of \$2,681 from General Revenue Expense and Equipment appropriation authority.

2. CORE DESCRIPTION

The Department Operations includes the Director's Office, Communications, Policy, Legal and Administrative Support. Department Operations provides departmental focus on key outcomes and works to ensure decisions are made which result in real environmental improvements. Department Operations seeks to improve the efficiency of departmental actions, drive customer focused initiatives and ensure the public's participation in DNR's decision-making. Department Operations is also the focal point for providing information and assistance to state and national legislative bodies, and the oversight of issues of state and national importance.

CORE DECISION ITEM

Department of Natural Resources
 Department Operations
 Department Operations Core

Budget Unit 78111C

3. PROGRAM LISTING (list programs included in this core funding)

Department Operations

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds)	6,078,004	5,857,314	5,598,777	5,286,842
Less Reverted (All Funds)	(60,432)	(174,871)	(166,190)	N/A
Budget Authority (All Funds)	6,017,572	5,682,443	5,432,587	N/A
Actual Expenditures (All Funds)	5,320,420	5,178,394	4,435,550	N/A
Unexpended (All Funds)	697,152	504,049	997,037	N/A
Unexpended, by Fund:				
General Revenue	991	46	3	N/A
Federal	196,974	334,369	531,097	N/A
Other	499,187	169,634	465,937	N/A
	(1)	(1)	(1)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Fiscal uncertainties and hiring limitations have resulted in lower expenditures. Approximately \$200,000 of the Other Funds lapse is a result of estimated increases in contract audit appropriations in which audits were either not finished or invoices not received in time to pay from FY 2008 appropriations.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78111C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: DEPARTMENT OPERATIONS	DIVISION: DEPARTMENT OPERATIONS

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

DEPARTMENT REQUEST

The department can more effectively operate by allowing 25% flexibility in the General Revenue Fund Personal Service and Expense and Equipment appropriations. Flexibility allows the department to contract various services, if necessary, when existing resources are not sufficient, the need is temporary or when vacancies are difficult to fill. Flexibility allows the department to address emerging issues without a permanent increase in appropriation levels.

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST - DEPARTMENT REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$0 General Revenue PS \$0 General Revenue EE Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly.	Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly. FY 2011 Flex Request (25% of GR PS APPN) \$74,487 FY 2011 Flex Request (25% of GR EE APPN) \$37,167	Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly. FY 2012 Flex Request (25% of GR PS APPN) \$59,993 FY 2012 Flex Request (25% of GR EE APPN) \$31,817

3. Please explain how flexibility was used in the prior and/or current years.

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
Flexibility was not used in FY 2010.	Expenditures are difficult to estimate at this time. Flexibility will only be used to address issues that arise unexpectedly.

PROGRAM DESCRIPTION

Department of Natural Resources

Department Operations

Program is found in the following core budget(s): Department Operations

1. What does this program do?

Programs within Department Operations include the Director's Office, Communications, Policy, Legal and Administrative Support. Department Operations is responsible for the development of statewide environmental and natural resource policies. Department Operations provides departmental focus on key outcomes and works to ensure decisions are made which result in real environmental improvements, such as participation in an interstate river association and reviewing environmental impact statements for major projects. Department Operations also coordinates functional and programmatic interaction between the department's divisions and programs to ensure a consistent approach. Department Operations is responsible for the management of all organizational units within the department: the Division of Environmental Quality, Division of Geology and Land Survey, Division of State Parks, Water Resources Center, Soil and Water Conservation Program and the Division of Energy; as well as coordination with the Environmental Improvement and Energy Resources Authority and Petroleum Storage Tank Insurance Fund Board.

Department Operations also includes administrative support functions of budget development and financial resource allocations, internal audit, accounting, human resources, procurement, grants management and general services.

2. What is the authorization for this program, i.e., federal or state statutes, etc.? (Include the federal program number, if applicable.)

Not applicable

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years.

Actual expenditures for all fiscal years are as June 30 and do not include lapse period activities. FY 2011 Planned expenditures are shown at full appropriation.

PROGRAM DESCRIPTION

Department of Natural Resources

Department Operations

Program is found in the following core budget(s): Department Operations

6. What are the sources of the "Other" funds?

State Parks Earnings (0415); DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Solid Waste Management Fund (0570); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649).

7a. Provide an effectiveness measure.

Outreach to Clients	FY 2008 Projected	FY 2008 Actual	FY 2009 Projected	FY 2009 Actual	FY 2010 Projected	FY 2010 Actual	FY 2011 Projected	FY 2012 Projected	FY 2013 Projected
Calls made to DNR's 1-800 number	25,000	26,124	25,000	23,029	23,000	24,459	24,000	25,000	25,000
Missouri Resources magazine subscribers (1)	69,362	70,056	70,056	73,138	75,332	74,859	77,105	79,418	81,800
Number of Department Internet Hits	29.3 million	27.5 million	29.5 million	27.3 million	28 million	31 million	32 million	32.5 million	33 million
# of Internet Hits to Permit Assistant (2)	1,000	2,886	3,500	4,549	4,500	77,449	78,000	79,000	80,000
# of Internet Hits to DNR Forms (2)	110,000	88,689	90,000	82,143	83,000	584,176	600,000	601,000	602,000

(1) Permit Assistant web page became available online in June 2007 and was marketed heavily in FY 2010, resulting in an increase in the number of hits to the page.

(2) The number of internet hits to the department's Forms page has increased due to marketing of the page as well as an increase in the number of forms available on the page.

2. CORE DESCRIPTION

This core provides operational funding for the Division of Energy which is a nonregulatory state agency that helps ensure adequate energy supplies, promotes energy efficiency and advances the use of Missouri's indigenous energy resources, especially renewable resources. Staff members track and report on energy prices and supplies; collect and report Missouri energy data; facilitate solutions to Missouri energy supply disruptions; conduct energy policy research and analysis; and maintain Missouri's plan for energy emergencies. Staff also gives technical and financial assistance for energy efficiency and renewable energy projects to state and local governments, school districts, businesses, industries and citizens.

The work of the Division of Energy has advanced the development of wind resources within Missouri and collected new data that helped lead to the development of Missouri's first three utility-scale wind-generation projects. Staff also works extensively in the biomass arena, including promotion of ethanol and biodiesel in the general marketplace, increased use of biofuels in state-owned vehicles, and technical assistance and analysis focused on the use of a variety of biomass materials for energy. In addition, the division supports market research and demonstration projects that advance the use of clean, domestic energy resources and technologies. Staff members interact with DNR environmental programs to integrate energy efficiency into environmental quality and interact with utility companies and Public Service Commission staff to provide expertise in the development and deployment of energy-efficiency programs by utility companies.

CORE DECISION ITEM

Department of Natural Resources	Budget Unit 78210C, 78220C
Division of Energy	
Division of Energy Core	

2. CORE DESCRIPTION (continued)

Energy Efficiency Services allows the department to pass through federal funds and other funds for energy efficiency and renewable energy activities. Federal funding includes the Low Income Weatherization Assistance Program (administered through 18 local, community based agencies), the State Energy Program Grant funding, LIHEAP and competitive federal funding for various special projects. State funding includes the Energy Set-Aside Loan Fund, Biodiesel Fuel Revolving Fund, Utilicare, Missouri Alternative Fuel Vehicle Loan Fund, and Energy Futures Fund.

3. PROGRAM LISTING (list programs included in this core funding)

Division of Energy

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds) (1)(2)	20,534,851	19,182,499	17,507,804	10,976,329 E
Less Reverted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	20,534,851	19,182,499	17,507,804	N/A
Actual Expenditures (All Funds)	12,200,574	12,268,710	6,445,066	N/A
Unexpended (All Funds)	8,334,277	6,913,789	11,062,738	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	1,807,799	1,677,318	5,772,400	N/A
Other	6,526,478	5,236,471	5,290,338	N/A

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) The core pass-through appropriations for these programs are estimated, and are increased each year as needed to encumber and pay multi-year obligations against these funds. The encumbrances roll over to the next fiscal year's core appropriation causing large unexpended balances.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Energy

Program is found in the following core budget(s): Division of Energy

1. What does this program do?

The Division of Energy is a nonregulatory state agency that helps ensure adequate energy supplies; promotes energy efficiency; and advocates for the use of Missouri indigenous energy resources, especially renewable energy. More than 95 percent of the primary fuels we consume (such as coal, petroleum and natural gas) come from outside the state. Energy efficiency provides the most cost-effective way to address the challenges of growing energy demand, higher energy prices, energy security, energy reliability and environmental quality. Staff manage projects, subgrants and contracts, and provide technical assistance to deliver energy-efficiency services and programs to Missourians; including energy-efficiency improvements to existing housing, improved energy-efficient building techniques and technologies for new homes, training for public and private-sector facilities managers, and industrial energy efficiency opportunities. Division staff participate in utility regulatory cases to encourage utility investments in energy-efficiency programs for their customers and help utilities design these customer programs. In addition, the division monitors energy supplies and prices, conducts special assessments in response to potential or actual supply disruptions or shortages, and coordinates mitigation efforts with state and federal agencies and decision-makers.

The Division of Energy encourages the use of Missouri's indigenous energy resources and technologies through various initiatives. The work of division staff advances the development of Missouri's wind resources and helped lead to the announcement of Missouri's first three utility-scale wind-generation projects. Staff also work extensively in the biomass arena. This work includes promotion of ethanol and biodiesel production and use in the general marketplace, increased use of biofuels in state-owned vehicles, and technical assistance and analysis focused on the use of a various biomass materials for energy. Division staff work in conjunction with other MDNR staff regarding opportunities to advance the use of Missouri's coalbed methane resources and to evaluate opportunities for hydroelectric energy, nuclear energy and more energy-efficient technologies for coal-fired electrical generation plants.

Staff also direct and oversee the Building Operator Certification Program in Missouri, which helps energy managers of commercial, institutional, office, and school buildings learn how to reduce energy use through energy efficiency.

Energy Efficient Services involves multiple successful efforts including revolving loans for energy efficiency improvements made to schools and local government buildings, which save local tax dollars. Funding for energy-efficiency improvements to homes of low-income Missourians saves families money by reducing their utility bills. Data analysis performed by the Division of Energy during summer 2006 showed that families living in weatherized homes requested fewer public dollars to help pay their utility bills. **Forty percent of the families who had requested emergency crisis intervention program monies (ECIP) to help pay utility bills before their homes were weatherized did not request any ECIP money during the two years after their homes were weatherized.**

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Energy

Program is found in the following core budget(s): Division of Energy

1. What does this program do? (continued)

The State Energy Program includes services such as energy assurance, mitigation of energy supply disruptions, development of energy efficiency programs and information, and development of renewable energy sources. Funding from the State Energy Program periodically is made available to further energy-efficiency programs for residential, commercial, and industrial sectors; to further data collection and analysis of Missouri's indigenous energy resources; and to further renewable energy use. The Biodiesel Fuel Revolving Fund encourages alternative fuel use in state vehicles. Benefits of these programs include improving the state's economy by reducing expenditures for energy imported into the state, creating opportunities for development of renewable energy sources, environment and security benefits from avoiding fossil energy generation and consumption, developing clean domestic distributed energy systems and industries, informing citizens and decision-makers about energy prices, and helping ensure adequate energy supplies.

Division of Energy - Reconciliation

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current	FY 2012 Request
Energy Operations (78210C)	1,099,499	1,183,743	1,077,407	2,687,308	1,364,573

Total	12,200,574	12,268,710	6,445,066	10,976,329	9,653,594

* FY 2011 includes a one-time new decision item of \$1.3M and 24 FTE

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

10 CFR 420	Federal regulations for the State Energy Program
10 CFR 440	Federal regulations for the Weatherization Assistance Program
RSMo 8.800-8.851	Energy Efficiency in State Facilities
RSMo 251.650	Inter Agency Group for Federal Grants
RSMo 386.890	Net Metering and Interconnection
RSMo 393.1020	Green Power Initiative
RSMo 414.350-414.359	Alternative Fuel Vehicle Loan Program
RSMo 414.400-414.417	Fuel Conservation and State Vehicles Program
RSMo 640.150-640.160	Department of Natural Resources Energy Responsibilities
RSMo 640.153	Certification of Home Energy Auditors
RSMo 640.157	Energy Sustainability Coordination
RSMo 640.216	Studies in Energy Conservation
RSMo 640.651-640.686	Energy Conservation Projects
RSMo 660.100-660.136	Utilicare - Weatherization Assistance
RSMo 701.500-701.515	Energy Efficiency Appliance Standards

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Energy

Program is found in the following core budget(s): Division of Energy

3. Are there federal matching requirements? If yes, please explain.

Weatherization Assistance Program

100% Federal (DOE)

State Energy Program (SEP)

20% State/Local (DOE)

State Heating Oil and Propane Program

50% State (DOE)

4. Is this a federally mandated program? If yes, please explain.

The National Energy Policy and Conservation Act sets forth requirements for state energy offices; the Division of Energy is recognized by the federal government as Missouri's official state energy office.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Utilicare Stabilization Fund (0134); Energy Set-Aside Fund (0667); Biodiesel Fuel Revolving Fund (0730); Missouri Alternative Fuel Vehicle Loan Fund (0886); Energy Future Fund (0935)

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Energy

Program is found in the following core budget(s): Division of Energy

7a. Provide an effectiveness measure.

Annual Utilities Commitment to Energy Efficiency Programs through Utility Regulatory Proceedings

	FY 2008 Actual	FY 2009 Actual	FY 2010 Projected	FY 2010 Actual	FY 2011 Projected	FY 2012 Projected	FY 2013 Projected
Utility Regulatory Cases/Partners	11	17	14	14	15	15	15
Dollars Committed	\$11,571,895	\$15,879,561	\$40,121,328	\$23,895,666	\$51,733,901	\$12,508,925	\$14,402,303

The Division of Energy participates in regulatory proceedings of electric and natural gas utilities at the Public Service Commission (PSC) to secure funding for energy efficiency programs. These amounts represent annual utility investments in energy efficiency programs, including low-income weatherization, that have been approved in stipulation or PSC orders; projections are based on the latest information available. These numbers also include utility investments in energy-efficiency programs committed by municipal utilities to accomplish energy-efficiency for Missouri citizens and business.

Note: Low-Income Weatherization - FY 2008 included \$59,876 LIHEAP funding and \$644,079 of new Utilicare funding; FY 2009 also included \$869,044 LIHEAP funding; FY 2010 included \$330,956 LIHEAP funding; projections are based on planned awards. Due to the heightened interest in Recovery Act funding, no Energy Efficiency Loans were made in FY 2010. In FY 2011 we plan to award \$10,000,000 in new Energy Efficiency Loans, and \$3,800,000 in FY 2012 and FY 2013.

PROGRAM DESCRIPTION

Department of Natural Resources

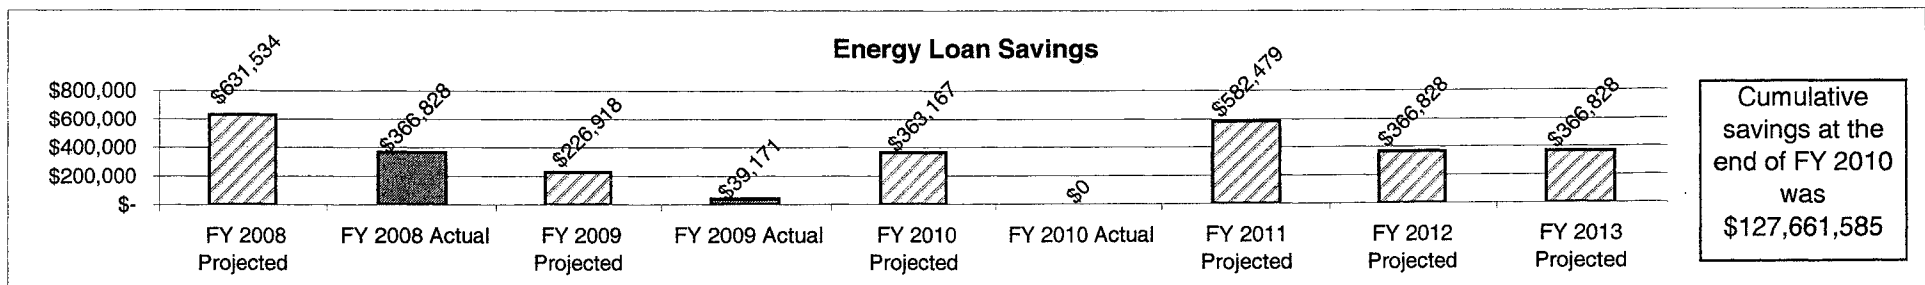

Division of Energy

Program is found in the following core budget(s): Division of Energy

7a. Provide an effectiveness measure (continued).

From 1977 through 2010 the Low-Income Weatherization Program has weatherized 160,585 homes. All families living in homes that received Weatherization Assistance Program improvements since the beginning of the program saved an estimated \$13.3 million during FY 2010. Lasting energy efficient improvements are installed in the home, resulting in lower utility bills year after year. A home that has been weatherized can reduce average annual fuel use per dwelling by 33.5 percent of natural gas space heating consumption, making it a cost effective way to help low-income families with their energy bills, thus allowing low-income families to use the extra money available for other life essentials. Savings above reflect regular Weatherization-funded projects; the majority of FY 2010 - FY 2013 Weatherization funding was from the Recovery Act, which is not included above.

Since 1989, the Division of Energy has offered low-interest loans to schools and local governments for the installation of energy-efficiency measures. Based on an expected 20-year life of the energy-efficiency measures, all school districts that made improvements financed with energy loans since the beginning of the program saved an estimated \$11.2 million in FY 2010. The energy savings represent money that school districts and local governments do not have to spend on utility bills, and therefore, can redirect to education and public services. Due to the heightened interest in Recovery Act funding, no new Energy Efficiency Loans were made in FY 2010. Additionally, actual energy loan savings may change from year to year based on loan de-obligations.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Energy

Program is found in the following core budget(s): Division of Energy

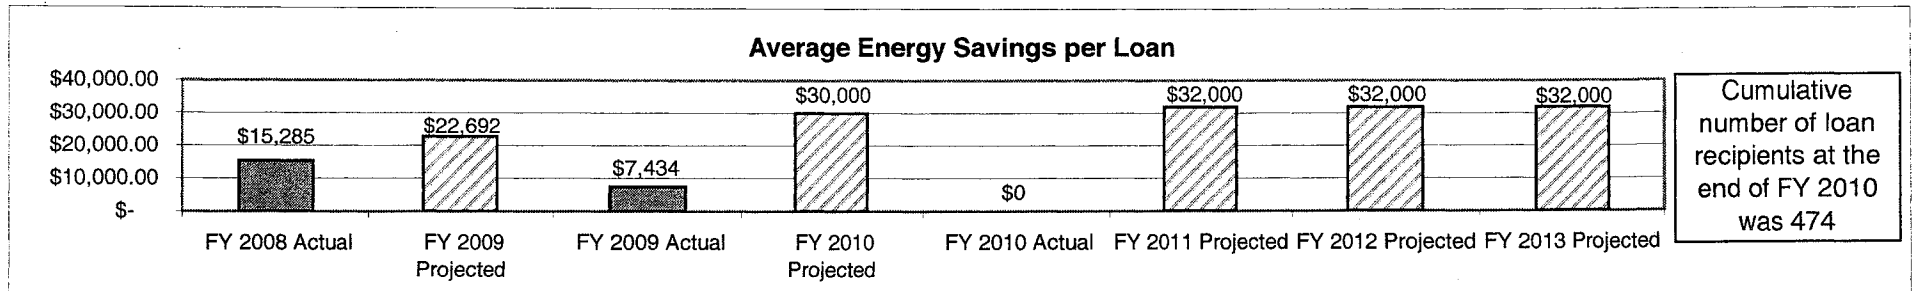

7b. Provide an efficiency measure.

Loan & Grant Dollars Distributed, and Utility Investment per FTE

	FY 2008 Actual	FY 2009 Actual	FY 2010 Projected	FY 2010 Actual	FY 2011 Projected	FY 2012 Projected	FY 2013 Projected
Energy Efficiency Loans (1)	\$ 1,630,850	\$ 2,835,429	\$ 1,331,034	\$ 138,541	\$ 3,669,655	\$ 1,310,345	\$ 1,310,345
Low Income Weatherization Grants	\$ 1,146,158	\$ 1,508,927	\$ 1,157,895	\$ 2,890,505	\$ 1,157,895	\$ 1,157,895	\$ 1,157,895
Utility Funds (2)	\$ 3,990,309	\$ 3,187,340	\$ 13,373,776	\$ 6,372,178	\$ 17,244,634	\$ 4,169,642	\$ 4,800,768

(1) Due to heightened interest in Recovery Act funding, no new Energy Efficiency Loans were made in FY 2010.

(2) Utility Energy Efficiency Investment committed per FTE due to DNR Involvement in Utility Rate Cases or Partnerships. Projections based on rate case commitments.

Amounts may change from year to year based on loan de-obligations. Due to the heightened interest in Recovery Act funding, no new Energy Efficiency Loans were made in FY 2010.

PROGRAM DESCRIPTION

Individuals Served by Weatherization	4,605	5,305	4,235	2,444	2,444	4,466	4,466

Clients served include income-eligible homeowners and landlords, commercial and agricultural operations, utility companies, private-sector consultants, renewable energy developers, industries, schools, colleges, universities, communities, and state and local governments.

The large increase in FY 2009 for Information and Technical Visits was due to the heightened interest in energy efficiency. Information includes Energy Loans Technical Assistance, Media Outreach, Home Shows, State Fair, students taking classes at the Discovery Center, tour groups at the Discovery Center, industrial energy audits performed and miscellaneous technical site visits, public presentations, and exhibits. Utility Energy Efficiency Programs are expected to decline in FY 2012 due to Midwest Energy Efficiency Alliance's (MEEA) plans to discontinue the Change A Light Program.

7d. Provide a customer satisfaction measure, if available.

The division sends a satisfaction survey to each loan recipient and to our network of weatherization providers. The grant and loan recipient survey maintains a 100% satisfaction rating.

<input type="checkbox"/> Pay Plan	<input type="checkbox"/> Other: _____	

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The Recovery Act provides funding across the nation to invest in energy efficiency programs and services in multiple energy-using sectors including residential, manufacturing, agricultural operations, commercial, schools and city and county government facilities; develop the domestic renewable energy industry; evaluate energy policy options; and plan for future energy needs. The Missouri Department of Natural Resources has been awarded over \$200 million in Recovery Act funding to improve energy efficiencies and renewable energy use and perform energy planning and policy development for Missouri. These programs and projects include: Energy Efficiency and Conservation Block Grant Program, Low-Income Weatherization Assistance Program, State Energy Program, Energy Efficient Appliance Rebate Program, and Energy Assurance Capabilities and Smart Grid Planning. Since receiving Recovery Act funding, the Department has hired staff for this additional work. Energy issues are, and we believe will continue to be at the forefront at both the national and state level. Funds are also being dedicated to revolving loan fund programs providing long-term energy activities and benefits. The Department must continue our energy efficiency and renewable energy efforts.

NEW DECISION ITEM

RANK: 005 OF 008

Department of Natural Resources Division of Energy Energy Staffing	Budget Unit <u>78210C</u> DI# <u>1780001</u>
4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)	
<p>The Department works to protect the environment and stimulate the economy through energy efficiency initiatives, energy policy analysis and development, and efforts to increase Missouri's renewable energy resources and technologies. We provide technical and financial assistance for energy efficiency and renewable energy projects to state and local governments, school districts, industries, agricultural producers and Missouri citizens; assess energy supplies; and help ensure adequate energy resources. We also assist low-income Missourians in improving the energy-efficiency of their homes, thus helping them save money on the cost of heating and cooling.</p> <p>The Department requests 20.00 FTE and \$970,443 in federal funds. Technical staff responsibilities include coordination and oversight with other departments and contractors for job training programs for energy auditors and contractors; conducting and evaluating assessments of Missouri's energy resources in coordination with other entities and organizations involved in applicable research; technical assistance and procedural monitoring visits for the various energy programs; outreach to local governments, utilities, consultants, contractors and other stakeholders for the various energy programs; providing outreach and energy efficiency services and energy related incentives to prospective manufacturers and industries considering locating or expanding in Missouri.</p> <p>Additional staff are also needed to review economic analysis, models and inputs used by electric utilities in the development of long term least-cost resource plans filed with the Public Service Commission (PSC). This work helps the department encourage utilities to make cost effective energy efficiency and renewable energy investments to help utility customers contain energy costs.</p> <p>Fiscal staff responsibilities include reviewing and processing payments to subgrantees and contractors; conducting on-site fiscal and procedural monitoring visits of subgrantees and subcontractors; audit report reconciliations; review of financial data in PSC utility cases; and writing, evaluating and awarding RFPs to contractors for energy initiatives.</p> <p>The Department also requests 6.00 FTE and \$245,724 in other funds to carry out the responsibilities involved in administering multiple revolving loan funds and the programmatic/fiscal compliance monitoring of the resulting loans. The revolving loan funding comes from the federal State Energy Program Recovery Act grant - approximately \$4.5 million will be used to supplement the Large Agricultural Efficiency Loan Program and approximately \$5 million will capitalize a revolving loan fund for clients to purchase/install energy efficiency projects. Loan recipients include Industrial, Commercial, Agricultural, Residential, Governmental and Not-for-Profit customers. Loan payback comes from the energy savings realized from the energy efficiency measures installed.</p>

Other Funds: Cost Allocation Fund (0500)

Note: The department requests 25% flexibility between General Revenue Personal Services and Expense and Equipment for FY 2012.

Core Reduction: The FY 2012 budget requests includes a core reduction of \$29,848 from General Revenue Expense and Equipment appropriation authority.

2. CORE DESCRIPTION

The Water Resources Center's staff provide information for Missouri's comprehensive water needs by examining both surface and groundwater use and availability. The Water Resources Center administers the provisions of the Missouri Dam and Reservoir Safety Law; regulating all nonfederal, nonagricultural dams 35 feet and higher through inspections, registration and issuance of construction permits. Staff also investigate water supply issues, maintain and update Missouri's Public Water Supply database for groundwater wells, collect, analyze and distribute groundwater-level data from a statewide network of observation wells, and evaluate public water supply wells and provide casing and total depth specifications. The Water Resources Center staff continues to provide guidance and technical expertise for planning and development of regional water supply projects throughout Missouri. The Water Resources Center defends the state's vital water resources interests, including those related to river transport, before numerous interstate and interagency river basin associations.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78518C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: WATER RESOURCES	DIVISION: WATER RESOURCES
1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.	
DEPARTMENT REQUEST	
Water Resources staff provide information for Missouri's comprehensive water needs by examining surface water use and availability, monitoring and providing technical assistance regarding drought and flood conditions, preparing lake capacity and future supply studies, and utilizing stream gages to provide water quantity evaluations. The 2005 and 2006 drought underscored the need for more accurate evaluations of existing water resources. Flexibility will enhance our ability to address specific community needs or to help solve specific water resource problems by collecting essential data. Water Resources is requesting 25% General Revenue Personal Services and Expense and Equipment flexibility.	
2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.	
PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$0 General Revenue PS \$0 General Revenue EE Flexibility to address specific community needs or to help solve specific water resource problems by collecting essential data.	Expenditures are difficult to estimate. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly. FY 2011 Flex Request (25% of GR PS) \$342,526 FY 2011 Flex Request (25% of GR EE) \$408,541
BUDGET REQUEST - DEPARTMENT REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly. FY 2012 Flex Request (25% of GR PS) \$342,526 FY 2012 Flex Request (25% of GR EE) \$401,079
3. Please explain how flexibility was used in the prior and/or current years.	
PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
FY 2010 PS and EE flexibility was not used.	Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources Center

Program is found in the following core budget(s): Water Resources Center

1. What does this program do?

The Water Resources Center's staff provide information for Missouri's comprehensive water needs by examining both surface and groundwater use and availability. Staff monitor and provide technical assistance regarding drought and flood conditions, prepare lake capacity and future water supply studies and utilize data from surface and groundwater monitoring equipment to provide water quantity evaluations. Staff continue to provide guidance and technical expertise for planning and development of regional water supply projects throughout Missouri.

The Water Resources Center administers the provisions of the Missouri Dam and Reservoir Safety Law. The department regulates nonfederal, nonagricultural dams 35 feet and higher through inspections, registration and issuance of construction permits.

Other Water Resources Center's staff investigate water supply issues, maintain and update Missouri's Public Water Supply database for groundwater wells. Staff collect and distribute groundwater-level data from a statewide network of observation wells, evaluate public water supply wells, provide casing and total depth specifications, respond to public inquiries on a variety of water issues, advise communities on aquifer locations and contamination potential and provide assistance with spring recharge studies. Hydrologists and engineers perform complex analyses to determine the benefits or adverse impact of interstate river operations and resultant water quantity impacts for the state of Missouri. Staff provide analytical support on legal challenges and are involved in negotiations with other states on water quantity issues. This effort has been intensified due to the authorization of the Missouri River Authorized Purposes Study, and other studies focused on the Missouri River basin that are intended to justify changing the management of the river to benefit upper basin states at the expense of Missouri.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 236.400-236.500	Dam, Mills, & Electric Power
RSMo 256.170	Geologic Hazard Assessment
RSMo 256.060	Survey of water resources of state
RSMo 256.200	Commission to collect & coordinate water data
RSMo 256.400-256.430	Water Usage Law, users to file registration
RSMo 256.435	Multipurpose Water Resources Program to ensure public water supply storage
RSMo 640.400-640.430	Negotiation of interstate compacts, surface & groundwater monitoring, state water resources plan and annual report, and special water protection areas
RSMo Chapter 257	Water Conservancy Districts

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources Center

Program is found in the following core budget(s): Water Resources Center

3. Are there federal matching requirements? If yes, please explain.

National Dam Safety Assistance Award	100% Federal
Missouri Wetlands Monitoring and Assessment	39% State
Wetland Nutrient Monitoring and Biologically based	
Nutrient Enrichment Assessment	28% State

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other " funds?

DNR Cost Allocation Fund (0500)

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources Center

Program is found in the following core budget(s): Water Resources Center

7a. Provide an effectiveness measure.

Note: The Water Resource Center monitors Missouri's various aquifers statewide. Missouri is a national leader in groundwater level monitoring and has added wells in areas of emerging resource concern.

Note: Our staff use this data for monitoring drought, flooding and various hydrologic conditions. In addition, several gages are used to monitor water supplies in drinking water reservoirs.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources Center

Program is found in the following core budget(s): Water Resources Center

7a. Provide an effectiveness measure. (continued)

Note: Water use data is collected from any entity with the capability of withdrawing 70 gallons per minute (100,000 gallons per day) or greater from any water source. Our staff use this data to study water usage trends and estimate current and future water needs statewide. In FY 2010, an extensive effort took place to update the major water users (MWU) database and list of users. Several MWU's were removed from the database because they no longer used water resulting in lower number of users.

Historically 89% of regulated dams are in compliance with Missouri's Dam Safety Law. Dams "not in compliance" are likely awaiting a reinspection and permit issuance based on a deficiency that was noted during a previous inspection.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources Center

Program is found in the following core budget(s): Water Resources Center

7b. Provide an efficiency measure.

Note: The United States Geological Survey provides matching funds for the installation of new stream gage sites, for the ongoing operation and maintenance of the network, and for several hydrologic studies. Without these federal matching funds the state would not be able to fully support these efforts. In addition, the U.S. Corps of Engineers provided matching funds to conduct regional water development studies.

7c. Provide the number of clients/individuals served, if applicable.

Number of Missourians served by protecting the quantity of water in the Missouri River for water supply purposes

	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Individuals using Missouri River for drinking water	2,900,155	3,121,550	2,840,541	2,935,524	2,930,971

Note: Approximately 80% of Missouri's population relies on water in the Missouri River as a source of drinking water. Other benefits of the program's work to ensure that the Missouri River has adequate flow include: recreation, agriculture (irrigation and livestock), flood control, fish and wildlife, water commerce, and industrial usage.

7d. Provide a customer satisfaction measure, if available.

Not available.

		(1)	(1)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) The FY 2009 invoice was for \$502,381; \$475,000 was paid in FY 2009 and the \$27,381 balance was paid in FY 2010. Due to General Revenue shortfalls, the remaining FY 2010 transfer appropriation from General Revenue to the Water Development Fund was placed in reserve. The FY 2010 invoice will be paid in arrears (FY 2011).

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources

Program is found in the following core budget(s): Clarence Cannon Dam Transfer and Payment

1. What does this program do?

The U.S. Army Corps of Engineers and the State of Missouri entered into a contract in 1988, obligating the state to repay the Corps of Engineers for building a 20,000 acre-feet water supply storage into the Clarence Cannon Dam and Mark Twain Lake project. The payment is limited to 3.22% interest and a portion of the overall project's operation and maintenance expenses. The state is billed in the spring of each year for interest, operations and maintenance expenses for the previous year. The Clarence Cannon Wholesale Water Commission markets and develops water from the Mark Twain Lake and has been conveyed additional water storage rights.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

PL 87-874 (Water Supply Act of 1958, as amended)
RSMo 256.290; 393.700-770

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No, although the contract contains a provision that if funds are not appropriated for the repayment of the contract amount, the contract will be terminated and control of the water-supply storage will revert to the Corps of Engineers. The state would be considered in default of the obligation, which could adversely affect the State's bond rating.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY 2011 Planned is shown at full appropriation.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources

Program is found in the following core budget(s): Clarence Cannon Dam Transfer and Payment

6. What are the sources of the "Other " funds?

Water Development Fund (0174)

Cash is transferred from General Revenue to the Water Development Fund for payment to the Corps of Engineers.

7a. Provide an effectiveness measure.

Compliance with the contract between U.S. Army Corps of Engineers and the State of Missouri, and statutes.

The Clarence Cannon Wholesale Water Commission (CCWWC) serves a total of 59,311 citizens; 57,031 buy directly from CCWWC and another 2,280 buy from systems purchasing from CCWWC.

7b. Provide an efficiency measure.

Not available

7c. Provide the number of clients/individuals served, if applicable.

Not available

7d. Provide a customer satisfaction measure, if available.

Not available

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Soil and Water Sales Tax Fund (0614)

Note: Request retention of existing estimated appropriations for the Soil and Water Conservation PSD appropriations.

Core Reallocation: The FY 2012 budget includes a core reallocation of \$425,000 appropriation authority from the Special Area Land Treatment (SALT) PSD to the Conservation Equipment and Monitoring Incentive Program.

Core Reduction: The FY 2012 budget includes a core reduction of \$375,000 appropriation authority from the Special Area Land Treatment (SALT) PSD.

2. CORE DESCRIPTION

The Soil and Water Conservation Program (SWCP) and Soil and Water Districts Commission provide leadership and support, both financial and technical, to the 114 soil and water conservation districts throughout the state. SWCP program staff are responsible for the administration of the Cost Share, Special Area Land Treatment, Conservation Equipment and Monitoring Incentive, and District Grant programs as well as various research and planning projects approved by the Department and/or the Soil and Water Conservation Districts Commission. The SWCP staff assists the districts in the reduction of soil erosion on agricultural land and to protect the water resources. In addition, SWCP staff provide direct assistance in training, education, accounting/auditing, information technology and public information programs to the districts. The SWCP staff also provide administrative support for the Soil and Water Districts Commission activities involving stakeholders and partners on the local, state and national level. Staff process between five to ten thousand contracts annually from landowners and districts providing approximately \$40 million in financial and technical assistance for the installation of soil and water conservation practices on agricultural land and the operation of each district.

CORE DECISION ITEM

Department of Natural Resources	Budget Unit 78850C, 79435C
Water Resources	
Soil and Water Conservation Core	
2. CORE DESCRIPTION (continued)	
<p>The <u>Soil and Water Conservation Program Specific Distribution (PSD)</u> appropriations consist of financial assistance programs including Cost Share, Special Area Land Treatment (SALT), District Grants Program, Conservation Equipment and Monitoring Incentive Program, and Grants to State Universities for soil and water conservation research. There is also appropriation authority for pass through Federal funding if and when opportunities exist for demonstration or technical administration projects. The critical roles of our voluntary conservation programs and our Soil and Water Conservation Districts are locally and nationally acclaimed as a very successful means to help reduce soil erosion on agricultural land and address water quality problems through voluntary programs throughout the state. Missouri's initiatives in these areas are recognized nationwide as models for other states to follow.</p> <p>Costs of these conservation practices are such that landowners could not implement them without the financial incentives and technical assistance from the Parks and Soil and Water Sales Tax.</p>

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.	
Appropriation (All Funds) (1 & 2)	40,282,292	40,140,406	42,775,040	41,488,831	E
Less Reverted (All Funds)	0	0	0	N/A	
Budget Authority (All Funds)	40,282,292	40,140,406	42,775,040	N/A	
Actual Expenditures (All Funds)	34,150,337	39,687,668	36,916,660	N/A	
Unexpended (All Funds)**	6,131,955	452,738	5,858,380	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	100,000	100,000	100,000	N/A	
Other	6,031,955	352,738	5,758,380	N/A	
	(3)		(3)		

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) FY 2011 PSD core appropriations are as follows: Demonstration Projects and Technical Assistance at \$100,000; Grants to Districts at \$11,680,820 "E"; Cost Share at \$24,000,000 "E"; Conservation Equipment and Monitoring Incentive Program at \$75,000 "E"; Special Area Land Treatment at \$3,600,000 "E"; and Research Grants at \$75,000 "E".

(3) The FY 2008 and FY 2010 unexpended appropriation was largely due to weather conditions delaying the completion of soil conservation projects prior to the end of the fiscal year.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation

1. What does this program do?

Soil and Water Conservation Operations: The Soil and Water Districts Commission and the Soil and Water Conservation Program (SWCP) provide leadership and support, both financial and technical, to the 114 soil and water conservation districts throughout the state. SWCP program staff are responsible for the administration of the Cost Share, Special Area Land Treatment (SALT), Conservation Equipment and Monitoring Incentive, and District Grant programs as well as various research and planning projects approved by the Department and/or the Soil and Water Conservation Districts Commission. The SWCP staff assists the districts in the reduction of soil erosion on agricultural land and to protect water resources. Staff process between five to ten thousand contract payments annually providing approximately \$40 million in financial assistance for the installation of soil and water conservation practices on agricultural land and operation of each of the local county soil and water conservation districts. The SWCP staff provides direct assistance in training, information/education, accounting/auditing, information technology and public information programs to board members and district employees. The SWCP staff also provides administration and support for the Soil and Water Districts Commission to include coordinating activities with stakeholders and partners on the local, state and national level. Funding this core item will allow the department to continue Missouri's proactive efforts to address soil erosion and related water quality problems. Missouri's successes with the sales tax funding of voluntary conservation programs and assistance to our Soil and Water Conservation Districts are recognized around the nation as a model for other states to follow.

Soil and Water Conservation Program Specific Distributions (PSD): The Soil and Water Conservation PSD's consist of many financial incentive programs and projects. The Cost-Share Grants, Conservation Equipment and Monitoring Incentive Program (includes Loan Interest Share Grant Program), and Special Area Land Treatment (SALT) programs provide financial incentives to landowners. The Cost Share and SALT programs provide for up to 75% of the estimated costs, the landowner is responsible for 25%, or more, of the estimated costs to install soil and water conservation practices. Costs of these conservation practices are such that agricultural landowners could not implement them without the financial incentives and technical assistance made available by the citizens of Missouri through the Parks and Soil and Water Sales Tax. Participation in the Cost-Share Grants Program is voluntary and incentives are provided to agricultural landowners for installing a best management practice that reduces soil erosion on agricultural land and protects the water resources of the state. These practices are designed to maintain soil productivity and prevent continued degradation of water quality of rivers and streams. Beginning in FY 2010 the Commission began the consolidation of the SALT watershed conservation practices with the regular Cost-Share practices which will allow them to approve targeted watershed and soil and water conservation practices on agricultural land. SALT projects will continue to be separately planned and budgeted until completed by FY 2015. Beginning in FY 2011, the Conservation Equipment and Monitoring Incentive Program will include increased emphasis for incentives for landowners who take initiative to conduct conservation monitoring of the conservation practices they use in their farm operations located in federally targeted watersheds. In FY 2012, \$425,000 of SALT program funding will be redirected to this program to provide these nation-leading initiatives to agricultural landowners.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation

1. What does this program do (continued)?

Grants to Local Soil and Water Conservation Districts provide funds for the operation of each of the 114 Soil and Water Conservation Districts. The locally elected soil and water district board of supervisors specifically budget and allocate how the grants will be spent depending on the needs of that district. Funding is provided for managerial/clerical/technical personnel salaries, benefits, information/education programs, equipment and general administrative expenses. While these grant funds do provide support to landowners that participate in the soil and water conservation practice programs, they also fund technical assistance and information/education programs for landowners and residents of the soil and water district who may not participate in these programs. The Soil and Water Research Grants provide funding to Missouri state colleges and universities for soil and water conservation related research to gather data for the development and refinement of programs.

Soil and Water Conservation Core - Reconciliation					
	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current	FY 2012 Request

Soil and Water Conservation PSDs (79435C)	31,116,830	37,189,242	35,537,071	39,530,820	39,155,820
Total	34,150,337	39,687,668	36,916,660	41,488,831	41,113,831

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Missouri Constitution, Article IV, Section 47a Sales and Use Tax Levied for Soil and Water Conservation
RSMo. 278.080 State's Soil and Water Districts Commission

3. Are there federal matching requirements? If yes, please explain.

No

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. FY 2011 Planned is shown at full appropriation.

FY 2011 core PSD appropriations are as follows: Demonstration Projects and Technical Assistance at \$100,000; Grants to Districts at \$11,680,820 "E"; Cost Share at \$24,000,000 "E"; Conservation Equipment and Monitoring Incentive Program at \$75,000 "E"; Special Area Land Treatment at \$3,600,000 "E"; and Research Grants at \$75,000 "E".

6. What are the sources of the "Other " funds?

Soil and Water Sales Tax Fund (0614)

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation

7a. Provide an effectiveness measure.

Notes: Each request equals one grant payment. Payments include district assistance grants, cost share, Special Area Land Treatment (SALT) and conservation equipment and monitoring incentives grants. The decrease in FY 2009 is a result of higher costs for practices while available state funds remained constant.

Notes: Tons of soil saved is based and projected on the evaluation criteria for the life of a conservation practice. Each specific practice saves soil at a rate determined by a federal Universal Soil Loss equation. The more practices implemented the more direct tons of soil are saved, resulting in less sediment entering into streams and lakes. Tonnage shown is cumulative since the program began evaluations in FY 1986. Projections are based on trends which indicate that additional landowners are voluntarily participating in conservation planning programs as well as starting and completing more practices each year, except years with unforeseen weather or economic impact.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation

7a. Provide an effectiveness measure (continued).

Soil conservation practices on agricultural land are also designed to conserve and protect the quality of water resources. The cumulative acres of land with conservation practices provides protection of and improves the quality of water resources on agricultural land. The Soil Districts Commission is focusing future efforts to greater emphasize water protection and water quality benefits. This was a new measure in FY 2011, therefore prior year projected data is not available.

Note: Beginning in FY 2010, each county soil and water conservation district board must submit a projected annual resource needs assessment for their district for the upcoming year. The Commission uses the total district needs submitted to evaluate and approve a cost share allocation to the districts that best meets the state's overall needs. The program uses the Missouri Soil and Water Information Management System (MOSWIMS) to track allocations and expenditures and provide the commission with management reports throughout the fiscal year to help maximize available resources. This is a new measure in FY 2012, therefore prior year data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation

7b. Provide an efficiency measure.

Note: Calculation shows total personal service and expense and equipment expenditures compared to PSD expenditures. The FY 2010 operations budget included a reduction of 17.0 FTE and \$929,029. FY 2012 and 2013 projections include the \$375,000 budget reduction from the SALT PSD, which reduces the overall budget due to decreasing revenue projections.

Note: This is reflective of landowner, district, program and other expenditures. Other expenditures include administrative transfers, miscellaneous support, and other departmental agencies. Since 2008 the percent spent on Cost Share payments to agricultural landowners has increased while program administrative costs have decreased. Administrative costs were reduced by using innovative online computer contracting, tracking and interface payment systems as well as process reviews and analysis to reduce duplication and inefficiency at all levels and increase customer service where possible. District assistance payments have stayed basically the same over the comparison period. This is a new measure in FY 2012 therefore, prior year projected data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Water Resources - Soil and Water Conservation Program

Program is found in the following core budgets: Soil and Water Conservation

7c. Provide the number of clients/individuals served, if applicable.

The Soil and Water Conservation Program (SWCP) provides leadership and support, both financial and technical, to 114 soil and water conservation districts and landowners throughout the state of Missouri.

7d. Provide a customer satisfaction measure, if available.

Note: The Parks and Soil and Water Sales Tax Amendment 1 was voted on in August 2006 and passed with 70.8% approval. The Parks and Soil and Water Sales Tax will be resubmitted to the voters in 2016.

Other Funds: Stormwater Control Fund (0302); Water Pollution Control Funds (0329 and 0330); Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Water and Wastewater Loan Revolving Fund (0602); Water and Wastewater Loan Fund (0649); Safe Drinking Water Fund (0679); Stormwater Loan Revolving Fund (0754); Rural Water and Sewer Loan Revolving Fund (0755); Concentrated Animal Feeding Operation Indemnity Fund (0834)									
The program requests retention of 25% General Revenue Personal Service and Expense & Equipment flexibility.									
Core Reallocation: The FY 2012 budget request includes a core reallocation of \$607,513 and 14.30 FTE for reorganization of the Wellhead Protection Section from the Water Protection Program to DGLS.									
Core Reduction: The FY 2012 budget request includes core reductions of \$42,381 from General Revenue Expense and Equipment appropriation authority.									
Request retention of the estimated appropriations from Federal and Other Funds pass through appropriations.									
Note: This core budget is facing fiscal challenges.									
2. CORE DESCRIPTION									
The goal of the Water Protection Program is to help ensure clean and safe water for all Missourians, including drinking water, and surface and groundwater for recreational, farming and industrial uses. To accomplish this goal, the program provides financial and technical assistance, issues permits, conducts compliance efforts and classifies water bodies to determine safe levels to protect their uses.									

CORE DECISION ITEM

Department of Natural Resources	Budget Unit <u>78847C, 79415C, 79405C, 79425C</u>
Division of Environmental Quality	
Water Protection Program Core	
2. CORE DESCRIPTION (continued)	
<p><u>Water Infrastructure</u> addresses inadequate treatment of sewage, water used for drinking water supplies, and storm water runoff that causes public health hazards and pollutes streams and lakes. The construction of public drinking water or wastewater treatment facilities is expensive and many Missouri communities need financial assistance to meet these costs. The department operates several grant and loan programs to assist political subdivisions to construct adequate wastewater, storm water and drinking water treatment facilities. This item requests the core appropriation to provide financial assistance to Missouri communities and public water supply systems for construction and expansion of drinking water and wastewater treatment projects. These loans and grants are administered by the Water Protection Program.</p> <p><u>Water Quality Studies</u> provides for core funding to help protect the integrity of public water systems and the quality of groundwater, streams and lakes. Projects, subgrants, and contracts are administered by the Water Protection Program to protect water quality.</p> <p>Public Drinking Water Sample Analysis ensures that public water systems are routinely tested for possible contamination, thereby ensuring that the drinking water supplied by public water systems is safe and the health of Missouri's citizens is protected.</p> <p>Water Quality Studies gather information that is used to develop strategic initiatives toward protection of the quality of Missouri's groundwater, streams and lakes. These water resources are important to the state's citizens and economy for beneficial uses such as drinking water, recreation, and support of aquatic life. These studies also assess the technical, managerial, and financial capability of public water systems and determine the most appropriate course of action for a small public water system to take to protect and maintain the quality of the source of its water and to ensure the citizens are consistently provided with clean water that is safe to drink.</p> <p><u>CAFO Closures</u> allow for the expenditure of Concentrated Animal Feeding Operation Indemnity Funds for closure of certain lagoon structures that have been placed in the control of government due to bankruptcy, failure to pay property taxes, or abandonment. In addition, when the department determines that an owner has successfully closed a CAFO, all moneys paid into the fund by such operation are returned to the owner.</p>	

CORE DECISION ITEM

Division of Environmental Quality	
Water Protection Program Core	

3. PROGRAM LISTING (list programs included in this core funding)

Water Protection Program

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds) (1)	154,956,900	278,442,488	288,875,731	126,679,344 E
Less Reverted (All Funds)	(20,210)	(138,821)	(52,046)	N/A
Budget Authority (All Funds)	154,936,690	278,303,667	288,823,685	N/A
Actual Expenditures (All Funds)	92,217,690	185,238,332	95,169,790	N/A
Unexpended (All Funds)	62,719,000	93,065,335	193,653,895	N/A
Unexpended, by Fund:				
General Revenue	521	75	85	N/A
Federal	7,872,991	10,036,525	8,280,484	N/A
Other	54,845,488	83,028,735	185,373,326	N/A
	(2), (3)	(2), (3)	(2), (3)	(4)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings. Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

- (1) Financial data includes operating and pass-through appropriations.
- (2) Fiscal uncertainties and hiring limitations have resulted in lower personal service and expense and equipment expenditures. The program has managed expenditures to stay within available revenues. In addition, Federal expense and equipment appropriations have been maintained to allow for new federal dollars that may become available.
- (3) Estimated appropriations are needed for the infrastructure and water quality studies pass-through appropriations to allow encumbrances of projects which pay out over multiple fiscal years. The encumbrances roll over into the next fiscal year's core appropriation resulting in large unexpended appropriation balances. Actual expenditures for infrastructure in FY 2008 dropped to \$79.8 million due to smaller bond closings in FY 2007 and FY 2008. There was only one bond closing in FY 2009 and none in FY 2010. This reduction in bonds sold translates into a decrease in construction projects resulting in a reduction of expenditures paid out.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78847C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: WATER PROTECTION PROGRAM	DIVISION: ENVIRONMENTAL QUALITY
1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.	
DEPARTMENT REQUEST	
The department plans to use the GR PS and E&E flexibility to effectively and efficiently manage emerging funding and environmental and natural resource issues. The Water Protection Program is requesting 25% GR flexibility on both PS and E&E, based on the FY 2012 Department Request.	
2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.	
PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$0 General Revenue PS \$0 General Revenue EE This flexibility is needed in the event of an environmental emergency that may affect public health or safety.	Expenditures are difficult to estimate at this time. This flexibility is needed in the event of an environmental emergency that may affect public health or safety. FY 2011 Flex Request (25% of GR PS Core) \$97,378 FY 2011 Flex Request (25% of GR EE Core) \$62,416
BUDGET REQUEST - DEPARTMENT REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	
Expenditures are difficult to estimate at this time. This flexibility is needed in the event of an environmental emergency that may affect public health or safety. FY 2012 Flex Request (25% of GR PS Core) \$97,378 FY 2012 Flex Request (25% of GR EE Core) \$51,821	
3. Please explain how flexibility was used in the prior and/or current years.	
PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
N/A - the flexible appropriation was not used in the prior year.	At this time there are no current year plans. The flexible language allows the division to address these issues without a permanent shift in appropriation levels.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

1. What does this program do?

The Water Protection Program helps ensure clean and safe water for all Missourians. To help ensure safe drinking water, the program provides financial and technical assistance to public drinking water supplies, sets standards for safety and testing, issues permits, and conducts compliance and enforcement efforts where necessary. Clean water is also part of a healthy economy. The program protects Missouri's surface and groundwater for drinking, recreational, farming and industrial uses including fishing, swimming, livestock watering and irrigation. To help ensure clean water, the program classifies waters, establishes safe levels to protect the uses of each, issues permits to wastewater treatment discharges and provides technical and financial assistance to improve water quality. The program also monitors the water quality of streams and lakes and develops strategies to restore impaired waters; permits large concentrated animal feeding operations; and administers low-interest loan and grant programs to help ensure Missouri communities develop adequate water infrastructure at an affordable cost. The program also trains and certifies operators at Missouri's water supply and wastewater treatment plants.

The Water Infrastructure PSD allows the department to provide grants and loans to Missouri communities for the construction of new, and the improvement of existing, drinking water, domestic wastewater, animal wastewater, storm water control and rural water supply and sewer systems. These systems protect the water quality of the state, supply its citizens with affordable, safe drinking water, and provide protection from storm water damage. The Water Protection Program's Financial Assistance Center issues these grants and loans through the Clean Water and Drinking Water State Revolving Funds and through funding sources made available in Constitutional Amendment 7 passed in 1998. From 1989 through December 31, 2009, the department's Clean Water and Safe Drinking Water State Revolving Loan Funds have provided more than \$2.3 billion dollars to Missouri communities, through low-interest loans, saving them more than \$966 million in interest costs. While there is no formal mechanism for tracking the number of jobs created by SRF projects in Missouri, the National Utility Contractors Association (NUCA) developed a method for estimating job creation: for every \$1 billion of construction, 20,003 to 26,669** jobs are created. Applying this to our SRF portfolio of \$2.3 billion, we estimate that the SRF has created in the range of 46,007 to 61,339 jobs in Missouri since inception.

These programs provide Missourians with affordable, safe drinking water and wastewater services and protect streams and lakes from pollution. New and improved infrastructure results in jobs that promote economic vitality.

** Note: Report published summer of 2009 - this statement is a recent change in the information that we previously utilized from this organization which said for every \$1 billion, 50,000 construction jobs and 20,000 permanent jobs were created.

Program is found in the following core budget(s): Water Protection Program

1. What does this program do (continued)?

Public Drinking Water Sample Analysis: Chapter 640.100.3 RSMo requires the department to provide routine sampling for Missouri's 1,477 community and 1,317 non-community public water systems. These systems must be routinely inspected and samples from each must be frequently analyzed to assure the integrity of public water systems. Through this appropriation, the department contracts to fulfill the requirement for chemical analyses that exceeds the capacity of its Environmental Services Program, or bacteriological analyses that cannot be performed by either this agency or the Department of Health and Senior Services. Drinking water can be a principal agent in the transmittal of communicable diseases caused by various microorganisms including viruses, bacteria, and protozoa. In addition, drinking water can be a significant catalyst to humans for exposure to dozens of man-made and naturally occurring chemicals that cause increased risk for cancer and other toxic effects.

Water Quality Studies: The department estimates that Missouri has over 106,000 miles of streams, with 24,389 miles classified for various uses. Missouri has more than 293,000 acres of classified lakes that permanently support aquatic life, as well as 1,100 identified springs. Water quality studies and projects funded by the department regularly monitors approximately 10% of the state's classified waters. Data collected through these monitoring efforts is used to assess, protect and restore the quality of Missouri's waters. Most of the activities funded under this program are conducted by other government entities, watershed groups, universities, nonprofit organizations, and others through contracts with the department. The Water Protection Program provides guidance and oversight of these contracts to ensure efficient use of funds and appropriate focus of effort.

Additionally, the department funds studies to determine the technical, financial, and managerial capability of public water supply systems and to determine the most appropriate course of action for a small public water supply system to take to protect and maintain the quality of the source of its water, either surface water or ground water, and to ensure the citizens are consistently provided with clean water that is safe to drink.

CAFO Closures PSD: This appropriation allows for the expenditure of funds to close abandoned lagoons at concentrated animal feeding operations. Concentrated animal feeding operations (CAFO) that are subject to mandatory permits are designed to protect or avoid adverse impact on water quality in Missouri's lakes, streams and groundwater. Pursuant to Section 640.745 RSMo, the owner of each Class IA CAFO remits 10 cents per animal unit permitted to the Concentrated Animal Feeding Operation Indemnity Fund on an annual basis for a period of 10 years. The appropriation allows the department to promptly address the closure of lagoons when the control of a facility has been placed with state or local government due to bankruptcy, failure to pay property taxes, or abandonment. The fund is administered by the department and is to be expended on the closure of Class IA, Class IB, Class IC or Class II CAFO wastewater lagoons. Additionally, when the department determines that an owner has successfully closed a CAFO, all moneys paid into the fund by the operation are returned to the owner.

RSMo 640.130	Emergencies (Drinking Water Supplies) - actions to be taken - penalties

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

3. Are there federal matching requirements? If yes, please explain.

Clean Water Act §319(h) Non-point Source Management Grant	40% State/Local (EPA)
Clean Water Act §604(b) Water Quality Management Planning Grant	100% Federal (EPA)
Clean Water Act §104(b)(3) Surveys, Studies, Investigations, and Special Purpose Grants	Current grant 5% State/Local (EPA)
Special Infrastructure Grant	25% State; 20% Local (EPA)
Special Infrastructure Administration Grant	100% Federal (EPA)
Clean Water State Revolving Fund Capitalization Grant	17% State/Local (EPA)
Drinking Water State Revolving Fund Capitalization Grant	20% State/Local (EPA)
Performance Partnership Grant funds for Water Pollution	16% State (EPA)
Performance Partnership Grant funds for Drinking Water	33% State (EPA)
Drinking Water Operator Training Reimbursement	100% Federal (EPA)
Section 106 Special Monitoring Grant	100% Federal (EPA)
Model Construction/Post-Construction - Site Development Training Module	100% Federal (EPA)
Missouri Municipal SSO Training Grant	100% Federal (EPA)
Counter Terrorism Coordination Grant	100% Federal (EPA)

4. Is this a federally mandated program? If yes, please explain.

Through delegation from, and agreements with, the federal Environmental Protection Agency, the Water Protection Program supports the federal Clean Water Act and the federal Safe Drinking Water Act. This includes the Clean Water State Revolving Fund and Drinking Water State Revolving Fund.

The federal Safe Drinking Water Act requires public drinking water systems to conduct routine chemical, radiological and microbiological monitoring of the water. Chapter 640.100.3 RSMo mandates that the state will provide this monitoring for these drinking water systems.

Water Quality Studies support the federally mandated Clean Water Act (CWA) through CWA 305(b) reporting, CWA 303(d) list development, CWA Total Maximum Daily Load (TMDL) development, and CWA 402 National Pollution Discharge Elimination System (NPDES) permit development. Water Quality projects and studies will promote improvement in water quality when performed in accordance with CWA 319 and 604(b) requirements and TMDL's.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. The Water Infrastructure and Water Quality Studies PSD appropriations are estimated, and are increased each year as needed so that they can be used to encumber and pay multi-year obligations against these funds. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Stormwater Control Fund (0302); Water Pollution Control Funds (0329, 0330); Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Water and Wastewater Loan Revolving Fund (0602); Water and Wastewater Loan Fund (0649); Groundwater Protection Fund (0660); Safe Drinking Water Fund (0679); Stormwater Loan Revolving Fund (0754); Rural Water and Sewer Loan Revolving Fund (0755); Concentrated Animal Feeding Operation Indemnity Fund (0834)

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7a. Provide an effectiveness measure.

Compliance Monitoring Activities

PDW = Public Drinking Water WPC = Water Pollution Control

	FY 2008 Actual		FY 2009 Actual		FY 2010 Actual	
	PDW	WPC	PDW	WPC	PDW	WPC

Inspections	3,500	3,029	3,500	3,029	3,500	3,029
Letters of Warning	2,335	2,175	2,335	2,175	2,335	2,175
Notices of Violation	350	600	350	500	350	500
Settlements	25	50	20	50	20	50
Referrals	125	75	125	75	125	75

Notes: The majority of EAVs and Inspections are conducted by the regional offices. Actual numbers for LOWs for FY 2008 and FY 2009 were revised to include Total Coliform Rule violations, Groundwater Rule violations, Operator Certification violations for not having certified operators, and violations for non-payment of statutory fees. PDW referrals include those made to the Attorney General for the collection of unpaid statutory fees. A change in procedures resulted in higher WPC LOWs in FY 2009. EAVs declined in FY 2010 as the department only plans to conduct EAVs requested by an entity, rather than scheduling them. WPC settlement and referral projections were increased due to enforcement of clean water fees. FY 2010 was first year NOVs have been issued for non-payment of water permit fees which resulted in increased number of NOV. Assumed that regulated facilities will focus on fee payment once they realize they will receive NOV for non-payment.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7a. Provide an effectiveness measure (continued).

Compliance Rate of Inspected Facilities

Federal & State Infrastructure Loans and Grants Awarded

Note: To fully utilize and maximize Recovery Act funding allotted to Missouri for construction of wastewater facilities, base program money was utilized and combined with Recovery Act funds to fully fund individual construction projects resulting in an increase in the federal and state dollars awarded, primarily the Rural water, sewer & Other grants. FY 2010 contained available funds from proceeds of the bonds sold in November, 2007. At this time, no additional bonds have been sold.

7a. Provide an effectiveness measure (continued).

Number of Infrastructure Grants and Loans Awarded Each Fiscal Year

	Grants Awarded	Loans Awarded	Total
2006	5	34	39
2007	57	22	79
2008	21	15	36
2009	34	22	56
2010	110	66	176
Total	227	159	386

Note: FY 2010 grants and loans awarded include those that utilized funds awarded to the state under the Recovery Act. Many of these grants and loans also used base Infrastructure program funds to comprise the full award.

Infrastructure Loans & Grants Awarded
Fiscal Years 2006, 2007, 2008, 2009 & 2010

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7a. Provide an effectiveness measure (continued).

The financing provided through the State Revolving Fund (SRF) allows communities to save between 60 and 70% of the interest cost of a conventional loan. Conventional interest cost is taken from the Lamont Financial composite schedule, Bond Debt Service page. For FY 2010, the conventional interest rate was 4.960% as compared to the SRF interest rate of 1.990%, a difference of 2.970% resulting in an overall savings to Missouri communities of \$102,206,110. There were no bond closings in FY 2010. FY 2010 interest savings include loans issued from both Recovery Act and base program loan funds.

Beginning in FY 2010, government entities receiving grants has been increased for grants to public water systems for studies to help determine technical, managerial and financial capability, as well as studies to protect source water and groundwater.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7a. Provide an effectiveness measure (continued).

Testing for Unregulated Contaminant Monitoring (UCMR2) ended in FY2010; Long Term 2/Surface Water ends in FY 2011; contract analyses of radionuclides continues on.

FY 2010 Actuals - Programmatic requirements were changed to ensure that volunteers earn the equipment provided to them, confusing volunteers and resulting in a reduction in the number volunteers attending the Level 1 due to ineligibility. Staff anticipates these issues to be resolved for FY 2011.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7b. Provide an efficiency measure.

Every dollar in Personal Services spent in the Infrastructure program generates construction dollars in Missouri communities

	FY 2008 Projected	FY 2008 Actual	FY 2009 Projected	FY 2009 Actual	FY 2010 Projected	FY 2010 Actual	FY 2011 Projected	FY 2012 Projected	FY 2013 Projected

Personal services costs incurred by the Water Protection Program to get the federal and state loans and grants awarded to Missouri citizens. These costs include direct personnel costs, fringe and indirect. FY 2010 Construction Dollars Awarded include funds awarded to the state through the Recovery Act.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7b. Provide an efficiency measure (continued).

Number of permit actions for control of discharges to the waters of the state completed each fiscal year

	FY 2008 Projected	FY 2008 Actual	FY 2009 Projected	FY 2009 Actual	FY 2010 Projected	FY 2010 Actual	FY 2011 Projected	FY 2012 Projected	FY 2013 Projected
Number of Missouri State Operating permit actions completed	4,500	8,748	4,500	4,119	4,500	3,723	4,500	7,500	2,600
Percent of new 60-day operating permits issued w/in statutory deadlines	N/A	74%	80%	91%	80%	73%	80%	80%	80%
Percent of new 180-day operating permits issued w/in statutory deadlines	N/A	71%	80%	80%	80%	70%	80%	80%	80%
Percent of new construction permits issued within statutory deadlines	100%	93%	95%	97%	95%	93%	95%	95%	95%

Permits are cyclical in nature. FY 2008 permit actions completed includes over 5,000 land disturbance terminations; FY 2009 projected includes expiration of 972 stormwater permits; FY 2010 includes expiration of Sand & Gravel Washing, Clay Mining, Metal Fabrication, Primary Lumber & Wood, Wood Treaters, and Solid Waste Transfers station permits; FY 2011 will include expiration of Plastics & Rubber Manufacturing, CAFO, and Land Application of Food Waste general permits; FY 2012 will include expiration of over 6,000 Land Disturbance, Limestone Quarry, and Petroleum Storage general permits; FY 2013 includes expiration of 16 master general permit templates totaling more than 1,100 general permits. 60-day and 180-day permit issuance was a new measure in FY 2009 therefore prior year projections are not available. There are several factors that contribute to the fluctuation in the number of permits issued within statutory timeframes: staff experience levels (takes approximately 1 year for a new permit writer to reach production level of an experienced permit writer), as well as overall staffing levels, and increased permit quality documentation. EPA objected to Missouri's schedule of compliance in permits for disinfection which resulted in the department not issuing those permits until the objections were resolved (those permits have been issued). Staff time required for the design of MoCWIS for transferring Missouri permit and water quality information to EPA has also contributed significantly to the fluctuation in the number of permits issued within statutory timeframes. Determination of performance information was inconsistent prior to Missouri Clean Water Information System (MoCWIS); a full year of data will be available beginning at the end of FY 2011. For FY 2008 Actual - issuance of 60-day permits within statutory timeframes was significantly impacted by implementation of the Antidegradation rule 2008. Including permit conditions to address antidegradation delayed issuance of the statewide general permit template, which forced the regional office to hold renewals of general permits covered under the statewide permit.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Water Protection Program

Program is found in the following core budget(s): Water Protection Program

7c. Provide the number of clients/individuals served, if applicable.

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual
Community Public Water Supply Systems	1,491	1,485	1,477
Population Served by Community Water Supply Systems	5,066,299	5,173,655	5,178,944
Non-Community Public Water Supply Systems	1,303	1,297	1,317
Permitted Wastewater & Stormwater Entities	11,413	12,327	13,080
Communities participating in State's infrastructure Loans & Grants Programs	36	94	151
Population Served by communities receiving infrastructure grants & loans (public wastewater treatment facilities; rural water, sewer & other; drinking water systems)	571,853	668,011	5,149,709
Government Entities Receiving Water Quality Grants	8	8	70
Nonprofit Organizations & Educational Institutions Receiving Water Quality Grants	8	13	6
Active Water & Wastewater Facility Operator Certifications	8,303	8,553	8,732
Water & Wastewater Operator Certification Examinations Given	1,403	1,570	1,570
Number Attending Water & Wastewater Operator Training Courses	13,114	14,000	13,292

Notes: Community Public Water Supply System - serves residential areas where a minimum of 25 people live all year (i.e. towns, cities, mobile home parks, subdivisions) or systems with a minimum of 15 service connections; Non-community Public Water Supply System - serves transient population of a minimum of 25 people per day (restaurants, schools, businesses, parks, highway rest areas). Beginning in FY 2010, government entities receiving grants increased for grants to public water systems for studies to help determine technical, managerial and financial capability, as well as studies to protect source water and groundwater. Number of communities participating in State's Infrastructure Loans and Grants programs include Recovery Act grants and loans awarded.

7d. Provide a customer satisfactions measure, if available.

Est. Fringe 0 0 0 0

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Missouri Air Emission Reduction Fund (0267); Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594)

Interagency Cooperation: The Department, in cooperation with the Highway Patrol is implementing the vehicle emission inspection program. The Highway Patrol will bill the department for their costs (approximately \$105,000), which will be paid through this expense and equipment authority.

Request retention of existing estimated appropriations for Federal Funds and Other Funds pass through appropriations.

Note: This core budget is facing fiscal challenges.

2. CORE DESCRIPTION

The Air Pollution Control Program (APCP) strives to maintain and improve the quality of Missouri's air to protect public health, general welfare and the environment. The APCP issues construction and operating permits to help ensure facilities are built in compliance with the laws and rules designed to protect public health. The program, working with the department's Regional Offices, identifies facilities that are not in compliance and works with them to reach compliance. By collecting air monitoring and emission inventory information, the APCP provides benchmark data for the state's air quality planning efforts. Air monitoring data can be measured against that benchmark to provide an indicator of whether air pollution control in Missouri is successful.

As a result of SB 583 (2006) being signed into law, the Gateway Vehicle Inspection Program (GVIP) began October 1, 2007. Hundreds of low-volume test-and-repair and several test-only stations operated by licensed small businesses conduct on-board diagnostics emissions tests in conjunction with safety inspections.

CORE DECISION ITEM

Department of Natural Resources	Budget Unit <u>78865C, 79230C</u>
Division of Environmental Quality	
Air Pollution Control Program Core	

2. CORE DESCRIPTION (continued)

The Air Pollution Control Grants and Contracts supports four local governmental agencies in Kansas City, St. Louis City, St. Louis County and Springfield. These grants help fund their air monitoring and pollution control activities. Grants are also given to agencies such as the metropolitan planning organizations (East-West Gateway Council of Governments in the St. Louis area and Mid-America Regional Council in the Kansas City area) to carry out planning, education and outreach activities aimed at reducing air pollution. In addition, the department may utilize contractors to assist with air monitoring and pollution control activities.

This core item also allows the department to receive federal funds for homeland security and protection. In the past, the department has received federal funds directed toward monitoring air quality. The department needs this appropriation to receive and expend federal funds directed at environmental security threats.

3. PROGRAM LISTING (list programs included in this core funding)

Air Pollution Control Program

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.	
Appropriation (All Funds) (1)	10,786,389	11,587,952	12,462,116	10,819,640	E
Less Reverted (All Funds)	0	0	0	N/A	
Budget Authority (All Funds)	10,786,389	11,587,952	12,462,116	N/A	
Actual Expenditures (All Funds)	8,134,574	8,210,529	8,625,032	N/A	
Unexpended (All Funds)	2,651,815	3,377,423	3,837,084	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	763,229	1,868,099	1,726,693	N/A	
Other	1,888,586	1,509,324	2,110,391	N/A	
	(2 & 3)	(2 & 3)	(2 & 3)		

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

CORE DECISION ITEM

Department of Natural Resources	Budget Unit 78865C, 79230C
Division of Environmental Quality	
Air Pollution Control Program Core	

4. FINANCIAL HISTORY (continued)

NOTES:

- (1) Financial data includes operating and pass through appropriations.
- (2) The department continues to review operating expenditures to be efficient and effective with state resources. The majority of other funds lapses were in expenses and equipment.
- (3) The pass through appropriations are increased as needed to encumber known project obligations. Unexpended appropriations are due to timing of grant awards and payments to subgrantees, which may span multiple fiscal years. The majority of Federal fund lapses and a portion of the other funds lapses are PSD related.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

1. What does this program do?

The Air Pollution Control Program (APCP) strives to maintain and improve the quality of Missouri's air to protect public health, general welfare and the environment. The APCP operates according to the Clean Air Act, Missouri Air Conservation Law and State Implementation Plans and Rules. The APCP issues construction and operating permits to help ensure facilities are built in compliance with the laws and rules and not operating in a manner to cause violations of federal and state, health-based air quality standards. The APCP, working with the department's Regional Offices, identifies facilities that are not in compliance and works with them to reach compliance. If those efforts are unsuccessful, the program will start enforcement action.

By collecting air monitoring and emission inventory information, the APCP provides benchmark data and measures collected data against that benchmark to provide an indicator of whether air pollution control in Missouri is successful. When EPA promulgates an air quality standard for a pollutant, it triggers a process to evaluate each county in the state and determine what areas of the state violate the new standard. EPA then designates those areas found to "cause or contribute" to the violation as "nonattainment" areas. Depending on the pollutant, this designation then triggers an 18-month or 3-year time frame for the state to submit a State Implementation Plan, which is a plan to detail what measures the state will implement to improve air quality in the nonattainment area to the level necessary to achieve the standard. Three areas within the state are currently designated non-attainment including St. Louis Ozone, St. Louis PM2.5 (fine particles) and the City of Herculaneum for Lead. The APCP is working to attain these federal standards, while beginning early planning efforts to address several new, more stringent standards as the following describes.

The EPA revised the National Ambient Air Quality Standard (NAAQS) for Lead from 1.5 micrograms per cubic meter (ug/m3) to 0.15 ug/m3, effective January 2009. In December 2009, the department recommended to EPA that the City of Herculaneum and portions of Iron, Dent, and Reynolds Counties be designated nonattainment for the new Lead NAAQS. The EPA is expected to finalize these nonattainment areas by October 2010. State Implementation Plans (SIPs) to bring these areas into attainment are due in July 2012. The EPA established a new Nitrogen Dioxide (NO2) NAAQS of 100 parts per billion (ppb), effective April 2010. The state currently does not have any areas out of compliance with the new NO2 NAAQS. However, the standard requires that NO2 monitors be located near major roadways in heavily populated areas by early January 2013. Once operating, the new monitors may detect problems with this NO2 standard. The EPA set a new Sulfur Dioxide (SO2) NAAQS of 75 ppb, effective August 23, 2010. The department is in the process of evaluating SO2 monitoring and modeling data to determine which areas should be recommended for a nonattainment designation. Preliminary analysis indicates that Kansas City, Springfield, and Herculaneum and potentially other areas with large SO2 emission sources could have problems with this new standard. The deadline to submit recommendations to EPA is June 2011, and SIPs are due in February 2014. Lastly, the EPA proposed lowering the Ozone NAAQS from 75 ppb to a range of 60-70 ppb and planned to finalize the standard by August 31, 2010, however, this rule may be delayed until October 2010. Once the standard is final, the department is required to recommend which areas are in nonattainment of the standard by January 2011, and the EPA is expected to issue final designations by August 2011.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

1. What does this program do (continued)?

The department's vehicle emission inspection program in the St. Louis ozone non-attainment area ensures cars and light duty trucks meet pollution standards. The main problem pollutant in St. Louis has been ground level ozone - a highly corrosive and reactive form of oxygen produced through chemical reactions of other pollutants, like volatile organic compounds (VOCs) and nitrogen oxides (NOx). VOC and NOx are produced directly by many sources, including automobiles and factories. Ground level ozone causes breathing problems by damaging lung tissue and aggravating respiratory diseases. Asthma rates, especially among children, have increased significantly in recent years. In the spring of 2004, the EPA designated the St. Louis metropolitan area as a non-attainment area for the "8-hour" ozone NAAQS.

As a result of Senate Bill 583 (2006) being signed into law, the Gateway Vehicle Inspection Program (GVIP) began October 1, 2007. Hundreds of low-volume test-and-repair and several test-only stations operated by licensed small businesses conduct on-board diagnostics (OBD) emissions tests in conjunction with safety inspections. 1996 and newer model year gasoline-powered vehicles and 1997 and newer diesel-powered vehicles are OBD tested. 1995 and older model year gasoline-powered and 1996 and older model year diesel-powered vehicles are exempt from the emissions test.

Air Pollution Grants & Contracts: The Missouri Air Conservation Commission granted certificates of authority to four local government agencies to implement portions of the Missouri Air Conservation Law. Grants to these four local government air agencies in Kansas City, St. Louis City, St. Louis County and Springfield help fund their air monitoring and pollution control activities. Local agencies issue air permits, maintain their own air monitoring networks (except Kansas City), perform inspections and respond to citizen inquiries. The department maintains oversight of the local air agencies through routine audits, constant communication, and review of inspection reports and administrative orders. Grants are also given to agencies such as the metropolitan planning organizations (East-West Gateway Council of Governments in the St. Louis area and Mid-America Regional Council in the Kansas City area) to carry out planning, education and outreach activities (ozone and PM 2.5) directed at reducing air pollution. In addition, the department may utilize contractors to assist with air monitoring and pollution control activities.

The department also received federal Homeland Security funds for the installation of a network of ambient air monitors. The department continues to receive funds for operation of the network.

Air Pollution Control Program - Reconciliation					
	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current	FY 2012 Request
Air Pollution Control Operations (78865C)	5,420,419	5,245,175	5,121,033	6,992,706	6,992,706
Air Grants & Contracts PSD (79230C)	2,714,155	2,965,354	3,503,999	3,826,934	3,826,934

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Federal Clean Air Act, with amendments, 1990	40 CFR Part 51 Subpart S
Energy Policy Act of 2005	
RSMo 643.010 through 643.220	Prevention, abatement, and control of air pollution
RSMo 643.225 through 643.265	Asbestos abatement
RSMo 643.300 through 643.355	Air Quality Attainment Act
RSMo Chapter 643	Prevention, Abatement, and Control of Air Pollution
RSMo 643.050	Power and duties of commission - rules, procedure
Public Law (107-117)	Recovery from and Response to Terrorist Attacks on the United States Act, 2002

3. Are there federal matching requirements? If yes, please explain.

The Performance Partnership Grant requires the state to provide a continuing level of state funding.	Approximately 40% for the current year (EPA)
Ambient Air Monitoring Network Project (PM 2.5) Grant	100% Federal (EPA)
National Air Toxic Trends Site Grant	100% Federal (EPA)
State Innovation Grant	65% Federal (EPA)
State Clean Diesel Grant	60% Federal (EPA)/40% Match
National Clean Diesel Grant (MoDOT)	37% Federal (EPA)/63% Match
Special Purpose Monitoring (SPM) of Air Particle Grant and/or Aerosol Grant	100% Federal (DHS)
National Green Fleet Diesel Emission Reduction Act Grant	83% Federal (EPA)/17% Match

4. Is this a federally mandated program? If yes, please explain.

The EPA has delegated authority to the department to ensure compliance with the requirements of the Federal Clean Air Act. Additionally, the 1990 Federal Clean Air Act Amendments require states to monitor air quality for compliance with the federal, health-based standards (NAAQS). St. Louis is a "moderate" ozone non-attainment area. Pursuant to the federal Clean Air Act and regulations promulgated there under, a moderate ozone non-attainment area is required to have a vehicle emissions inspection/maintenance (I/M) program.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Missouri Air Emission Reduction Fund (0267); Natural Resources Protection Fund-Damages Subaccount (0555); Natural Resources Protection Fund-Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund-Air Pollution Permit Fee Subaccount (0594)

PROGRAM DESCRIPTION

Settlements	30	40	75	30	40	75	30	40	75
Referrals	5	20	10	5	20	10	5	20	10

EAVs are done by the Regions and Air Pollution Control Program. Inspections are done by the Regions and Local Air Agencies, and some by the Air Pollution Control Program. Fewer Permitted Facilities were visited by staff in FY 2010 (EAVs); we expect EAV projections to decrease in future years. FY2009 data for Asbestos and Open Burning LOW, NOV, Settlements and Rederrals has been revised based on updated data.

St. Louis County	4	215	5	10	15	4	215	5	10	15

Kansas City does not maintain their own air monitoring network; this is done by the APCP. Kansas City and Springfield do not issue Vapor Recovery Permits. St. Louis City does not issue Open Burning Permits. Construction and Operating Permit numbers include initial permits, renewals and amendments to permits. Construction Permits decreased from FY 2009 to FY 2010 due to low staffing levels and fewer renewals received for processing.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

7a. Provide an effectiveness measure (continued).

Previous Standard Note: The National Ambient Air Quality Standard (NAAQS) for Lead was 1.5 ug/m3 averaged quarterly.

Revised Standard Note: In October 2008, EPA promulgated a revision of the NAAQS for Lead from 1.5 ug/m3 to 0.15 ug/m3, effective January 2009. EPA has also revised the form of the standard, from a calendar quarterly average to the highest three-month average (rolling each month) over a three-year period. Therefore, future values for comparison to the standard will be reported monthly. The department submitted nonattainment area boundary recommendations under the new lead standard to EPA in December 2009. The department will develop a revision to the State Implementation Plan to meet the new standard, which is due July 2012 for the two recommended nonattainment areas. As a result of the new standard, the department has established 12 new monitoring sites to properly evaluate compliance throughout the state and ensure protection of public health.

The previously reported Herculanum Broad Street site is now within the Doe Run smelter property area and therefore can no longer be used to determine compliance, and the Glover site is no longer monitoring high values, given that most operations at the facility have ceased for the time being. Herculanum Main Street and Buick South are now the design value sites for their respective violation areas and are the most applicable performance measure sites under the new standard. Buick South had an exceedance of the previous standard in the 4th quarter of 2008 due to an upset/malfunction condition. We are using the actual average for 2009 as the projected value for Herculanum Main Street and Buick South sites.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

7a. Provide an effectiveness measure (continued).

Previous Standard Note: The eight-hour National Ambient Air Quality Standard was 85 ppb, with compliance determined as follows: At each site, the fourth highest daily eight-hour average for each year of a consecutive three-year period were averaged. The site with the highest value was compared to the standard to determine compliance. A value of 85 ppb or greater meant the area was in violation. MSA = Metropolitan Statistical Areas.

New Standard Note: EPA lowered the National Ambient Air Quality Standard for Ozone to 75 ppb. This 2008 standard resulted in the need to add monitors in St. Joseph, Joplin, Columbia, and Jefferson City to properly evaluate compliance throughout the state and ensure protection of public health. Additional monitoring will be required due to revised monitoring guidance in 2012.

On January 1, 2010, EPA proposed revising the ozone standards, due to reconsideration requests by several parties. The proposed revision of the primary standard to a level of 60 to 70 ppb and the secondary standard to a time-weighted seasonal average, will cause greater difficulty in achieving the standard, and undoubtedly require additional counties to be considered for non-attainment. The standard is expected to be finalized at the end of October 2010, with State Plans due by the end of 2013.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

7a. Provide an effectiveness measure (continued).

The Annual Average National Ambient Air Quality Standard for fine particles (PM 2.5) is 15 ug/m³. For each site, the annual average for each year of a consecutive three-year period are averaged. The site with the highest value determines the compliance for the entire area. No sites in Missouri are in violation. EPA has designated several counties on both the Missouri and Illinois side of the MSA as non-attainment due to their assessment of several factors including emissions, population, air quality, and others. A plan to bring the area into attainment was submitted to EPA in October 2009, as an amendment to the Missouri State Implementation Plan. MSA = Metropolitan Statistical Areas.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

7a. Provide an effectiveness measure (continued).

The 24-Hour National Ambient Air Quality Standard for fine particles (PM 2.5) has been lowered from 65 ug/m3 to the current standard of 35 ug/m3. For each site, the 24-hour average 98th percentile value for each year of a consecutive three-year period are averaged and referred to as the design value for that monitor. The site with the highest value determines the compliance for the entire area. Missouri design values for the 24-hour PM2.5 NAAQS from 2004-2008 all show compliance. In addition, Illinois EPA proposed that PM2.5 monitoring data for July 5, 2008, at the Granite City site (St. Louis area) be classified as an exceptional event due to fireworks, to which EPA has concurred. This means that the 2006-2008, 24-hour design value for the St. Louis area is in compliance with the standard. On October 8, 2009, the Air Pollution Control Program was notified that the entire state was in attainment for the PM 2.5 24-hour standard. MSA = Metropolitan Statistical Areas

7b. Provide an efficiency measure.

Percent of Permits Issued Within Regulatory Deadline

St. Louis Non-Attainment Area Citizens Served and Vehicle Inspections Per FTE of I/M Staff

The Gateway Vehicle Inspection Program began October 1, 2007. U.S. Census Bureau data estimates that the St. Louis ozone non-attainment area had 2 million residents in 2006. If current population growth trends continue, the St. Louis area will see an increase of approximately 10,000 residents each year. Vehicle population is estimated to grow by approximately 13% per calendar year. FY 2009 Actual citizens served per FTE has been revised based on 2009 US Census estimates.

PROGRAM DESCRIPTION

Program is found in the following core budget(s): Air Pollution Control Program

7c. Provide the number of clients/individuals served, if applicable (continued).

Missouri Residents Served by DNR

Of Missouri's 5.9 million total population, MDNR performs inspections, permitting and air monitoring for approximately 3.1 million (52%). The remaining population is served by the Local Air Agencies.

Population data is based on the 2009 US Census population estimate, which is the most current data.

P70 = Any facility with potential to emit greater than 100 tons per year (tpy) of any criteria pollutants, either 10 tons of one or 25 tons combined of hazardous air pollutants (HAP)s.

Basic = Any facility with potential to emit greater than de minimis levels but less than 100 tons potential.

Intermediate = Any facility that has potential to emit greater than 100 tpy, but accepted an emission limit of less than 100 tons.

DemPal(NOP) = No operating permit required. Permit limits actual emissions to be below de minimis levels.

Portable = No operating permit required. The equipment is portable and must move at least every 2 years.

Data Source: 2009 Emission Inventory Questionnaires (most complete data available).

7c. Provide the number of clients/individuals served, if applicable (continued).

Missouri Residents Served by Local Air Agencies

Grant Awards (Program Specific Distribution dollars/sources)
for FFY 2010.

Area	TOTAL PSD	Sources
Springfield	\$294,031	58
Kansas City	\$483,057	146
St. Louis County	\$706,453	140
St. Louis City	\$969,018	142

Note: Sources equals the number of facilities required to submit an
EIQ in each Local Agency Jurisdiction. PSD Dollars represents
Federal Funds, Air Emission Fees, and Inspection Maintenance
Fees.

The chart shows the number of people residing in the counties within the various local agency jurisdictions. In these jurisdictions, the respective local agency performs inspections, permitting and air monitoring (except Kansas City). Population information obtained from US Census Bureau 2009 population estimates.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Air Pollution Control Program

Program is found in the following core budget(s): Air Pollution Control Program

7c. Provide the number of clients/individuals served, if applicable.

The Air Pollution Control Program strives to maintain and improve the quality of Missouri's air to protect public health, general welfare and the environment from harmful air pollutants. Exposure to common air pollutants like ozone, particulate matter, carbon monoxide, or sulfur oxides, may cause a variety of adverse health effects. Some examples of health effects include respiratory problems, labored breathing, chronic bronchitis, irregular heartbeat, cancer, angina, impaired vision, and reduced brain function.

Asthma, which can be triggered by air pollutants, is a chronic disease which can range from mild to life-threatening. Allergens, respiratory infections, heavy exercise, exposure to chemicals, fumes, and smoke can all trigger asthma attacks. Although there is no cure for asthma yet, medication and avoiding a known trigger can reduce the number of attacks and their severity. Following are some asthma statistics:

According to 2004 estimates, 578,474 Missouri adults have been diagnosed with asthma in their lifetime.
According to 2004 estimates, 90,314 Older Missourians (age 65 or older) have been diagnosed with asthma in their lifetime.
In the year 2001, there were 397,696 Missouri households where at least one child had asthma.
441,152 Missourians visited the emergency room due to asthma between the years 1994-2008.
110,369 Missourians were hospitalized due to asthma between the years 1994-2008.
1,645 Missourians died due to asthma between the years 1990 and 2008.

The Missouri Department of Health and Senior Services (DHSS) provides the Asthma statistics through their Missouri Information for Community Assessment (MICA) program, and this data is the most current available. DHSS does not have a system in place to completely measure the burden of asthma in children in Missouri; therefore corresponding data for children is currently not available. Corresponding costs for asthma in Missouri is currently not available.

	FY2008 Projected	FY2008 Actual	FY2009 Projected	FY2009 Actual	FY2010 Projected	FY2010 Actual	FY2011 Projected	FY2012 Projected	FY2013 Projected
Vehicles Subject to GVIP Emission Inspection	375,000	544,000	614,720	690,516	780,283	826,170	933,572	1,054,936	1,192,078
Population of St. Louis Non- attainment Area	2,044,000	2,014,175	2,054,220	2,024,671	2,034,671	2,024,671	2,034,671	2,044,671	2,054,671

Vehicle estimates are expected to grow by approximately 13% per year. Population data for the non-attainment area which includes St. Louis County, St. Louis City, St. Charles County, Jefferson County and Franklin County is based on 2009 US Census population projections and is expected to grow by approximately 10,000 per year. FY 2009 Actual population has been revised based on 2009 US Census estimates.

7d. Provide a customer satisfaction measure, if available.

With the introduction of the new Gateway Vehicle Inspection Program (GVIP), the number of inspection stations that motorists have to choose from has increased from 14 under the previous program to approximately 778 with the GVIP. Motorists are now able to choose one facility that can perform both safety and emissions inspections, which maximizes the motorist convenience of the GVIP.

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.					Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.				
Other Funds: Natural Resources Protection Fund - Damages Subaccount (0555); Solid Waste Management Fund (0570); Underground Storage Tank Regulation Program Fund (0586); Environmental Radiation Monitoring Fund (0656); Hazardous Waste Fund (0676); Dry-cleaning Environmental Response Trust Fund (0898)									
Note: Request retention of the existing estimated appropriations for Federal and Other Funds pass through appropriations.									
Note: This core budget is facing fiscal challenges.									
2. CORE DESCRIPTION									
The goal of the Hazardous Waste Program is to protect human health and the environment from threats posed by hazardous waste and other contaminants. To accomplish this goal, the program encourages the reduction of hazardous waste generation; regulates the management of hazardous waste; oversees the cleanup of contamination thereby promoting property re-use for economic development and sustainable communities; regulates the management, removal and cleanup of petroleum storage tanks; and ensures long term stewardship of sites where contamination remains.									
<u>Hazardous Sites PSD</u> : The Hazardous Waste Program exists in part to address environmental contamination caused by human activity at sites such as Brownfields, gas stations, major oil refineries, old mining sites, wood treaters, and other sites. In most cases, the program sets standards and oversees other entities who perform the needed investigation and cleanup activities. These entities include responsible parties; voluntary businesses and developers; and federal, state and local governments. However, in some cases, the program takes direct control of the investigation or cleanup at a site using funds provided for that purpose from federal or state sources. The program uses these resources to engage consultants and contractors to perform fieldwork including preparing workplans and reports, as well as conducting cleanup activities. Where appropriate, the department will perform operation and maintenance activities at sites where remedial action has occurred to help ensure the remedy remains protective of human health and the environment.

(3)

(4)

(5)

(2)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) FY 2011 PSD appropriations include: Leaking Underground Storage Tanks \$420,000; Drycleaner Cleanups \$200,000 "E"; and Hazardous Substances Cleanups \$996,274 "E". The department requests retention of the "E" on the Drycleaner and Hazardous Substances appropriations. These appropriations are increased each year to encumber known project obligations. Since these are multi-year projects, lapse may occur due to timing.

(3) FY 2008 expenditures include a \$597,648 payment to EPA, for superfund match obligations.

(4) FY 2009 actual expenditures were higher than the previous year, due in part to lower than normal staff turnover, additional federal grant expenditures for the improvement of the Fees and Taxes Database, increased reimbursements to dry cleaner facilities under the Dry cleaner Environmental Response Program and increased remediation activities at several Leaking Underground Storage Tank facilities. FY 2009 expenditures include payments of \$423,168 to EPA, for superfund match obligations.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

1. What does this program do?

The three major functions of the Hazardous Waste Program are:

Pollution Prevention – The program is responsible for ensuring compliance with laws and regulations designed to prevent pollution. The program works with businesses that generate and transport hazardous wastes to ensure safe handling and disposal by issuing identification numbers, certifications and permits to companies that treat, store and dispose of hazardous wastes. In reporting year 2009, Missouri companies generated about 253,916 tons of hazardous waste. Approximately 78% of this was treated or disposed of in Missouri; the remainder was shipped out of state or out of country. During this same period, Missouri received approximately 124,000 tons of hazardous waste from outside the state. About 85.7% of this imported waste was burned by Missouri cement kilns in their cement making operations as a substitute for coal. The program also oversees the operation of over 3,600 underground storage tank sites.

Remediation – The program is responsible for ensuring cleanup of contamination that is not caused by nature. The program implements laws that require responsible parties to be accountable for the contamination they cause. The program also works with parties seeking to voluntarily clean up contamination. In all cases, the department provides oversight for investigating and remediating contamination to bring these sites back into beneficial reuse for economic benefit and sustainable communities. Where appropriate, the program performs operation and maintenance activities to help assure that remedial actions taken at a site continue to be protective of human health and the environment. Examples are: Brownfields, gas stations, major oil refineries, abandoned lead mine sites, major industrial areas, wood treaters, Superfund sites, drycleaners, federally owned sites and many others.

Long Term Stewardship – Because most cleanups leave some residual contamination, the program implements long-term stewardship measures to ensure that cleanup decisions result in safe and productive reuse of properties for future generations. Examples of long-term stewardship tools include: engineered controls to isolate contamination, property controls to limit activities, governmental controls such as zoning or permits, informational devices and regular inspections.

Hazardous Sites PSD

Leaking Underground Storage Tanks: The federal government provides resources to states to address contamination from underground tank releases in situations where there is a threat to human health and the environment but no willing or viable responsible party can be found. The federal government also allows the state to use these funds to assist cities where abandoned underground tanks are an impediment to revitalization efforts.

The goal of the Missouri Risk Based Corrective Action (MRBCA) process is to cleanup petroleum contamination faster, more effectively and more appropriately tailored to cleanup of a specific site. By employing tools such as exposure assessment and risk assessment, the use of risk-based decision making can consider the current and potential risks posed by an underground storage tank release. This knowledge is used to make decisions about corrective action processes and site management. The department provides clear guidance to consultants and contractors, which results in better plans and reports, speeding up the work, and cutting paperwork costs. The net result will be an increased number of cleanups completed per year.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

1. What does this program do (continued)?

Drycleaner Environmental Cleanups: Senate Bill 577 (2000), created the Drycleaning Environmental Response Trust (DERT) Fund to assist in the cleanup of contaminated drycleaner sites. Cleanup of contaminated properties provides an opportunity for reuse and economic development. The program reimburses eligible parties for qualifying investigation and cleanup expenses over the \$25,000 deductible. The first four years of the program were dedicated to collecting fees as required by statute and developing the program rules. The Joint Committee on Administrative Rules disapproved the rulemaking on September 16, 2004. Senate Bill 170 and Senate Bill 225 (2005) reauthorized the DERT Fund with changes. The DERT Fund Rules became effective on May 30, 2006. State regulations require that reimbursement of the DERT Fund monies be accomplished based on site prioritization. DERT Funds are allocated to prioritized sites in the following proportions: high priority 60%, medium priority 30%, and low priority 10%.

To date, 33 sites have been accepted into the DERT program, however being accepted into the program does not guarantee that a site will receive complete reimbursement of their cleanup costs. Sites in the program receive oversight of their cleanups and a certificate of completion in addition to potential reimbursement of eligible costs. The department estimates there are approximately 864 potentially contaminated drycleaner sites in Missouri. Based on current revenue and expenditures and average cleanup costs, the fund could support reimbursement of cleanup costs for 25 sites over the life of the fund. The sunset date for this fund is August 28, 2012. Current projections do not reflect reimbursement being completed on funded sites prior to this date. Reimbursement is a complex process and is dependent on receiving all appropriate documentation and responses from owners and consultants, sometimes spanning multiple fiscal years.

Hazardous Substance Cleanup: Pollution and public health problems have resulted from the mismanagement of waste at abandoned or uncontrolled hazardous waste sites and federal facility sites in Missouri. The department, in coordination with EPA, may remediate these sites solely or they may be remediated by the responsible party with state oversight. The federal government and the state provide resources to address hazardous substance sites in Missouri where there is no willing viable responsible party. The state also pursues clean ups independently of the federal government when EPA has not ranked a site as a priority. This PSD is used to hire contractors to perform clean up work or to perform relevant environmental studies at these sites.

This appropriation is also used to pay EPA for the State of Missouri's 10% match obligation for remedial action conducted at Superfund sites. Funds have also been used to investigate several radiological contaminated sites. The program will continue to utilize federal brownfield resources to conduct assessment and cleanup activities at eligible Brownfields sites which are inclusive of, but not limited to brownfields sites contaminated with hazardous and/or petroleum substances, lead-based-paint, asbestos, controlled substances and mine-scarred lands, thereby promoting property re-use for economic development and sustainable communities.

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Pollution Prevention

Resource Conservation and Recovery Act of 1976 (RCRA), as amended, Public Law 94-580

Solid Waste Disposal Act of 1976

Toxic Substances Control Act, as amended, Section 28 and 404 (g), Public Law 102-550

Energy Policy Act of 2005 (The department is moving toward adopting and implementing the Underground Storage Tanks provisions of this act.)

RSMo 260.350 through 260.434

Hazardous Waste Facility Permits - Permitting, Inspection and Enforcement;
Resource Conservation and Recovery Act (RCRA)

RSMo 260.375

Hazardous Waste Transporter Licensing

RSMo 260.390

Commercial Hazardous Waste Facility Inspection Program

RSMo 260.396

PCB Inspections

RSMo 319.100 through 319.139

Petroleum Storage Tanks

Remediation and Long-term Stewardship

Comprehensive Environmental Response, Compensation, and Liability Act of 1980, Public Law 96-510, as amended

Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499

Atomic Energy Act of 1954, as amended, Section 21, Public Law 83-703

Energy Reorganization Act of 1974, Public Law 93-438

Department of Energy Organization Act of 1977, as amended; Public Law 95-604

Energy Policy Act of 1992, Title X and XI

Small Business Liability Relief and Brownfields Revitalization Act

RSMo 260.435 through 260.480

Abandoned or Uncontrolled Sites (Registry)

RSMo 260.565 through 260.609 and RSMo 447.700 through 447.708

Voluntary Remediation including Brownfields

RSMo 260.900 through 260.965

Drycleaner Remediation

RSMo 319.100 through 319.139

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

4. Is this a federally mandated program? If yes, please explain.

Through delegation from, and agreements with, the federal Environmental Protection Agency, the Hazardous Waste Program supports the federal Resource Conservation and Recovery Act (RCRA), as well as Section 9004 of the Solid Waste Disposal Act as amended by RCRA, the Superfund Amendments and Reauthorization Act of 1986, and 40 CFR Part 281. In addition, work performed under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), as well as cleanup oversight at Federal Facilities sites, is mandated by the federal government.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Natural Resources Protection Fund - Damages Subaccount (0555); Solid Waste Management Fund (0570); Underground Storage Tank Regulation Program Fund (0586); Environmental Radiation Monitoring Fund (0656); Hazardous Waste Fund (0676); and Dry-Cleaning Environmental Response Trust Fund (0898).

PROGRAM DESCRIPTION

Reporting trends of Hazardous Waste Facilities indicate that the number of regulated facilities will continue to decline in future years, largely due to changes in facility processes that result in less reportable waste being generated. In FY2009 and FY2010, Hazardous Waste EAVs continued to be performed for newly registered generators and sites where management or procedures changed. In FY2009, Tank EAVs were higher than normal due to staff visits to new tank installations in an effort to prevent future violations. The majority of Compliance Assistance Visits and Inspections are done by the Regional Offices. MDNR conducts inspections of PCB facilities, but LOWs and NOVs are issued by EPA. UST LOW and NOV numbers have been updated to reflect LOWs and NOVs issued in subsequent fiscal years for previous year's inspections. Due to compliance outreach efforts, UST NOVs are not often issued in the same year the inspection is conducted. FY 2010 UST inspection followup has not been completed at this time. True percentages of Inspections not resulting in NOV issuance cannot be determined until all inspection reviews are completed in the early part of calendar year 2011. Hazardous Waste NOVs does not include Hazardous Waste Generator Registration NOVs. The FY 2010 Generator Registration/Billing and associated NOVs will be processed in the early part of calendar year 2011.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7a. Provide an effectiveness measure (continued).

Compliance Rate of Inspected Facilities

FY 2010 inspection followup not yet completed. True percentage of Inspections Not Resulting in NOV Issuance cannot be determined until all inspection reviews are completed.

Cumulative Cleanups Completed for Aboveground and Underground Petroleum Storage Tank Sites

"Cleanup" includes sites where contamination remains in place with appropriate engineering or institutional controls.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7a. Provide an effectiveness measure (continued).

**Projected Drycleaner Sites Cleaned Up and Cost Reimbursed
Over Life of Program**

Total Potentially Contaminated Sites as of FY 2010 = 864

- Applications Received - Cumulative
- DERT Cleanups Completed - Cumulative
- Reimbursements Completed from Fund - Cumulative (including those closed under BVCP)

**Drycleaner Site Cleanup Reimbursements Potentially
Funded by the DERT Fund**

Total Known Drycleaner Universe = 1,152

The State Coalition for Remediation of Drycleaners estimates that 75% of drycleaners are potentially contaminated. At the end of FY 2010, the known universe of abandoned and active drycleaners in Missouri was 1,152. In FY 2007 three sites that had been cleaned up through Voluntary Cleanup applied for reimbursement only. Completion of reimbursement lags behind cleanup due to site prioritization and is based on receipt of completed claim requests. Based on claims filed thus far, the total average assessment/cleanup cost per site is \$139,163. Over the life of the fund, we could support reimbursement of cleanup costs for 25 sites. Even if the average cleanup cost per site were to decline over time, the fund cannot support reimbursement of cleanup costs for the estimated 864 potentially contaminated dry cleaning sites in Missouri. *The fund sunsets in 2012 (FY 2013).

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7a. Provide an effectiveness measure (continued).

Notes: (1) Data gathered from a one-time controlled study performed by the Department of Health and Senior Services. (2) Data from voluntary blood screening at St. Francois County Health Department. (3) Data from 2008 county average from mandatory reporting of lead screening. The department continues to be actively involved in the cleanup of lead sites in Missouri.

Brownfields Voluntary Cleanup Program Environmental Assessments Completed

The Brownfields Voluntary Cleanup Program provides resources to local communities to perform environmental assessments on selected sites. Through an application process, sites are selected for a Phase I/Phase II environmental site assessment to be performed by an independent contractor. Additional assessment is performed by an independent contractor when the results of these assessments show that limited additional assessment work would provide information to accelerate the remediation process. These activities provide communities the assistance to begin redevelopment efforts.

*In FY 2008, 2009 and 2010 two applicants had large numbers of individual properties for site assessment. In addition, based on EPA guidance, reporting was revised to reflect each property as opposed to each applicant, resulting in an increase in the number of assessments completed. We do not anticipate this type of large multi-site application in future years.

Federal Brownfields 128(a) funding through the U. S. Environmental Protection Agency is limited to \$50 million per year. For the past 5 years, Missouri's share of funding has fared well compared to other states, averaging \$1.2 million per year. However, as more states and tribes are applying for these funds each year, available funding is allocated over a broader base of applicants and Missouri's award amount is expected to decline.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7b. Provide an efficiency measure.

The department and EPA must carefully review every detail of the permit application submitted by the facility. This technical review almost always requires lengthy technical comments from the permit writer, revisions by the facility and always involves public involvement at various stages of the process. As a result, to be protective of human health and the environment, adequate review and revision of an application may take years and requires a great deal of coordination between the department, EPA and the facility. If approved by both the department and EPA, the permit is good for up to 10 years. For more information on the RCRA permitting process see the department's website at <http://www.dnr.mo.gov/env/hwp/commission/commis.htm>

The total universe of Federal Facility Sites is 285.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7b. Provide an efficiency measure (continued).

Petroleum Storage Tank Sites Remediation Time to Completion

The department implemented the risk based corrective action guidance standards in February 2004. The economic situation slowed the cleanup processing time somewhat in FY 2008. In addition, the department has been developing the Missouri Risk Based Corrective Action (MRBCA) guidelines. This MRBCA guidance and subsequent development of the regulation has slowed the final clean up of tank sites seeking a clean or no further action letter. This is a result of a number of factors to include: work to finalize the guidance and regulation documents; educating DNR staff, tank owners and consultants of the best and proper way to work with the MRBCA requirements; and that MRBCA takes more effort in the initial stages of the clean up (site characterization and sampling) efforts. Once the rules are implemented we anticipate this process will be much smoother, resulting in shorter timeframes for completion.

Average Drycleaner Site Cleanup Cost at End of FY 2010	
	Cost Per Cleanup
Other States	\$216,900
Missouri	\$139,163

There are currently 21 sites enrolled in the fund. Due to the conservativeness of the state's reimbursement structure and standardized cleanup levels implemented by the state's risk based cleanup levels, Missouri's cleanup cost per site is lower than in other states in the State Coalition for Remediation of Drycleaners (based on an August 2007 SCRD papers). The total average cleanup cost for Missouri sites is \$139,163 based on cleanup of 12 sites from 2000 through 2010 (5 sites cleaned up under Brownfields Voluntary Cleanup Program (BVCP) oversight and 7 sites under DERT oversight). The average cleanup cost per site for other state drycleaning programs is \$216,900. Reimbursements to drycleaners for cleanup costs can span multiple fiscal years.

Mercury Recycling Drop Off Sites Statewide

In April 2009, the HWP and ESP commenced a program to remove elemental mercury and mercury contaminated debris from the public. The department conducted a mercury thermostat-recycling program and an active statewide mercury drop-off program open to all Missouri citizens. The mercury is then recycled or disposed of in an environmentally responsible manner.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Hazardous Waste Program

Program is found in the following core budget(s): Hazardous Waste Program

7c. Provide the number of clients/individuals served (if applicable)(continued).

Each dot represents one site in Missouri where cleanup is occurring and where this Hazardous Substance PSD appropriation might be used (Superfund, BVCP, and Federal Facilities sites); each site impacts many Missourians.

The Missouri Department of Natural Resources, under a Cooperative Agreement with the U.S. Environmental Protection Agency (EPA), conducts Brownfields Site-Specific Assessments (BSSA) of properties for public entities such as cities, counties and quasi governmental entities, as well as properties owned by not-for-profit organizations across the state. Often, local governments acquire contaminated properties through foreclosure for back taxes, land donations, or may own property they would like to sell for redevelopment purposes.

These entities sometimes have difficulty finding adequate funding to pay for environmental assessments (all appropriate inquiries, Phase I and Phase II Assessments) prior to redevelopment. The Brownfields Site-Specific Assessment program provides funding and technical assistance to help communities in assessing properties. Often, it is the unknown environmental condition of the property that dissuades developers. Brownfields Site-Specific Assessment provides valuable information that can aid in making decisions regarding the future of the property.

The Department of Natural Resources works cooperatively with EPA to cleanup contamination at Superfund sites where there are limited responsible parties. The state is obligated to pay for 10% of the EPA total cleanup costs and 100% of on-going operation and maintenance of the remedy at these sites. Examples include:
 Cleanup of lead mine and mill waste at Jasper County Operable Unit 1(OU1)
 Operation and maintenance at Annapolis Lead mine site in Iron County
 Cleanup of lead-contaminated soils in residential yards at Madison County OU 3

7d. Provide a customer satisfaction measure, if available.

FTE 0.00 0.00 0.00 0.00

Est. Fringe 0 0 0 0

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Postclosure Fund (0198); Solid Waste Management Fund - Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570)

Core Reduction: The FY 2012 budget request includes a core reduction of \$491 General Revenue Expense and Equipment authority from the Solid Waste Forfeitures PSD appropriation.

Request retention of the existing estimated appropriations for General Revenue and Other Funds pass through appropriations to allow for expenditures related to needed maintenance on landfills where financial assurance instruments have been forfeited and deposited in either the General Revenue Fund or Post-Closure Fund; and to allow expenditures related to solid waste management districts and scrap tire grants (Other Funds).

Note: This core budget is facing fiscal challenges.

2. CORE DESCRIPTION

The Solid Waste Management Program operates a federally authorized regulatory program pursuant to 40 CFR Part 258, Subpart D that permits, enforces, and oversees sanitary landfills. These same types of activities are performed by the program for processing facilities, such as transfer stations, infectious waste, and material recovery facilities, as set forth in the Solid Waste Management Law. Program staff conducts civil investigations of illegal dumping; offers landfill operator certification and re-certification training; and investigates possible migration of methane gas from solid waste disposal areas and seepage of leachate and methane gas into groundwater. The Scrap Tire Unit plans and oversees scrap tire dump cleanup activities; awards scrap tire material resurfacing grants; conducts scrap tire dump investigations; reviews scrap tire hauler, processor, and site permits; and provides technical assistance for beneficial use determinations. The program, working with a statewide network of partners, strives to protect the environment and public health by minimizing solid waste generated by Missouri citizens, businesses, and institutions and by advancing the effective and economic use of waste materials. This is accomplished through oversight of the twenty (20) solid waste management districts and the district grant program.

CORE DECISION ITEM

Department of Natural Resources

Budget Unit 78875C, 79340C, 79455C

Division of Environmental Quality

Solid Waste Management Program Core

2. CORE DESCRIPTION (continued)

Solid Waste Management PSD: The program provides approximately \$7.5 million per year to the solid waste management districts for administration and funding of community-based reduce, reuse, and recycle grants. This grant program builds solid waste management infrastructure to better use waste materials that otherwise would have been disposed of in landfills or illegally dumped. Through projects funded by the district grant program, opportunities are provided to communities throughout Missouri to create and/or retain "green jobs" in the recycling sector of the Missouri economy. These grants encourage waste reduction, reuse, recycling, energy recovery and efficient processing of Missouri's solid wastes. Local governments, small and large businesses, schools, sheltered workshops and individuals seek and receive grants to support activities to remove materials from the waste stream and return the materials for beneficial reuse or energy recovery. The program also supports the removal of illegally dumped scrap tires from the environment by directly providing funds for tire dump roundups and other cleanup activities, as well as funding scrap tire material surfacing grants.

Financial assurance instruments (FAIs) PSD: FAIs are collateral provided to the state by landfill and scrap tire site owners/operators to properly implement closure and/or postclosure activities should the owner/operator fail to do so or is no longer capable of doing so. Sufficient financial assurance is needed to ensure closure and/or post-closure activities for solid waste facilities are conducted when needed to protect public health and the environment. This involves activities required to ensure closed landfills have adequate funding and controls in place to ensure environmental protection for at least 30 years after the landfill closes. Such activities include: maintenance or replacement of the landfill cover, which costs several thousands of dollars per acre; an adequate soil/vegetative cap to prevent water infiltration; methane gas monitoring to protect public safety; monitoring for potential groundwater and surface water impacts; and groundskeeping (i.e., mowing and erosion control).

3. PROGRAM LISTING (list programs included in this core funding)

Solid Waste Management Program

CORE DECISION ITEM

Department of Natural Resources
Division of Environmental Quality
Solid Waste Management Program Core

Budget Unit 78875C, 79340C, 79455C

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.	
Appropriation (All Funds) (1)	22,268,615	21,534,485	18,739,828	10,062,583	E
Less Reverted (All Funds)	0	0	0	N/A	
Budget Authority (All Funds)	22,268,615	21,534,485	18,739,828	N/A	
Actual Expenditures (All Funds)	11,925,155	12,359,273	10,724,819	N/A	
Unexpended (All Funds)	10,343,460	9,175,212	8,015,009	N/A	
Unexpended, by Fund:					
General Revenue	70,206	39,019	8,446	N/A	
Federal	200	200	200	N/A	
Other	10,273,054	9,135,993	8,006,363	N/A	
	(3 & 4)	(3 & 4)	(3 & 4)	(2)	

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) The FY 2011 PSD core appropriations include: \$6,300,000 "E" for solid waste activities from the Solid Waste Management Fund (0570); \$1,250,000 "E" for scrap tire activities from the SWMF-Scrap Tire Subaccount (0569); \$17,304 "E" for forfeited Financial Assurance Instrument Funds and accrued interest held as required by 260.228 RSMo in the State General Revenue fund (0101); and \$141,599 "E" for forfeited Financial Assurance Instrument Funds and accrued interest held in the Postclosure Fund (0198) to allow for expenditures that may be ongoing over a 30-year period for each of the specified facilities.

(3) The vast majority of other fund lapse is related to the Solid Waste and Financial Assurance Instruments PSDs. Estimated appropriations are increased throughout each fiscal year as solid waste management districts' allocation amounts become known and remittable; scrap tire activities are awarded and completed; and work is awarded and completed on landfills where the program has forfeited financial assurance instrument funds available for payment. Funds obligated for multi-year projects roll over to the next fiscal year's core appropriation, resulting in large unexpended balances.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

1. What does this program do?

The Solid Waste Management Program, through our oversight of solid waste facilities, ensures groundwater remains safe and clean and that land is restored to a community friendly state. To assist in producing these desired outcomes, the program operates a federally authorized regulatory program (40 CFR Part 258, Subpart D) overseeing solid waste facilities and their operations and administers the solid waste management district grant program and scrap tire program.

The Solid Waste Management Program:

- Permits, inspects, and provides technical assistance to solid waste facilities (e.g., landfills, transfer stations including infectious waste and material recovery facilities, and scrap tire facilities) to help ensure they are designed and operated to protect public health, safety, and the environment, and enforces solid waste laws and regulations.

- Provides landfill operator certification and recertification training.

- Reviews and acts upon requests for beneficial use of waste materials, permit exemptions, and composting facilities.

- Consults with the community on solid waste decisions.

- Provides grant funding to solid waste management districts to fund their operations and community-based waste reuse, reduction and recycling projects.

- Reviews, evaluates, and approves district grants and provides training for the solid waste district executive board and staff, as needed.

- Monitors progress of grant projects and provides technical assistance to districts or district subgrantees, as needed.

- Conducts performance audits (via independent contractors) for each of the solid waste districts every three years, subject to the availability of resources, to ensure compliance with laws and regulations.

- Promotes recycling and alternatives to disposal by developing guidance materials, conducting outreach efforts, and providing technical assistance.

- Encourages use of scrap tire materials and expansion of end markets for such materials and products.

- Investigates and pursues the cleanup of illegal dumps.

- Develops, maintains and updates a statewide solid waste plan, including data on types of wastes and information on innovative technologies.

- Plans and oversees scrap tire dump cleanup activities; awards scrap tire playground resurfacing grants; conducts scrap tire dump investigations; reviews scrap tire hauler, processor, and site permits; and provides technical assistance for scrap tire beneficial use determinations.

During 2009, Missourians generated over 12.7 million tons of waste. It is estimated that 53% of this waste was diverted and put to good use. Since 1990, the diversion percentage has increased from 10% to 53%, due in part to a greater number of recycling and yard waste services being available and continued development of markets for recovered materials. More Missourians now have recycling and composting services in their communities, providing the public a convenient and affordable alternative to disposal.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

1. What does this program do (continued)?

Solid Waste Management PSD: The program directly funds a number of scrap tire surface material grants, is planning to provide grants to individuals and businesses investing in market development for scrap tire end uses, and administers and pays for disposal of scrap tires cleaned up from the environment. This appropriation funds the Environmental Improvement and Energy Resources Authority's (EIERA's) Market Development Program, which funds financial and technical assistance grants for development of markets for recovered materials. Additionally, the program provides grant funding to Missouri's twenty (20) solid waste management districts to fund their operations and community-based waste reuse, reduction, composting, market development, and recycling projects.

Forfeited Financial Assurance Instruments (FAIs) PSD: The program receives forfeited FAI resources to perform closure/postclosure maintenance and repair activities at landfills and scrap tire sites where owners/operators have failed or are no longer capable of meeting their obligations. The dollar value accessible by the state (and not currently forfeited) is more than \$290 million. Types of FAIs subject to forfeiture are irrevocable escrow accounts, trust funds, performance or financial surety bonds, letters of credit, contracts of obligation/ordinances/resolutions, financial tests, corporate guarantees or a combination. Forfeited funds are deposited into the General Revenue Fund pursuant to 260.228 RSMO and may be appropriated and expended by the program to implement closure and/or postclosure maintenance care plans. A Consent Judgment and Order of the Circuit Court of Warren County decreed specific facilities forfeited FAIs were to be placed in an interest-bearing account identified as the "Postclosure Fund" (0198). Only the expenses relating to closure and postclosure at these specific facilities are paid from these funds. Upon conclusion of the postclosure period, any funds remaining in the Postclosure Fund (0198) and, so designated, are to be paid to the "Treasurer of Warren County as Custodian of the Warren County School Fund."

The program knows of approximately 250 closed and/or abandoned landfills in Missouri that do not have FAIs since they were in operation prior to the effective date of the requirement. The total universe of these landfills is unknown. Any current or potential negative environmental impacts from these old landfills, such as gas migration presenting a threat to public safety or groundwater contamination, are unknown. During State Fiscal Year 2011 and 2012, the program through a USDA, Rural Development Utilities Program Grant is assessing the condition of old, closed and abandoned solid waste disposal areas, or landfills in rural Missouri and working with landfill owners and counties to better manage these facilities.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number if applicable.)

42 U.S.C. 6901-6991k	Solid Waste Disposal/Resource Conservation and Recovery Act and Major Amendments
40 CFR Part 258	Criteria for Municipal Solid Waste Landfills
40 CFR Part 258, Subpart G	Financial Assurance Criteria
260.200 through 260.345 RSMo	Solid Waste Management Law
260.226 - 260.228, RSMo	Landfill Closure/Postclosure Plan
260.275 RSMo	Scrap Tire Site Closure Plan

3. Are there federal matching requirements? If yes, please explain.

Solid Waste Disposal Areas 20% State (USDA)

4. Is this a federally mandated program? If yes, please explain.

Although not mandated, federal regulations strongly encourage each state to adopt Resource Conservation and Recovery Act (RCRA), Subtitle D. The program currently has EPA approval to implement Subtitle D landfill regulations under the federal RCRA, thereby having the authority to approve new landfills and expansion of existing landfills.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Postclosure Fund (0198); Solid Waste Management Fund - Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570)

* Non permitted entities include illegal dumps, scrap tire retailers/haulers, etc.

Inspections and EAVs are done by the regional offices. Inspections and EAVs of non permitted entities are primarily compliance driven, thus the fluctuation from one year to the next. In January 2010, the number of inspections increased as a result of the renewal of the scrap tire fee and an increased focus on inspections at retail facilities. FY 2008 settlements for non permitted entities were higher than routine as the program closed out a number of old cases.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7a. Provide an effectiveness measure (continued).

Compliance Monitoring Activities

Percentage of Solid Waste Facilities with FAI's in Compliance

Number of facilities that have forfeited Financial Assurance Instruments		
	Cumulative	
	Projected	Actual
FY 2008	11	11
FY 2009	11	11
FY 2010	12	12
FY 2011	12	N/A
FY 2012	12	N/A
FY 2013	12	N/A

Number of facilities includes scrap tire processing facilities, sanitary and demolition landfills, and scrap tire facilities. Solid waste transfer stations are not required to have FAI's. The postclosure period for landfills is a minimum of 30 years.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7a. Provide an effectiveness measure (continued).

Percentage of solid waste generated by Missourians that is reused, recycled or composted

In 1990, the passage of SB 530, Section 260.225.2(1), set a Department goal to achieve by January 1998 a reduction of 40% in solid waste disposed by weight. This goal has been surpassed. The 2009 rate was 53%, up 4% from 2008. The Department assumes the lack of growth in the overall national economy and increase in single stream recycling has contributed to the decline in disposal at Missouri landfills from 2008 and continuing through 2010. The Department has assumed the total waste generated and diverted will remain relatively constant in the short term.

The Department tracks the annual diversion rate of all waste disposed of in Missouri landfills or transported to landfills in adjacent states. It is estimated that about 58% of the waste stream is composed of Municipal Solid Waste (MSW), waste generated by residences, schools, small businesses and other commercial activities. The U.S. Environmental Protection Agency (EPA) set a national MSW recycling goal of 35% by 2008. However, Missouri's waste diversion rate does not directly correlate with an MSW recycling rate since it measures all waste diverted, not just MSW. The most recent "State of Garbage in America" survey conducted by Biocycle Magazine in 2008 (using 2006 data when available) attempted to standardize data from each of the fifty states. In the Biocycle report, Missouri's estimated MSW recycled for 2006 was 40 percent. Using this reference as a measure against other states, Missouri ranked twelfth in percent of MSW recycled and surpassed the EPA goal.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7a. Provide an effectiveness measure (continued).

The Department of Corrections, Missouri Vocational Enterprises (MVE) works with the Solid Waste Management Program to dispose of scrap tires by providing labor and transportation services. The Department reimburses MVE for the cost of their services through this pass-through appropriation.

Since 1990, the Scrap Tire Program has removed 15,846,032 tires from Missouri's landscape. Scrap tires yet to be removed from the environment are an estimate of the projected number of scrap tires at both known sites and sites yet to be identified. As of June 2010, approximately 345,065 tires are known to remain in 186 scrap tire sites. The Department estimates an additional 500,000 scrap tires will be discovered in currently unknown locations during FY 2011, of which, 300,000 are estimated to be cleaned up that year. In FY 2008, smaller dumps with fewer tires were cleaned up resulting in additional travel and labor as tires were scattered and not contained in large piles. Since the initiation of the Tire Dump Roundup Program in November 2006, the rate of cleanup has roughly been the same as new sites identified and number of tires discovered. We estimate approximately 250,000 tires will continue to be illegally dumped annually. We assume the Department will have access to the sites, although in some cases, litigation may be required to gain access to the sites.

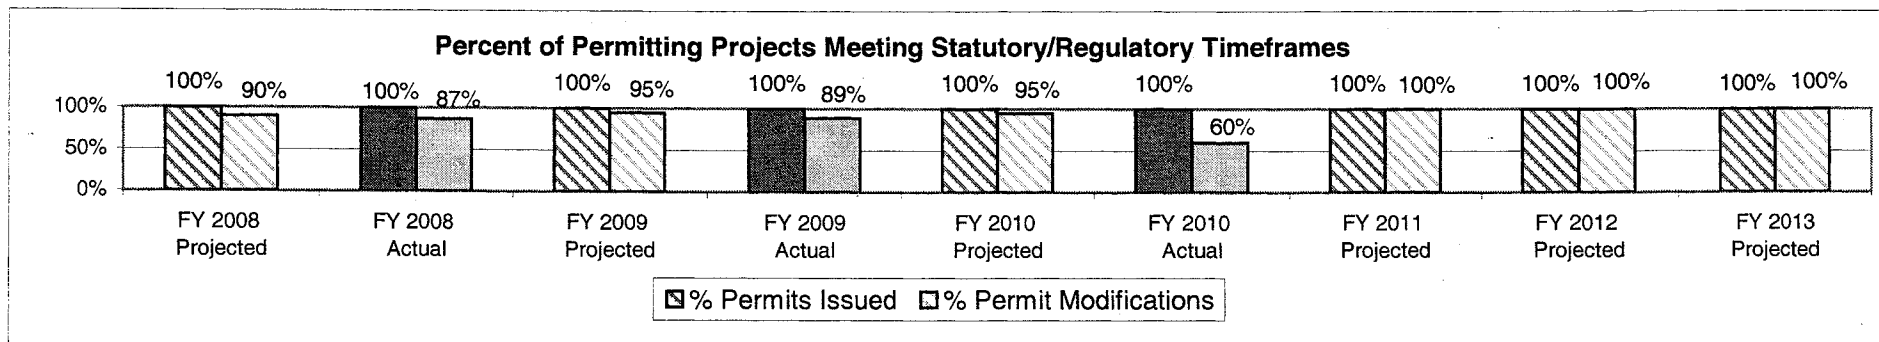

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7b. Provide an efficiency measure.

This measure only includes the number of solid waste permits issued and the number of permit modifications. It does not include other permitting activities that do not have statutory timeframes. Individual projects can take as little as a few hours, or as much as a year or more depending upon the nature of the request.

Notes: Sites having larger numbers of scrap tires are less costly per tire cleaned up than sites with fewer scrap tires, or smaller sites that are spread across larger areas. Projections for FY 2011 and FY 2012 are based on estimates of newly located (although not investigated) tire dumps, unknown tire dumps and the historical underestimation of the number of tires at known sites. As of June 2010, approximately 345,065 tires are known to remain in 186 scrap tire sites. The Department estimates an additional 500,000 scrap tires will be discovered in FY 2011. Of these, 300,000 are estimated as being cleaned up in FY 2011. However, based on past data, it is anticipated that approximately 250,000 scrap tires per year will continue to be illegally dumped, found by the Department, and require ongoing efforts to keep tires out of illegal dump sites.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7b. Provide an efficiency measure (continued).

The Department provides grant funding to Missouri's twenty (20) solid waste management districts to fund their operations and community-based waste reuse, reduction, composting, and recycling projects. Local governments, small and large businesses, schools, sheltered workshops, and individuals seek and receive grants to support activities to remove materials from the waste stream and return them for beneficial reuse. This is a new measure, therefore projections are not available prior to FY 2011.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Solid Waste Management Program

Program is found in the following core budget(s): Solid Waste Management Program

7b. Provide an efficiency measure (continued).

Number of Performance Audits Conducted

With passage of Senate Bill 225 in 2005, the Solid Waste Management Law began requiring the Solid Waste Management Program to have performance audits of the twenty Solid Waste Management Districts completed at least every three years as funding allows. The purpose of the audits is to determine whether the solid waste management districts exercise adequate control over district grant funds and comply with state regulations governing the use of such funds. All twenty districts have now had a performance audit completed. The performance audits have identified \$768,333 in questioned costs and a total of 270 findings. The program has been working closely with the districts as they take corrective action related to these findings. One follow up audit was conducted during FY 2010. The follow-up audit identified 12 findings in the following areas:

- Failure to properly organize or maintain documentation (management structure/composition of board/adopt or update bylaws/failure to meet, etc) - 2

- Failure to comply with provisions of the Missouri open meetings law (Sunshine Law) or meetings held without a quorum - 1

- Inadequate internal controls - 2

- Failure to comply with administration/management practices - 1

- Failure to comply with general and special terms and conditions - 2

- Failure to adequately monitor subgrantees and comply with grant reporting requirements - 4

During FY 2011, the program will continue to work closely with the districts to assist them in returning to compliance. Two audits are planned in FY 2011.

Chapter 260 provides for performance audits to be conducted every three years as funding is available.

Missouri's Solid Waste Stream

Waste characterization studies are key planning tools, particularly for determining areas of the waste stream which need additional focus to reduce the amount of a specific sector of waste being disposed. The Solid Waste Management Program (SWMP) funded several waste characterization studies, the most recent of which was conducted in 2008. This study visually observed waste being disposed at 15 landfills and transfer stations across Missouri. Based on this recent study, approximately 58% of Missouri's solid waste is created by homes and businesses, 11% from industry, 15% from construction and demolition, and 16% from other sources. The waste characterization study assists the Department and the Solid Waste Management Districts in determining what sectors of the waste stream they can apply resources to most effectively in order to reduce the waste stream and increase diversion.

(see solid waste stream component parts on following page)

**Completed Scrap Tire Clean-Up Sites by County
Cumulative (1990-Present)**

954 Scrap Tire Dump cleanups have been completed since the beginning of the program in 1990.

15,846,032 tires have been removed from the state's environment as of June 30, 2010.

The U.S. Environmental Protection Agency estimates that one tire per individual is generated each year. Therefore, we estimate approximately 5.9 million tires are generated on Missouri each year.

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Metallic Minerals Waste Management (0575); Coal Mine Land Reclamation (0684); Mined Land Reclamation (0906)

Core Reallocation: The FY2012 PSD request includes a core reallocation of \$1 million from the Bond Forfeitures PSD to the Abandoned Mine Lands PSD.

Note: Request retention of existing estimated appropriation for the Federal Funds pass through appropriation.

2. CORE DESCRIPTION

The Land Reclamation Program regulates surface mining of coal and industrial minerals, reclamation of coal mine and industrial mineral lands on which bonds were forfeited, administers reclamation of coal mine lands abandoned prior to 1977, and regulates the metallic mineral waste disposal areas of mining operations.

Land Reclamation PSD: The program oversees the reclamation of abandoned mine sites in Missouri. This includes sites abandoned prior to the law (1977) and sites where permits were revoked and reclamation bonds were collected.

For coal sites abandoned prior to 1977, the program has access to federal funds to directly contract for the reclamation activities at these sites. This program is known as the Abandoned Mine Lands (AML) program. The Office of Surface Mining, US Department of Interior provides the grant for the AML program.

Where bonds have been forfeited on permit-revoked mine sites, the Mined Land Reclamation Fund (MLRF) and Coal Mined Land Reclamation Fund (CMLRF) PSD's provide the appropriation authority for reclamation of these bond forfeited sites. Reclamation involves work to restore mined lands to productive uses such as agriculture, wildlife or development. The program may collect the reclamation bonds and directly contract for the reclamation activities, or the program may allow the surety bond holder to perform the reclamation in the place of the original permit holder.

Unexpended (All Funds)	3,286,575	3,685,414	3,430,453	N/A	
Unexpended, by Fund:					
General Revenue	0	0	0	N/A	
Federal	1,027,332	1,310,349	994,023	N/A	
Other	2,259,243	2,375,065	2,436,430	N/A	
	(2, 3, 4)	(2, 3, 4)	(2, 3, 4)	(5)	

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) Operating (PS and E&E) lapses relate to vacancies and reduction of other expenditures to mitigate future funding concerns of the program.

(3) We lost the coal regulatory program in FY 2004 due to the reduction of general revenue matching funds. Without a coal program, Missouri was not eligible to receive federal AML funds for FY 2004, FY 2005, and part of FY 2006. AML funds were restored in February of 2006 when Missouri regained primacy to operate the coal program. Beginning in FY 2005, no General Revenue remains in the Land Reclamation Program Budget.

CORE DECISION ITEM

Department of Natural Resources	Budget Unit <u>78880C, 79465C</u>
Division of Environmental Quality	
Land Reclamation Program Core	

4. FINANCIAL HISTORY (continued)

(4) The vast majority of federal and other funds lapses are attributed to the PSD appropriations. Abandoned Mine Land grants are three year grants. Appropriations are set to allow the department to encumber all contracts in place at any one time even though expenditures could occur over a three year period.

(5) FY 2011 PSD appropriations include: \$2,250,000 for Land Reclamation Bond Forfeitures, \$1,750,000 for Abandoned Mine Land Reclamation and \$50,000 for the Small Operator Assistance Program.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

1. What does this program do?

For coal and industrial minerals (barite, tar sands, clay, limestone, sand and gravel, granite, trap rock, etc.), the Land Reclamation Program ensures that all exploration and surface mining operations are conducted in a manner that will not be detrimental to public health or safety, or cause environmental pollution. Quarries and coal mines create concern related to blasting and truck traffic, noise, hours of operation, and water runoff. Gravel mines create concern due to the impacts to Missouri streams and farmlands. Many of these concerns can be addressed through public meetings allowing an exchange of information, public hearings, or permit conditions. The program issues permits and conducts inspections for all surface mining operations, reclamation of coal mine and industrial mineral lands on which bonds were forfeited, and administers reclamation of coal mine lands abandoned prior to 1977.

To receive a land reclamation permit, mining companies are required to obtain bonds to ensure land is restored to safe and productive use. Companies that cannot complete reclamation themselves must forfeit their bonds, making these bonds available to Missouri to pay for reclamation. Bond Forfeitures occur when inspections revealing violations result in various actions depending on the degree of danger to public health and safety or the environment. These actions generally begin with informal compliance assistance efforts but may lead to formal enforcement and permit revocation and bond forfeiture by the Land Reclamation Commission. The program reclaims lands where the mining company has defaulted their responsibility with the company's forfeited reclamation bonds. Currently there are 9 sites that have forfeited bonds with 2,126.5 acres remaining to be reclaimed. The program may collect the reclamation bonds and directly contract for the reclamation activities, or the program may allow the surety bond provider to perform the reclamation in the place of the original permittee. When the surety bond provider performs the reclamation, the program provides inspection and oversight to ensure the work is properly completed. All reclamation work must follow state and federal laws and regulations.

The abandoned mined land (AML) staff oversee the reclamation of abandoned mine sites in Missouri and has restored 4,248 acres of formerly mined lands to productive use. This includes closing dangerous mine shafts, removing trash dumps, extinguishing mine fires, eliminating dangerous high walls, improving stream miles, and stabilizing subsiding ground beneath homes and roads. The program is required to reclaim the highest priority abandoned coal mine sites before addressing problems created by mining other commodities. (The program also administers the AML Emergency Program to reduce or control emergency situations in which adverse effects of past coal mining pose an immediate danger to public health (i.e. an improperly closed mine shaft subsiding and creating a dangerous vertical opening in a residential area).

Metallic minerals staff implement the Metallic Minerals Waste Management Act (lead, iron, zinc, copper, gold and silver), which only regulates the metallic mineral waste disposal areas of mining operations. Missouri has the largest lead mining district in the U.S. The key issue for our state is to ensure that these areas are properly reclaimed. The program confers with environmental programs to ensure that all appropriate environmental laws are met in the construction and reclamation of these waste disposal areas.

Land Reclamation PSD: Allows the program to contract with engineering, excavating, and construction companies to reclaim AML and Bond Forfeiture sites. There are still over 80 eligible AML problem areas consisting of 8,117 acres with public health and safety problems that must be addressed. The estimated cost for reclamation at these sites is \$43.9 million. Problem areas are added to the inventory as identified.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

1. What does this program do (continued)?

Land Reclamation Program - Reconciliation					
	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
	Actual	Actual	Actual	Current	Request
Land Reclamation Operations (78880C)	1,062,386	1,149,239	1,011,093	1,391,264	1,391,264
Land Reclamation PSD (79465C)	903,401	576,592	999,718	4,050,000	4,050,000
Total	1,965,787	1,725,831	2,010,811	5,441,264	5,441,264

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 444.350 through 444.380	Metallic Minerals
RSMo 444.500 through 444.755	Strip Mining
RSMo 444.760 through 444.790	Industrial Minerals
RSMo 444.800 through 444.970 and 30 CFR Part 700.01 through 955.17	Coal, Bond Forfeiture and Abandoned Mine Lands

3. Are there federal matching requirements? If yes, please explain.

Coal Administration and Enforcement Grant	50% Federal (OSM)
Abandoned Mine Lands Grant	100% Federal (OSM)

4. Is this a federally mandated program? If yes, please explain.

The state has federal delegation to operate the coal regulatory, abandoned mine lands and coal bond forfeiture programs.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass-through appropriations. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other " funds?

Metallic Minerals Waste Management (0575); Coal Mine Land Reclamation (0684); Mined Land Reclamation (0906)

7a. Provide an effectiveness measure.

Most of the mined acres were affected prior to regulation. Of these acres about 67,000 were from coal mining and could be reclaimed through the federal Abandoned Mine Lands (AML) program. Coal mined areas are prioritized using the Office of Surface Mining priority ranking which considers health, public safety and environmental impacts of a site. Federal AML funds are currently limited to approximately \$2.5 million annually, but will increase to \$3 million in FY 2013.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7a. Provide an effectiveness measure (continued).

Acres of mined land reclaimed since the passage of mining laws (industrial minerals and coal began in 1972; metallic minerals in 1991)

**Regulated Reclamation By Commodity
(cumulative)**

Metallic minerals permits are issued for the life of the operation. Since most of these sites are still operating, a limited amount of reclamation has occurred. About 60% of all industrial minerals and coal acres have already been reclaimed. This chart only shows the acres impacted since the passage of mining laws and reflects the reclamation by type of mining activity.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7a. Provide an effectiveness measure (continued).

Compliance Monitoring Activities

	FY 2008 Actual			FY 2009 Actual			FY 2010 Actual		
	IM	MM	Coal	IM	MM	Coal	IM	MM	Coal
Regulated Facilities	778	11	7	828	11	6	845	11	5
Inspections	314	11	122	610	17	130	553	22	74

Notices of Violation	4	0	0	5	0	0	4	0	0
Settlements	1	0	0	0	0	0	0	0	0
Referrals	2	0	0	2	0	0	0	0	0

	FY 2011 Projected			FY 2012 Projected			FY 2013 Projected		
	IM	MM	Coal	IM	MM	Coal	IM	MM	Coal
Regulated Facilities	850	11	5	850	11	5	850	11	4
Inspections	550	22	60	550	22	60	560	22	60
Letters of Warning	47	4	0	47	4	0	47	4	0
Notices of Violation	3	0	0	3	0	0	3	0	0
Settlements	1	0	0	1	0	0	1	0	0
Referrals	1	0	0	1	0	0	1	0	0

IM = Industrial Minerals

MM = Metallic Minerals

Inspections are done by the Land Reclamation Program. FY 2009 inspections were higher than previous years due to the program being fully staffed; we expect future inspections to level out.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7a. Provide an effectiveness measure (continued).

Compliance Rate of Inspected Facilities

Coal Bond Forfeiture Acres Remaining to be Reclaimed

The program is on an aggressive schedule to reclaim old bond-forfeited coal mine lands. This was a new measures in FY 2009, therefore prior year projected data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7b. Provide an efficiency measure.

AML Program Design Work vs. Estimated Consultant Costs

FY 2011 design work is expected to increase from \$1.5 million minimum state funding to approximately \$1.8 million in FY2009-2010, \$2.3 million in FY 2011-2012, to \$3 million for FY 2013 and beyond. Reduced design work as a result of completed Land Reclamation Program bond forfeiture work will be shifted to AML design work.

The program issues almost 350 permits annually covering about 850 mining sites.

Days to Issue Quarry Permits

RSMo 444.772 to 444.773 requires a minimum 60 day public comment period for new permits and expansions. If public meetings and hearings are held, substantially more than 60 days are needed to satisfy the law and the rights of those requesting the meetings. Therefore new permits and expansions will always be a lengthy process under this law, and this time frame is beyond the control of the agency. Permit renewals are issued when the operator has filed a complete application.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Land Reclamation Program

Program is found in the following core budget(s): Land Reclamation Program

7c. Provide the number of clients/individuals served (if applicable)

Industrial Minerals (Quarries and Gravel Mines)	
845 Sites @ an estimated 45 people per site	38,025
346 Permits @ 1 company per permit	346
Total Clients Served	38,371

Coal (Active and Bond Forfeiture Sites)	
13 Sites an estimated 45 people per site	585
Total Clients Served	585

Metallic Minerals (Lead Mines)	
The residents of four counties in Southeast Missouri: Iron, Jefferson, Reynolds and Washington.	
Missourians in those four counties	259,591
Companies that hold permits	3
Total Clients Served	259,594

The Industrial Minerals chart reflects estimates of the public protected from the effects of rock mining. When we have public meetings we have from 10 to 80 people present. We conduct about a half dozen meetings per year. There are quarries in every county of the state, some are rural and some are urban in population.

7d. Provide a customer satisfaction measure, if available.

Citizen Complaints Received and Resolved

Historically, the program receives between 40 and 55 complaints per year. Most complaints can be resolved quickly, but depending on the complexity of the issue some complaints may take more time to resolve.

Department of Natural Resources

Other Funds: Cost Allocation Fund (0500); Natural Resources Protection Fund (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund – Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570); Natural Resources Protection Fund - Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund – Air Pollution Permit Fee Subaccount (0594); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679).

The department requests 25% personal service and expense and equipment flexibility in FY 2012 from the General Revenue Fund.

Core Reallocation: The FY 2012 budget request includes a core reallocation of \$450,119 General Revenue Personal Service and \$39,233 other funds expense and equipment to the DEQ Environmental Services Program.

Core Reduction: The FY 2012 budget request includes core reductions of \$2,483 from General Revenue Expense and Equipment authority.

Note: This core budget is facing fiscal challenges

2. CORE DESCRIPTION

The Regional Offices are located throughout the state of Missouri and work in partnership with the environmental programs in order to protect the state's air, land and water resources, which are important to the state's citizens and economy, the program provides consistent, efficient delivery of services closest to where Missourians live and work. This is accomplished through timely compliance assistance, inspection, on-site visits to permitted facilities, wastewater and air burn permit issuance, and investigating reported environmental concerns. Regional and satellite offices are located throughout the state to provide better access for permitting, compliance and informational purposes.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78855C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: REGIONAL OFFICES	DIVISION: ENVIRONMENTAL QUALITY

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

DEPARTMENT REQUEST

The Regional Offices will continue to focus on improving environmental compliance by providing more services closer to the people we serve. PS and E&E flexibility will help to ensure responsiveness and effectiveness of the program. Additionally, environmental emergencies or other unanticipated needs may arise. The Regional Offices are requesting 25% GR flexibility on both PS and E&E.

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST - DEPARTMENT REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
In FY 2010, the Division of Environmental Quality was reorganized to include the Field Services Division (FSD). Flexibility was granted at the FSD level. FSD's FY 2010 flexibility request was \$939,856 (25% of GR PS) and \$356,027 (25% of GR EE); no FSD flexibility was used in FY 2010.	The planned flexibility usage is difficult to estimate at this time. Flexibility is needed in the event of an environmental emergency that may affect public health or safety. FY 2011 Flex Request (25% of GR PS) \$664,381 FY 2011 Flex Request (25% of GR EE) \$52,406	The planned flexibility usage is difficult to estimate at this time. Flexibility is needed in the event of an environmental emergency that may affect public health or safety. FY 2012 Flex Request (25% of GR PS) \$551,852 FY 2012 Flex Request (25% of GR EE) \$51,785

3. Please explain how flexibility was used in the prior and/or current years.

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
Not applicable, see above.	Flexibility will be used for unanticipated needs such as environmental emergencies or situations that may require an extraordinary response.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Regional Offices

Program is found in the following core budget(s): Regional Offices

1. What does this program do?

The Regional Offices consist of five offices (St. Louis Regional Office, Kansas City Regional Office, Northeast Regional Office, Southeast Regional Office, and Southwest Regional Office) and 13 satellite offices. The Regional Offices represent the department and provide interaction with regulated facilities and citizens at the local level. Staff of the Regional Offices conduct environmental inspections, investigate citizen concerns, provide technical assistance, issue water pollution and open burning permits, and are responsive to inquiries and requests for assistance from multiple sources including the public, legislators, other department entities, various federal and state agencies, various media outlets, and other DNR staff.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Federal Clean Water Act as amended
 Federal Safe Drinking Water Act as amended
 Federal Clean Air Act, with amendments, 1990
 Federal Comprehensive Environmental Response,
 Compensation, and Liability Act of 1980, as amended, Public Law 96-510
 Federal Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499
 Federal Resource Conservation and Recovery Act of 1976; as amended, Public Law 94-580
 Federal Solid Waste Disposal Act of 1976, as amended
 RSMo 640.040 Cleanup of Controlled Substance
 RSMo 260.500 through 260.552 Hazardous Substance Emergency Response

Also see program authorization in the core operating budgets for the Division of Environmental Quality's Water Protection Program, Air Pollution Control Program, Hazardous Waste Program, and Solid Waste Management Program.

3. Are there federal matching requirements? If yes, please explain.

Performance Partnership Grant	Match varies by component
Drinking Water State Revolving Fund	20% State
Clean Water State Revolving Fund	20% State

4. Is this a federally mandated program? If yes, please explain.

The Regional Offices support the Clean Water Act; the Safe Drinking Water Act; the Clean Air Act; the Resource Conservation and Recovery Act; the Comprehensive Environmental Response, Compensation, and Liability Act; and the Superfund Amendments and Reauthorization Act.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Regional Offices

Program is found in the following core budget(s): Regional Offices

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Program Expenditure History

Notes: FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other " funds?

Cost Allocation Fund (0500); Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund - Scrap Tire Subaccount (0569); Solid Waste Management Fund (0570); Natural Resources Protection Fund - Air Pollution Asbestos Fee Subaccount (0584); Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Environmental Radiation Monitoring Fund (0656); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679)

7a. Provide an effectiveness measure.

Annual Compliance Inspections

--------------------	---------	---------	---------	-----------

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Est. Fringe	0	0	0	0
--------------------	---	---	---	---

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund (0570); Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594); Environmental Radiation Monitoring Fund (0656); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679).

The department requests retention of 25% personal service and expense and equipment flexibility in FY 2012 from the General Revenue Fund.

Core Reallocation: The FY 2012 budget includes a core reallocation of \$450,119 General Revenue personal service and \$39,233 other funds expense and equipment from the Regional Offices budget.

Request retention of the estimated appropriation for the Cleanup of Controlled Substances and Environmental Emergency Response System pass through appropriations.

Note: This core budget is facing fiscal challenges.

2. CORE DESCRIPTION

The Environmental Services Program (ESP) provides field support and monitoring functions throughout Missouri. ESP is home to the state's environmental laboratory. The laboratory is accredited by EPA and performs chemical analysis of public drinking water supplies throughout the state. The lab also analyzes air, water, and soil samples. ESP is also home to the Environmental Emergency Response Section which maintains a 24 hour/day, 7 day/week support and response capability that encompasses hazardous substance releases, radiological incidents, homeland security events, weapons of mass destruction, and natural disasters. Local fire departments, haz mat teams, law enforcement, and first responders throughout Missouri rely upon these services. This section also provides support and economical disposal options to law enforcement dealing with hazardous wastes as a result of clandestine drug lab seizures (predominately Meth related). In addition, ESP has sections specializing in field monitoring of air and water quality.

CORE DECISION ITEM

Department of Natural Resources

Budget Unit 78885C, 79475C

Division of Environmental Quality

Environmental Services Program Core

2. CORE DESCRIPTION (continued)

Hazardous Substances Analysis & Emergency Response: the department coordinates state, federal and local efforts during an environmental emergency, including the coordination of controlled substance cleanup, and ensures that the emergency is brought to a safe and environmentally sound conclusion. In FY 2010, over 2,800 hazardous substance spills, leaks and other chemical-related incidents were reported through the statewide emergency response telephone. Many of these incidents required an on-scene response to assess the situation, provide technical assistance to on-site responders and ensure that the hazardous substance release was properly cleaned up.

3. PROGRAM LISTING (list programs included in this core funding)

Environmental Services Program

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds)	799,409	828,809	799,975	5,826,397 E

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

CORE DECISION ITEM

Department of Natural Resources

Budget Unit 78885C, 79475C

Division of Environmental Quality

Environmental Services Program Core

4. FINANCIAL HISTORY (continued)

NOTES:

(1) In the FY 2011 budget, the Environmental Services Program (previously within the Field Services Division) was reorganized under the Division of Environmental Quality. Prior year actual data (FY 2008 - FY 2010) for ESP operations is not available in the budgeting system, therefore is not shown above. Only the Hazardous Substance and Emergency Response pass through appropriations expenditures are shown in these years. FY2011 and FY 2012 financial data includes operating and pass through appropriations.

(2) The Cleanup of Controlled Substances and Environmental Emergency Response pass through appropriations are estimated. These appropriations are used for meth cleanup and emergency response work. The number and size of meth and emergency response incidents is variable and the appropriation needs are unpredictable from year to year.

(3) The FY 2011 pass through appropriations are: Controlled Substance Cleanup \$124,999"E"; Hazardous Substance Sample Analysis \$160,210; Environmental Emergency Response \$280,000 "E"; and Emergency Response Loans \$150,000.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78885C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: ENVIRONMENTAL SERVICES PROGRAM	DIVISION: ENVIRONMENTAL QUALITY

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

DEPARTMENT REQUEST

The Environmental Service Program will continue to perform field monitoring and sampling for the department and to analyze samples and prepare scientific data. PS and E&E flexibility will help to ensure responsiveness and effectiveness of the program. Additionally, environmental emergencies or other unanticipated needs may arise. The Environmental Services Program is requesting 25% GR flexibility on both PS and E&E.

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST - DEPARTMENT REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
In FY 2010, the Division of Environmental Quality was reorganized to include the Field Services Division (FSD). Flexibility was granted at the FSD level. FSD's FY 2010 flexibility request was \$939,856 (25% of GR PS) and \$356,027 (25% of GR EE); no FSD flexibility was used in FY 2010.	FY 2011 Flex Request (25% of GR PS) \$160,599 FY 2011 Flex Request (25% of GR EE) \$80,851 The planned flexibility usage is difficult to estimate at this time. Flexibility is needed in the event of an environmental emergency that may affect public health or safety.	FY 2012 Flex Request (25% of GR PS) \$273,128 FY 2012 Flex Request (25% of GR EE) \$80,851 The planned flexibility usage is difficult to estimate at this time. Flexibility is needed in the event of an environmental emergency that may affect public health or safety.

3. Please explain how flexibility was used in the prior and/or current years.

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
Not applicable, see above.	Flexibility will be used for unanticipated needs such as environmental emergencies, or situations that may require an extraordinary response.

Department of Natural Resources

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

1. What does this program do?

The Environmental Services Program (ESP) provides field support and monitoring functions throughout Missouri.

ESP is home to the state's environmental laboratory. The lab is accredited by EPA and performs chemical analysis of public drinking water supplies throughout the state. The lab also analyzes air, water, and soil samples. ESP is also home to the Environmental Emergency Response Section which maintains a 24 hour/day, 7 day/week support and response capability that encompasses hazardous substance releases, radiological incidents, homeland security events, weapons of mass destruction, and natural disasters. Local fire departments, haz mat teams, law enforcement, and first responders throughout Missouri rely upon these services. This section also provides support and economical disposal options to law enforcement dealing with hazardous wastes as a result of clandestine drug lab seizures (predominately Meth related).

ESP also has sections specializing in field monitoring of air and water quality. The Air Quality Monitoring Section operates approximately 110 monitoring instruments at 30 locations around Missouri as part of a network to monitor air pollutants known to affect people's health. This network generates 1,500,000 measurements annually. This data may be used to determine whether an area meets the National Ambient Air Quality Standards, to identify air pollution trends, to investigate citizen complaints, to determine the source of air pollution problems, and to inform people of the current air quality in real time for major metropolitan areas within Missouri. The Air Quality Monitoring Section works in support of the Air Pollution Control Program. The Water Quality Monitoring Section is responsible for assessing the biological health of lakes, rivers and streams and monitoring water and sediment quality throughout the State of Missouri. The Water Quality Monitoring Section works in support of the Water Protection Program.

Hazardous Substances Analysis & Emergency Response: the department coordinates state, federal and local efforts during an environmental emergency, and ensures that the emergency is brought to a safe and environmentally sound conclusion. In FY 2010, over 2,800 hazardous substance spills, leaks and other incidents were reported to the department through the statewide emergency response phone line 1-573-634-CHEM (2436). Many of these incidents required an on-scene response to assess the situation, provide technical assistance to on-site responders and ensure that the hazardous substance release was properly cleaned up. This is a 24 hour per day, 7 days per week service. Onsite response may require a contractor to be called in to eliminate a threat to public health and environment if a responsible party cannot be located or fails to take timely action to clean up. A contractor may also be used for laboratory analysis when the department does not have appropriate equipment or cannot perform the work quickly enough for state and local officials to determine the course of action in an emergency. Controlled substance (primarily methamphetamine) use and production continues to be a major problem in the state of Missouri. Law enforcement agencies have found that dealing with the by-products of controlled substance production is an environmental and public health hazard beyond their expertise. The ingredients used to produce methamphetamine are very volatile and can cause the meth labs to be highly explosive. Many of the materials used in the methamphetamine production process, as well as the by-products from that production, are toxic and create a hazardous substance cleanup problem. The department assists local law enforcement with the environmental challenges posed by illegal drug production.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

1. What does this program do (continued)?

Environmental Services Program - Reconciliation

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current	FY 2012 Request
Environmental Svcs Operations (78885C)	n/a	n/a	n/a	5,111,188	5,111,188
Haz Subst & Emergency Resp (79475C)	121,432	242,872	218,793	715,209	715,209
Total	121,432	242,872	218,793	5,826,397	5,826,397

Notes: In the FY 2011 budget, the Environmental Services Program (previously within the Field Services Division) was reorganized under the Division of Environmental Quality. Prior year actual data (FY 2008 - FY 2010) for ESP operations is not available in the budgeting system, therefore is not shown above. Only the Hazardous Substance and Emergency Response PSD expenditures are shown in these years. FY 2011 and FY 2012 financial data includes operating and pass through appropriations.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Federal Clean Water Act as amended

Federal Safe Drinking Water Act as amended

Federal Clean Air Act, with amendments, 1990

Federal Comprehensive Environmental Response,

Compensation, and Liability Act of 1980, as amended, Public Law 96-510

Federal Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499

Federal Resource Conservation and Recovery Act of 1976; as amended, Public Law 94-580

Federal Solid Waste Disposal Act of 1976, as amended

Oil Pollution Act of 1990

RSMo 260.500 through 260.552 Hazardous Substance Emergency Response

RSMo 260.818 through 260.819 Oil Spill Response, National Contingency Plan

RSMo 640.040 Cleanup of Controlled Substance

RSMo 260.750 Environmental Radiation Monitoring

Also see program authorization in the core operating budgets for the Division of Environmental Quality's Water Protection Program, Air Pollution Control Program, Hazardous Waste Program, and Solid Waste Management Program.

3. Are there federal matching requirements? If yes, please explain.

Funds from MO Drug Lab Task Force through Department of Public Safety's Byrne Grant

25% State

Grant funding from various programs

Varies

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

4. Is this a federally mandated program? If yes, please explain.

The Environmental Services Program supports the Clean Water Act; the Safe Drinking Water Act; the Clean Air Act; the Resource Conservation and Recovery Act; the Comprehensive Environmental Response, Compensation, and Liability Act; and the Superfund Amendments and Reauthorization Act.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: In the FY 2011 budget, the Environmental Services Program (previously within the Field Services Division) was reorganized under the Division of Environmental Quality. Prior year actual data (FY 2008 - FY 2010) for ESP operations is not available in the budgeting system, therefore is not shown above. Only the Hazardous Substance and Emergency Response PSD expenditures are shown in these years. Beginning in FY 2011 financial data includes operating and pass through appropriations. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

Cost Allocation Fund (0500); Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568); Solid Waste Management Fund (0570); Natural Resources Protection Fund - Air Pollution Permit Fee Subaccount (0594); Hazardous Waste Fund (0676); and Safe Drinking Water Fund (0679)

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7a. Provide an effectiveness measure.

Annual Air Quality Related Measurements and Number of Monitoring Stations

The number of air monitoring stations and instruments increased in FY 2010 due to the addition of lead monitoring sites necessitated by EPA regulations. One new site for nitrogen dioxide is expected to be required in FY2012 to meet additional EPA regulations. EPA's new sulfur dioxide regulations may or may not require additional sites.

The number of air-related measurements has decreased in the past couple of years due to changes in the type of instruments EPA has approved for measurement of certain pollutants. EPA requires that certain parameters be reported to a national database for the type of instrument that is used.

**Number of Environmental Emergency Response
Incidents Reported and Number Requiring On Site Response By Year
(Meth Lab Incidents not Included)**

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7a. Provide an effectiveness measure (continued).

**Analyses Conducted by the State's Environmental Lab
(Measured by Parameters)**

A new Laboratory Information Management System came on line during FY 2010, therefore prior year projections are not available. This performance measure has been modified to track the number of parameters analyzed by the laboratory. One sample may be tested for multiple parameters. For example, a specific drinking water sample may be tested for parameters such as lead, copper, and turbidity.

Number of Meth Lab Seizures brought to Department Sponsored Collection Stations by Calendar Year

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7b. Provide an efficiency measure.

Maintain Proficiency of Greater than 99.9% of Samples Analyzed Without Errors

Comparison of DNR vs. DEA Costs

2009 Cost to Clean Up Average Meth Lab

2009 Total Cost to Manage Wastes From Meth Labs

* U.S. Drug Enforcement Agency (DEA) cost is based upon DEA's published estimate of \$2,000 - \$3,000 average direct cost to clean up Meth Lab.

** DNR cost is based on actual direct expenditures reported from SAM II.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7c. Provide the number of clients/individuals served, if applicable.

Missourians Served by Public Drinking Water Supply Systems Monitored Through Chemical Analysis

Emergency Incidents Reported Through 24 Hour Spill Line

The Environmental Services Program renders assistance to fire services; hazardous materials teams; homeland security teams; law enforcement; local emergency management committees; local, state, and federal agencies; private business and industry, and the citizens of Missouri.

PROGRAM DESCRIPTION

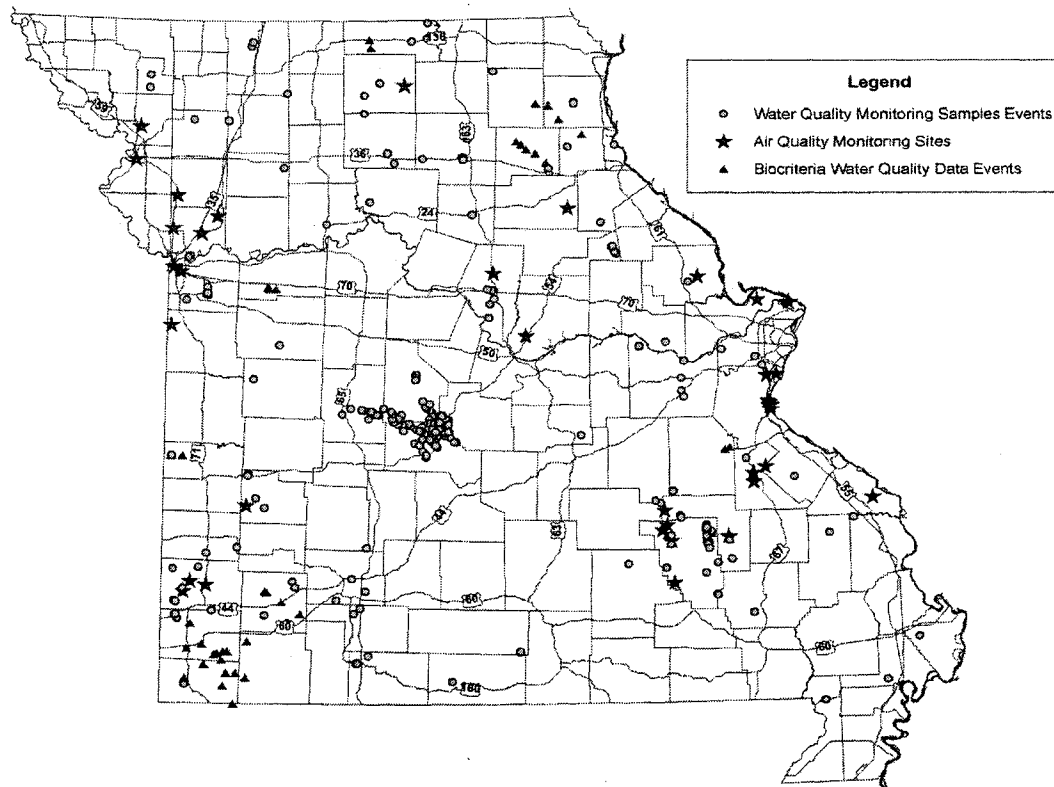

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7c. Provide the number of clients/individuals served, if applicable (continued).

Environmental Services Program - FY 2010 Selected Environmental Monitoring Points

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Environmental Services Program

Program is found in the following core budget(s): Environmental Services Program

7c. Provide the number of clients/individuals served, if applicable (continued).

**Environmental Emergency Response
FY 2010 Materials Released**

**Environmental Emergency Response
FY 2010 Incident Causes**

**Officials Served by Receiving Training, Equipment, and Supplies through Clandestine Drug Lab Cleanup Program
Officials from Local Agencies- FY 2000-FY2010**

CDLCS = Clandestine
Drug Lab Collection
System

HAZWOPER = Hazardous
Waste Operations and
Emergency Response

7d. Provide a customer satisfaction measure, if available.

Not available

Department of Natural Resources

Other Funds: Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568)									
Note: Request retention of the estimated appropriation from Federal Funds and Water Pollution Permit Fee Subaccount pass through appropriations.									
2. CORE DESCRIPTION									
This decision item funds the administration of the Division of Environmental Quality (DEQ), which includes the Water Protection Program (WPP), Air Pollution Control Program (APCP), Hazardous Waste Program (HWP), Solid Waste Management Program (SWMP), Land Reclamation Program (LRP), Regional Offices (St. Louis Regional Office, Kansas City Regional Office, Northeast Regional Office, Southeast Regional Office, and Southwest Regional Office) and the Environmental Services Program (ESP). The division administration is responsible for long-range planning to implement policies to protect public health and the environment. These responsibilities include the integration, direction, coordination and other management functions for the direct programs' statutory mandates. In addition, the division's Environmental Investigation Unit investigates criminal violations of environmental laws.									
Technical Assistance Grants: this core appropriation provides authority to fund expenses and to pass through funds for technical assistance grants, environmental studies, environmental education projects, and demonstration and pilot projects. The department also provides financial and administrative training to the managing boards and councils of wastewater and drinking water systems. In addition, this appropriation allows the department to develop partnerships and pursue federal funds that often have a competitive application process, such as the Drinking Water Operator Training Expense Reimbursement Grant.									
3. PROGRAM LISTING (list programs included in this core funding)

General Revenue	0	0	0	N/A
Federal	16,901	39,041	438,710	N/A
Other	81,534	94,844	221,873	N/A

(3)

(3)(5)

(4)(6)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) An "E" is necessary for the pass-through appropriations due to the uncertain availability of federal funds and the timing of expenditures; grant commitments often span multiple fiscal years.

(3) The decrease in expenditures from FY2008 to FY 2009 was primarily due to the completion of the Low Sulfur Coal Project within Technical Assistance Grants.

(4) Federal operating E&E appropriations have historically been set at a level to take advantage of potential federal funding opportunities.

(5) In FY 2009, the Environmental Investigators were shifted to DEQ Administration.

(6) During FY 2010, the Division of Environmental Quality and the Field Services Division reorganized. FY 2008 thru FY 2010 only includes information for Division of Environmental Quality Administration.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

1. What does this program do?

The Division of Environmental Quality (DEQ) Administration is responsible for long-range planning to implement policies to protect public health and the environment. These responsibilities include the integration, direction, coordination and other management functions for the direct programs' statutory mandates. In addition, administration provides coordination with other DNR divisions and external stakeholders including the general public, community organizations and regulated businesses. Division staff also represent programs and the department in negotiations with federal and state agencies. Staff are committed to the continuous improvement of the effectiveness of the programs through administrative support, policy direction, fiscal management and legal reviews. Division staff communicate with citizens, business, media and legislators to provide information and respond to specific inquiries on environmental issues. Staff also provide policy direction and coordination for several activities including: permitting for major facility siting, rulemakings, environmental management systems and enforcement, risk-based corrective action, quality assurance and strategic plans. The division's Environmental Investigation Unit investigates criminal violations of environmental laws. They coordinate with federal enforcement agencies such as the EPA criminal investigators, the FBI and local law enforcement agencies on major criminal case investigations. In addition, they work with federal, state, county and city attorneys in prosecuting violators. The Division of Environmental Quality includes the Water Protection Program (WPP), Air Pollution Control Program (APCP), Hazardous Waste Program (HWP), Solid Waste Management Program (SWMP), Land Reclamation Program (LRP), Regional Offices (St. Louis Regional Office, Kansas City Regional Office, Northeast Regional Office, Southeast Regional Office, and Southwest Regional Office) and the Environmental Services Program (ESP).

Technical Assistance Grants: This program helps people, businesses and local governments understand natural resource concepts and issues, comply with statutes and regulations, use pollution prevention strategies, complete environmental studies, test pilot projects and certify operators of public water supply systems. To more effectively accomplish these activities, the department pursues federal grant monies that may be available for pass through to the public, local governments, other agencies and other partners.

Educational activities, training, information dissemination and technology transfer methods, such as demonstration and pilot projects, are among the most effective ways to promote pollution prevention practices and develop an organization's technical, managerial, and financial capabilities. Funding this decision item enhances the ability to accomplish these goals for Missouri through demonstration and pilot projects, workshops, and educational and training activities by enabling available monies to be passed through to public and private partners.

In addition, this appropriation will be used to provide financial and administrative training to the managing boards and councils of wastewater treatment facilities and public water systems through the use of a contract.

The Drinking Water Operator Training Expense Reimbursement Grant (ERG) helps train and certify drinking water operators employed by community and non-transient, non-community public water systems serving a population of 3,300 or less. To distribute funds to qualifying public water supply systems, the department is using a Voucher Program. For FY 2011, over 1,500 public water supply systems have been issued vouchers totaling either \$625 or \$950, depending on their system classification. Vouchers are used by the public water supply systems to pay for approved training courses, as well as exam fees and certification renewal fees. The vouchers give the public water supply system the flexibility to choose which courses to attend and to train a current operator and additional backup operators. These small public water supply systems are better able to meet the federal requirements of having, and maintaining, trained and certified operators for their systems through the use of the voucher program.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

1. What does this program do (continued)?

DEQ Administration - Reconciliation

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current	FY 2012 Request
DEQ Admin Operations (78117C)	998,223	1,139,709	1,048,828	1,695,725	1,695,725
Technical Assistance Grants (79360C)	679,202	299,678	272,794	125,000	125,000
Total	1,677,425	1,439,387	1,321,622	1,820,725	1,820,725

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

The Division of Environmental Quality administers programs that protect human health, public welfare and the environment. These programs are authorized by state and federal laws as noted in each of their program descriptions. These laws deal with air quality, solid and hazardous wastes, mining and reclamation, voluntary cleanup, petroleum storage tanks, clean water and drinking water.

Federal Clean Air Act, with amendments (1990)

RSMo 640.010 – 640.758

RSMo 640.100

RSMo 643.173 and 643.175

RSMo 643.060 (2)

RSMo 644.006 through 644.096

Department of Natural Resources - Duties associated with environmental assistance on behalf of the department

Drinking Water Operator Certification; Safe Drinking Water Act

Small Business Technical Assistance Program

Prevention, Abatement, and Control of Air Pollution

Water Pollution Planning, Permitting, Inspection, Remediation, Technical Assistance

3. Are there federal matching requirements? If yes, please explain.

The division receives several federal grants. The matching requirements for these are listed in each of the applicable program descriptions.

Drinking Water Operator Training Reimbursement

100% Federal (EPA)

Other competitive grants may require various matching ratios

varies

4. Is this a federally mandated program? If yes, please explain.

The Division Administration oversees and coordinates programmatic responsibilities for which the state has elected, through environmental statutes, to seek delegation of federal programs. As it relates to Technical Assistance Grants, federal law mandates that operators of public drinking water systems be certified.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

5. Provide actual expenditures for the prior three fiscal years.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. During FY 2010, the Division of Environmental Quality and the Field Services Division reorganized. FY 2008 - FY2010 Actual only includes information for Division of Environmental Quality Administration. Financial data includes operating and pass-through appropriations. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other " funds?

Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568)

7a. Provide an effectiveness measure (continued).

Note: Education includes training for the managing boards and councils of wastewater treatment facilities and public water systems that is projected to begin in FY 2011. Technical Assistance for FY 2010 includes assistance provided to an entity that experienced a failure of both its drinking water and waste water systems. A department staff person has been appointed, pursuant to subsection 515.240 RSMo, as the Receiver for the entity's water, sewer and trash utilities and is providing technical assistance through contractual services to operate, maintain, and supply these services to the citizens of this community.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7a. Provide an effectiveness measure (continued).

Involving Missourians in Solving Environmental Problems

The Division of Environmental Quality strives to maintain public awareness and involvement in the issues affecting Missourians' environment. We include the number of broadcast e-mails in the News Letters category. The following are some of the existing committees that benefit from the broadcast e-mails: Business Assistance, E-Scrap Stakeholder Workgroup, E-scrap Recycling Rulemaking Workgroup, Enforcement and Compliance Assistance, Enforcement and Compliance Assistance for Hazardous Waste Generators, Hazardous Waste Generator Reporting, Hazardous Waste Forum, Hazardous Waste Management Commission Quarterly Report Newsletter, Operational Tanks, Redevelopment and Brownfields Cleanup, Solid Waste Management Program Forum, Stage I and Stage II Vapor Recovery, and Water Quality Coordinating Committee. Beginning in FY 2007, we included the number of Forms in the Publications category to reflect the department's desire to include more forms on the Web. FY 2010 news releases increase due to increased emphasis on water quality. FY 2010 publications decreased due to extensive staff time required on a large publication project.

PROGRAM DESCRIPTION

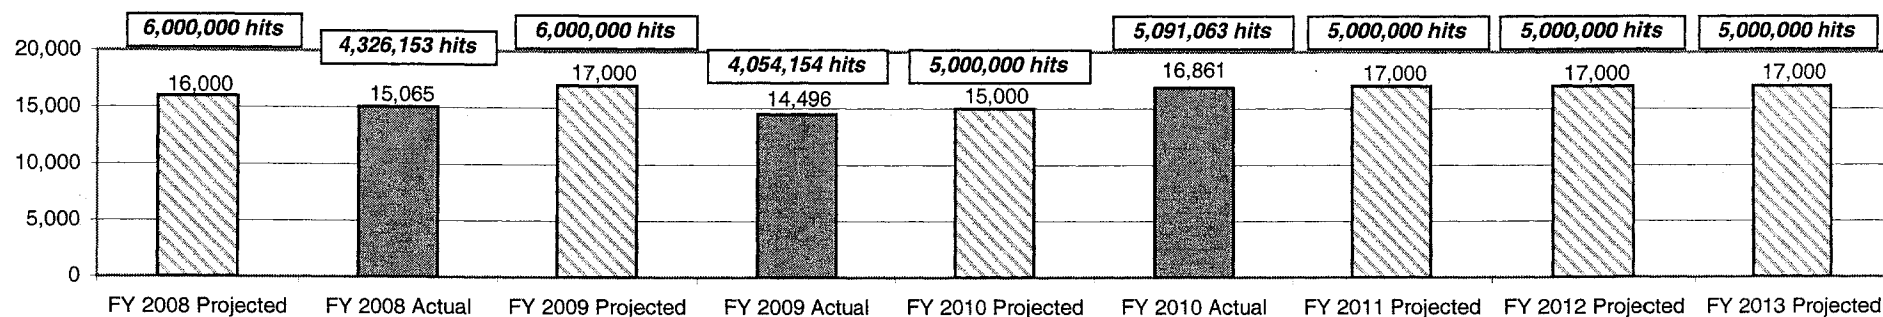

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7a. Provide an effectiveness measure (continued).

DEQ Web Hits and Pages

Fiscal Note Reviews Provided for Proposed Legislation

The division administration is responsible for projecting impacts of proposed legislation involving the divisions' programmatic functions. The division adds valuable input on the effects of potential legislation or amended regulations through a procedure allowing each program to provide comments on technical aspects of legislation, cost impacts and feasibility. The division then provides information in a consolidated format to the department.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7b. Provide an efficiency measure.

Division Administration FTE in Relation to Core Division FTE

Division Administration Expenditures in Relation to Core Division Operating Expenditures

Projections are based on full appropriation spending. These projections only include operating appropriations; pass through appropriations are not included. During FY 2010, the Division of Environmental Quality and the Field Services Division reorganized. FY 2010 and prior year projections and actuals reflect only information for the Division of Environmental Quality. FY 2011 projected and forward reflects the reorganization.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7b. Provide an efficiency measure (continued).

The goal of the division is to recruit and retain the best employees by providing these staff with the communication, training, infrastructure and resources to continue to do their jobs in an effective way and in a professional working environment. During FY 2010, the Division of Environmental Quality and the Field Services Division reorganized. FY 2010 and prior year projections and actuals reflect only information for the Division of Environmental Quality. FY 2011 projected and forward reflects the reorganization.

7c. Provide the number of clients/individuals served (if applicable)

The Division serves the line programs by aiding in resource maximization:

Water Protection, Air Pollution Control, Hazardous Waste Management, Solid Waste Management, Land Reclamation, Regional Offices and Environmental Services.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7c. Provide the number of clients/individuals served (if applicable) continued.

Number of Individuals Benefiting from Technical Assistance Grants and Projects

Note: The Expense Reimbursement Grant that funds the drinking water voucher program expires 6/30/2012. The last planned calendar year for vouchers to be issued to drinking water systems is 2011. The projected amount for FY 2012 reflects the second half of the calendar year and the last of the vouchers to be processed. The projected numbers for FY 2011 and FY 2012 are based on the number of vouchers redeemed during FY 2010 and accelerated efforts of the program to encourage systems to redeem their vouchers before the end of this federal grant. FY 2010 - a small entity experienced a failure of both its drinking water and waste water systems. A department staff person has been appointed, pursuant to subsection 515.240 RSMo, as the Receiver for the entity's water, sewer and trash utilities and is providing technical assistance through contractual services to operate, maintain, and supply these services to the citizens of this community.

PROGRAM DESCRIPTION

Department of Natural Resources

DEQ - Administration

Program is found in the following core budget(s): Division of Environmental Quality Administration

7c. Provide the number of clients/individuals served (if applicable) continued.

DNR Boards and Commission Served:

Air Conservation Commission
Clean Water Commission
Environmental Improvement and Energy Resources Authority
Hazardous Waste Management Commission
Interstate Mining Compact Commission
Industrial Minerals Advisory Council
Land Reclamation Commission
Low Level Radioactive Waste Compact Advisory Committee
Petroleum Storage Tank Insurance Fund
Safe Drinking Water Commission
Small Business Compliance Advisory Committee
Solid Waste Advisory Board

7d. Provide a customer satisfaction measure, if available.

Not available

Other Funds: Petroleum Storage Tank Insurance Fund (0585)									
Note: The department requests 25% Personal Service and Expense & Equipment flexibility from the Petroleum Storage Tank Insurance Fund.									
2. CORE DESCRIPTION									
The goal of the department's Underground Storage Tank (UST) efforts is to protect human health and the environment through the regulation of underground storage tank systems. This mission is accomplished by registering USTs, properly closing unused tanks, overseeing the tank inspection program including contract inspections, investigating and cleaning up contamination from leaking tanks, and ensuring compliance with state and federal UST laws. In many situations cleanups related to underground storage tanks are key to transfer, sale or reuse of the property, thereby promoting economic stimulus and sustainable communities.									
3. PROGRAM LISTING (list programs included in this core funding)

CORE DECISION ITEM

Department of Natural Resources

Budget Unit 78116C

Agency Wide Operations

Agency Wide Operations - Petroleum Related Activities

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds)	1,062,680	1,089,688	1,089,688	1,089,688
Less Reverted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	1,062,680	1,089,688	1,089,688	N/A
Actual Expenditures (All Funds)	821,376	651,421	677,975	N/A
Unexpended (All Funds)	241,304	438,267	411,713	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	0	0	0	N/A
Other	241,304	438,267	411,713	N/A
	(1)	(1)	(1)	(1)

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

NOTES:

(1) In FY 2006, funding for petroleum tank related activities and environmental emergency response was consolidated at the department level and was limited to \$1,000,000. Since the \$1,000,000 included related fringe benefit costs, the actual Personal Services and Expense and Equipment expenditures were lower than the budgeted appropriation authority. The PSTIF Board approved \$1,111,884 spending in FY 2007, \$1,156,539 in FY 2008, \$1,203,148 in FY 2009, \$1,219,445 in FY 2010, and \$1,244,677 for FY 2011, each including cost of living adjustments and increased fringe costs from the previous year's personal services approved amount. The expenditure amounts above do not reflect the transfers related to fringe benefits, ITSD, building rental charges, or department administration costs. The total of all of these in addition to the operating charges reflected above must stay within the Board-approved budget.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78116C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: PETROLEUM RELATED ACTIVITIES	DIVISION: AGENCY WIDE OPERATIONS

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

DEPARTMENT REQUEST

Prior to FY 2006, Petroleum Storage Tank Insurance funding (PSTIF-0585) was included in various budgets throughout the department. In FY 2006, the PSTIF appropriation authority was reduced from these various division/program budgets and in it's place \$1 million was appropriated to the department. To accomplish our mission, we have been allowed 25% flexibility between Personal Service and Expense & Equipment. Each year the PSTIF funds and activities are analyzed and the Petroleum Storage Tank Insurance Board approves a work plan for the department. We are requesting 25% flexibility on both PS and EE, based on the FY 2012 budget request, from PSTIF funding for the Petroleum Related Activities core.

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST - DEPARTMENT REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$0 PSTIF PS \$0 PSTIF EE	Planned spending for FY2011 (based on approved workplans) reflects that the existing appropriations will be sufficient. FY 2011 Flex Request (25% of 0585 PS Core) \$231,816 FY 2011 Flex Request (25% of 0585 EE Core) \$40,607	The planned flexibility usage is difficult to estimate at this time. The need will be determined by work plans of the divisions and programs using this funding. FY 2012 Flex Request (25% of 0585 PS Core) \$231,816 FY 2012 Flex Request (25% of 0585 EE Core) \$40,607

3. Please explain how flexibility was used in the prior and/or current years.

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
N/A - the flexible appropriation was not used in the prior year.	Planned spending for FY 2011 (based on approved workplans) reflects that the existing appropriations will be sufficient. However, the department requests retention of this flexibility to address unexpected work plan issues as the need arises.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Petroleum Related Activities

Agency Wide Operations - Petroleum Related Activities

1. What does this program do?

The department regulates over 3,600 underground storage tank (UST) facilities to reduce the incidents of releases and to ensure detection of releases that do occur. Requiring a financial responsibility instrument assures that funds will be available if a tank owner has a leak or spill. The department oversees the reporting, inspection, investigation, closure and cleanup of releases from USTs and aboveground storage tanks (ASTs). In addition, data is captured and managed regarding operating UST sites.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

40 CFR Part 281 Underground Storage Tank (UST) Program
RSMo 319.100 through 319.139 Petroleum Storage Tanks

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

The state has authority under 40 CFR Part 281 and has received approval from EPA to run the UST Program.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY 2011 Planned is shown at full appropriation level. Expenditures are limited to the PSTIF Board-approved budget amount.

6. What are the sources of the "Other" funds?

Petroleum Storage Tank Insurance Fund (0585)

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Petroleum Related Activities

Agency Wide Operations - Petroleum Related Activities

7a. Provide an effectiveness measure.

UST Financial Responsibility (FR) Compliance

The financial responsibility (FR) requirement is a vital component of state regulations which assures that money will be available for cleanup if a UST leak occurs. Financial responsibility is required for all regulated tanks currently in use. One owner may own several facilities; financial responsibility is required for each facility with active tanks. Temporarily closed tanks, while regulated, do not require financial responsibility. Previously, only sites covered by PSTIF as an FR mechanism were reported. A gradual decline in the number of active UST facilities has been occurring since FY 2009. It is anticipated that the economy will become more stable in FY 2013 and the number of facilities will remain constant. The percentage of facilities with acceptable FR declined slightly in FY 2010, mostly due to timing issues with facilities being late with their proof of FR due at the end of the fiscal year.

7b. Provide an efficiency measure.

Underground Storage Tank Closure Report Processing Time (Days)

Reduction in time needed to process closure reports for underground storage tanks results in property transactions being completed more quickly and the property being available for beneficial reuse. The FY 2008 actual processing time was higher than projected because new staff were being trained and improvements in database tracking were being made. Future projections reflect implementation of Missouri Risk-Based Corrective Action (MRBCA), new database enhancements, fully trained staff, and automated closure letter responses.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Petroleum Related Activities

Agency Wide Operations - Petroleum Related Activities

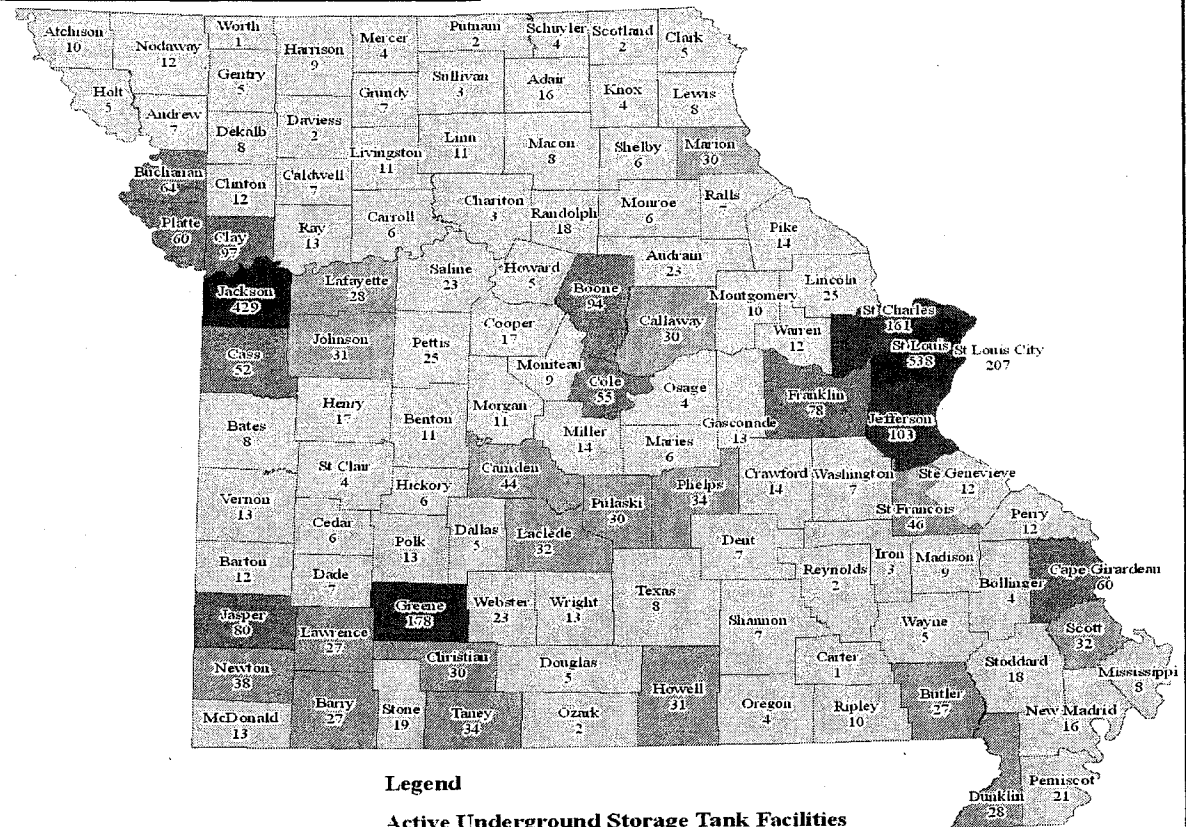

7c. Provide the number of clients/individuals served, if applicable.

	FY 2008	FY 2009	FY 2010
Underground Storage Tanks (UST)/Leaking USTs	3,716	3,668	3,613

This map represents, by county, the number of active facilities with underground petroleum storage tanks through June 2010.

Total active facilities = 3,613.

Active facilities are sites that have either tanks currently in use or temporarily closed, or a combination of both.

7d. Provide a customer satisfaction measure, if available.

Not available

2. CORE DESCRIPTION									
<p>Missourians who store petroleum in underground tanks are required to have a financial responsibility mechanism to pay for costs of cleanup and third party damages if the tank or piping leaks. Private insurance is unavailable or prohibitively expensive for the many small businesses that own tanks. The Petroleum Storage Tank Insurance Fund (PSTIF) provides an economical way for tank owners/operators to comply with this requirement. It is funded by a fee on all petroleum coming into the state, and is managed by an 11-member Board of Trustees. In addition, thousands of tank sites in the state were contaminated with petroleum in the past, before environmental laws and regulations were in place and before pollution liability insurance was required. These properties are not economically viable due to the environmental liability associated with the property. The Legislature authorized the PSTIF to pay for cleanup of these sites, subject to certain criteria, which stimulates redevelopment of these properties. SB907 was enacted in 2008 to extend operations of the PSTIF to 2020.</p> <p>This core funds the Board's staff and operating expenses, including application review and policy issuance, annual compliance reviews, loss prevention and inspection services, accounting, annual external audit, actuarial analyses and cash flow projections, data management and Board/staff expenses.</p>

2. CORE DESCRIPTION

Missourians who store petroleum in underground tanks are required to have a financial responsibility mechanism to pay for costs of cleanup and third party damages if the tank or piping leaks. Private insurance is unavailable or prohibitively expensive for the many small businesses that own tanks. The Petroleum Storage Tank Insurance Fund (PSTIF) provides an economical way for tank owners/operators to comply with this requirement. It is funded by a fee on all petroleum coming into the state and is managed by an 11-member Board of Trustees. In addition, thousands of tank sites in the state were contaminated with petroleum in the past, before environmental laws and regulations were in place and before pollution liability insurance was required. These properties are not economically viable due to the environmental liability associated with the property. The Legislature authorized the PSTIF to pay for cleanup of these sites, subject to certain criteria, which stimulates redevelopment of these properties. SB907, enacted in 2008, extends the operation of the PSTIF to 2020.

This appropriation will authorize investigation, adjudication and payment of claims for cleanup and third party damages. Because of the difficulty of predicting claims, an estimated appropriation is requested. In addition, this appropriation authorizes payment of premium refunds when necessary.

CORE DECISION ITEM

Department of Natural Resources
Petroleum Storage Tank Insurance Fund
Claims Costs and Erroneous Receipts Core

Budget Unit 79670C

3. PROGRAM LISTING (list programs included in this core funding)

Petroleum Storage Tank Insurance Fund

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds)	25,070,000	20,070,000	19,080,000	19,010,000 E

PROGRAM DESCRIPTION

Department of Natural Resources

Petroleum Storage Tank Insurance Fund Board of Trustees

Program is found in the following core budget(s): Staff and Operating Expenses; Claims Costs and Erroneous Receipts

1. What does this program do?

Missourians who store petroleum in underground tanks are required to have a financial responsibility mechanism to pay for costs of cleanup and third party damages if the tank or piping leaks. Private insurance is prohibitively expensive for the many small businesses that own tanks. The Petroleum Storage Tank Insurance Fund (PSTIF) provides an economical way for tank owners/operators to comply with this requirement, and pays claims made by its policyholders.

In addition, thousands of tank sites in the state were contaminated with petroleum in the past, before environmental laws and regulations were in place and before pollution liability insurance was required. These properties are not economically viable due to the environmental liability associated with the property. The Legislature has authorized the PSTIF to pay for cleanup of these sites, subject to certain criteria. PSTIF funding for cleanup stimulates redevelopment of these properties.

The PSTIF is funded by a fee on all petroleum coming into the state, and is managed by an eleven member Board of Trustees. SB 907, enacted in 2008, extended the operation of the PSTIF to 2020.

Petroleum Storage Tank Insurance Fund - Reconciliation

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current	FY 2012 Request
Staff & Operating Expenses (79611C)	1,437,654	1,424,553	1,453,143	2,291,351	2,291,351
Claims & Erroneous Receipts PSD (79670C)	18,143,112	18,780,022	16,641,166	19,010,000	19,010,000

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 319.129-132

Petroleum Storage Tanks

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

PROGRAM DESCRIPTION

Department of Natural Resources

Petroleum Storage Tank Insurance Fund Board of Trustees

Program is found in the following core budget(s): Staff and Operating Expenses; Claims Costs and Erroneous Receipts

6. What are the sources of the "Other" funds?

Petroleum Storage Tank Insurance Fund (0585)

7a. Provide an effectiveness measure.

Percent of Active Underground Tank Sites Insured by PSTIF

Notes: The PSTIF works with the DNR and the AGO to assure that underground tank owners are insured, so there will be funds available if a leak occurs. This assures better protection of the environment and public health.

Number of Open Underground Storage Tank Claims

Notes: "Number of open claims" indicates how many cleanups are ongoing at any one time. Data is reported by calendar year, therefore 2010 data will be available mid-January, 2011.

PROGRAM DESCRIPTION

Department of Natural Resources

Petroleum Storage Tank Insurance Fund Board of Trustees

Program is found in the following core budget(s): Staff and Operating Expenses; Claims Costs and Erroneous Receipts

7a. Provide an effectiveness measure (continued.)

Notes: Data is reported by calendar year, therefore 2010 data will be available mid-January 2011.

7b. Provide an efficiency measure.

Note: One of the Board's goals is to control administrative costs as a percentage of overall expenditures.

7c. Provide the number of clients/individuals served, if applicable.

	FY 2007	FY 2008	FY 2009	FY 2010
Number of Owners Insured	1,686	1,687	1,690	1,677
Number of Claimants Paid Benefits (cumulative)	1,954	2,062	2,172	2,256

7d. Provide a customer satisfaction measure, if available.

Not available.

Est. Fringe	0	0	0	0
--------------------	---	---	---	---

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Natural Resources Protection Fund - Water Pollution Permit Fees (0568); Solid Waste Management Fund (0570); Groundwater Protection Fund (0660); State Land Survey Program Fund (0668); Hazardous Waste Fund (0676); Oil and Gas Remedial Fund (0699); Drycleaner Environmental Response Trust Fund (0898); Geologic Resources Fund (0801)

The division requests retention of 25% General Revenue flexibility for FY 2012, and also requests retention of the existing estimated appropriation for the Oil and Gas Remedial PSD.

Core Reallocation: In FY 2012 the Wellhead Protection Section was transferred to the Division of Geology and Land Survey from the DEQ Water Protection Program. The reallocation includes \$494,699 personal service, \$112,814 expense and equipment and 14.30 FTE.

Core Reduction: The FY 2012 budget request includes a core reduction of \$108 from General Revenue expense and equipment authority.

Note: This core budget is facing fiscal challenges.

2. CORE DESCRIPTION

Headquartered in Rolla, Missouri, Division of Geology and Land Survey investigates the state's geology and provides geologic and hydrologic information and expertise to assist with economic and environmental decisions relating to site remediation, contaminant migration, subsurface investigations and geologic hazards. The division also determines the character and availability of the state's energy and mineral resources. The division implements the Water Well Drillers' Act by establishing and enforcing standards for domestic water wells, monitoring wells and geothermal ground source heat pump wells. In addition, the division is responsible for restoring and maintaining the U.S. Public Land Survey System in Missouri and serves as a repository for the state's land survey records. Division management represents the state through the Association of American State Geologists and Central U.S. Earthquake Consortium.

CORE DECISION ITEM

Department of Natural Resources

Budget Unit 78510C, 78526C, 78536C

Division of Geology and Land Survey

Division of Geology and Land Survey Core

2. CORE DESCRIPTION (continued)

Oil and Gas Remedial Fund: Oil and gas have been produced in Missouri since the late 1800s. During the early years of oil and gas development, there were no regulations that mandated that wells no longer in operation be properly plugged. The results of yesterday's poor stewardship practices can be seen today in the abundance of abandoned oil and gas wells left in an unplugged condition. Some of these wells have the potential to impact surface and groundwater resources and have become a threat to human health and well-being by leaking natural gas into neighborhoods that have been built over improperly abandoned gas fields. In an effort to prevent the improper abandonment of oil and gas wells these regulations now require that a plugging bond be posted for each well that produces oil or gas. If the producer fails to properly close the wells at the conclusion of operations, the State has the ability to claim the bond and use the funds to properly plug the wells. Revenues of the fund are also used to handle emergency situations as they arise, such as a leaking gas well.

State Land Survey Corner Restoration & Geodetic Survey Projects: The United States Public Land Survey System was established in Missouri between 1815 and the 1850's. By the mid-1960's it was estimated that 90% of the General Land Office Corners had been destroyed or obliterated due to development, road construction and the age of the survey monument. The General Assembly established the Land Survey Program to reverse this trend and to restore the United States Public Land Survey System (U.S.P.L.S.S.) in Missouri. As funding allows, contracts are used to re-establish or restore the corners, survey and monument county boundaries and survey and monument state boundaries.

Other	273,693	325,031	566,206	N/A	
	(3)	(3)	(3)		

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Financial data includes operating and pass through appropriations.

(2) Due to unknown amounts of future forfeitures or potential emergency situations, the department requests the Oil and Gas Remedial pass through appropriation remain estimated.

(3) Federal appropriation was unexpended due to inability to obtain federal grants and reductions in existing federal funding. The division is continuously looking for opportunities or partnerships to maximize these appropriations to fulfill the mission of the division. Unexpended in Other Funds appropriation are from a variety of funds; this is usually the result of reduced effort, fee fund availability or staff turnover.

FLEXIBILITY REQUEST FORM

BUDGET UNIT NUMBER: 78510C	DEPARTMENT: NATURAL RESOURCES
BUDGET UNIT NAME: DGLS OPERATIONS	DIVISION: GEOLOGY AND LAND SURVEY

1. Provide the amount by fund of personal service flexibility and the amount by fund of expense and equipment flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed. If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.

DEPARTMENT REQUEST
Due to past reductions in General Revenue Expense and Equipment (E&E) budgets, the division anticipates using the flexibility for basic operational needs. We anticipate uses to include utility costs, increased fuel costs, field expenses, supplies and telephone charges. The program continues to see increases in ongoing expenses for such items as fuel and supplies. The flexibility language allows the division to address these issues without a permanent increase in appropriation levels. The flexibility also enhances the division's ability to address the state's needs when a specific but unanticipated problem or issue arises and requires additional staff time to gather certain data to analyze the problem. DGLS is requesting 25% flexibility based on GR funding for FY 2012.

2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	BUDGET REQUEST - DEPARTMENT REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
No flexibility was used.	Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly.	Expenditures are difficult to estimate at this time. PS dollars are only available to flex when vacancies occur. Flexibility will only be used to cover operational expenses and to address issues that arise unexpectedly.
FY 2010 Flex Approp (25% of GR PS) \$147,853 FY 2010 Flex Approp (25% of GR EE) \$26,899	FY 2011 Flex Approp (25% of GR PS) \$147,853 FY 2011 Flex Approp (25% of GR EE) \$25,451	FY 2012 Flex Request (25% of GR PS) \$147,853 FY 2012 Flex Request (25% of GR EE) \$25,424

3. Please explain how flexibility was used in the prior and/or current years.

PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
No flexibility was used in FY 2010.	In FY 2011, DGLS flexibility will be used to cover increased fuel costs, vehicle maintenance, field equipment maintenance and other field and office expenses.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

1. What does this program do?

Division of Geology and Land Survey Operations: The Division of Geology and Land Survey (DGLS) performs a wide variety of activities and services that assist citizens, industry and government in the prudent use of Missouri's natural resources to achieve economic growth and provide for a healthy natural environment. DGLS maintains a large repository of geological data that describes and interprets the state's abundant geological resources. The division works closely with DNR environmental regulatory programs to evaluate conditions at sites where geologic information is essential for proper environmental planning and decision-making. The division is also conducting geologic and hydrologic assessments for redevelopment purposes at brownfield sites. Staff perform subsurface investigations at groundwater contamination sites to determine the source of the contamination. They also work to prevent future environmental problems by evaluating the geologic suitability of proposed landfills, waste disposal options for large subdivisions, wastewater disposal facilities and other sensitive sites prior to their permitting and/or construction. The division also performs a variety of geological data collection activities, such as geological mapping, mineral resource assessment, landslide, collapse potential, geothermal gradients, CO2 sequestration opportunities and earthquake hazard evaluations. The division is the official Missouri Mine Map Repository and maintains the McCracken Core Library and Research Center which houses over 2.4 million feet of geologic rock core. The division regulates the drilling of oil and gas wells in Missouri, staffs the Oil and Gas Council and handles plugging of abandoned oil and gas wells. Staff also manage the state's Underground Injection Control Program. The division also implements the Water Well Drillers' Act by establishing and enforcing standards for domestic water wells, monitoring wells and geothermal ground source heat pump wells.

Another major responsibility of the division is to maintain the United States Public Land Survey System (USPLSS). The corners of the USPLSS are the framework from which all surveyors and property owners must rely for the determination of all land boundaries. In the early 1960's, land owners, title companies, and land surveyors saw an alarming trend in the inability to accurately and economically locate land boundaries. The corners, physical monumentation on which land surveys were based, had been either accidentally or intentionally destroyed. In many instances, land survey records were not preserved, maintained or recorded. Since 1971, an effort has been put forth to reverse the trends of high loss of land corners.

The division's leadership is responsible for providing overall management, policy, fiscal direction, developing priorities and support services. Functions include procurement, accounting, personnel, vehicle use monitoring and reporting, fixed assets, publication and map sales, tracking and analyzing new legislation and policy decisions. Division management represent the State in numerous discussions, negotiations, organizations and projects often in conjunction with other state and federal agencies. Overall division information sharing is coordinated and integrated which helps the division manage map and technical data for state and nationwide distribution.

Oil and Gas Remedial Fund: Oil and gas have been produced in Missouri since the late 1800s. During the early years of oil and gas development, there were no regulations that mandated that wells no longer in operation be properly plugged. In many cases, the abandoned oil and gas wells were left uncovered or pushed over and buried without being properly closed. The results of yesterday's poor stewardship practices can be seen today in the abundance of abandoned oil and gas wells left in an unplugged condition. Some of these wells have the potential to impact surface, groundwater and air resources and have become a threat to human health and well-being by leaking natural gas into neighborhoods that have been built over improperly abandoned gas fields.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

1. What does this program do? (continued)

Regulation of oil and gas production began in the mid 1960s. In an effort to prevent the improper abandonment of oil and gas wells these regulations required that a plugging bond be posted for each well that produces oil or gas. If the producer fails to properly close the wells at the conclusion of operations, the State of Missouri has the ability to claim the bond and use the funds to properly plug the wells. Money from forfeited bonds are deposited in to the Oil and Gas Remedial Fund. These funds are then used to plug wells. Revenues of the fund are also used to handle emergency situations as they arise, such as a leaking gas well. The bond money available for plugging wells is not always adequate to cover the cost of plugging the well.

Land Survey Corner Restoration & Geodetic Survey Projects PSD: The United States Public Land Survey System was established in Missouri between 1815 and the 1850's. By the mid-1960s it was estimated that 90% of the General Land Office Corners had been destroyed or obliterated due to development, road construction and the age of the survey monuments. The General Assembly established the Land Survey Program to reverse this trend and to restore the United States Public Land Survey System (U.S.P.L.S.S.) in Missouri. As funding allows, contracts between the Land Survey Program, County Surveyors and Private Surveyors are used to re-establish or restore the corners, survey and monument county boundaries and survey and monument state boundaries.

This appropriation also allows for the development and establishment of county wide Geographic Reference Systems projects. Each year 3 or 4 counties are densified with highly accurate geodetic control networks. These networks provide for land surveying, cadastral mapping, aerial photography and other uses. The networks provide for the use of global positioning technology supporting the accurate determination of land boundaries, Geographic Information Systems and Land Information Systems.

Division of Geology and Land Survey - Reconciliation

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 640.409	Surface and Groundwater Monitoring Program
RSMo 256.050	Geologic Assistance, Geologic Information and Maps
RSMo 256.112	Mine Map Repository
RSMo 256.170-256.173	Geologic Hazard Assessment
RSMo 319.200	Ground Shaking Notification
RSMo 256.090	Minerals, Rocks and Fossils
RSMo 578.200-578.225	Cave Resources Act
RSMo 260.925	Dry-Cleaning Facilities
RSMo 60.510.1 through 60.510.7	Powers and duties of department related to land survey
RSMo 60.321	Restoration of USPLSS
RSMo 256.010-256.080	Provides technical and administrative oversight of all direct program statutory mandates
RSMo 259	Oil and Gas Act
RSMo 256.700-256.710	Geologic Resource Fund and related duties
RSMo 260.205	Solid Waste Management
RSMo 256.600-256.640	Water Well Drillers Act
RSMo 256.700	Industrial Minerals

3. Are there federal matching requirements? If yes, please explain.

National Coal Resource Data System	40% Federal (USGS)
State Geologic Mapping Program	50% Federal (USGS)
Underground Injection Control (UIC)	75% Federal (EPA)
National Earthquake Hazards Reduction Program	100% Federal (USGS)
Springfield Utilities CO2 Pilot Project	100% Federal (DOE)
OSM Coal Mine Map Initiative	75% Federal (DOE)
AASG Geothermal	100% Federal (USGS)
MO CO2 Project	83% Federal (USGS)

4. Is this a federally mandated program? If yes, please explain.

The Division of Geology and Land Survey provides the technical geologic expertise for the state's federally delegated environmental programs. As funding allows, the division uses its Federal Funds and Other Funds appropriation authority to enter into contracts with county commissions, county surveyors and private sector surveyors to restore corners of the United States Public Land Survey System.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. Financial data includes operating and pass through appropriations. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other " funds?

DNR Revolving Services Fund (0425); Cost Allocation Fund (0500); Natural Resources Protection Fund-Water Permit (0568); Solid Waste Management Fund (0570); State Land Survey Program Fund (0668); Hazardous Waste Fund (0676); Oil and Gas Remedial Fund (0699); Drycleaner Environmental Response Trust Fund (0898); Geologic Resource Fund (0801).

PROGRAM DESCRIPTION

Geo-hydrologic evaluations at hazardous waste sites (4)	275	323	250	254	250	309	250	250	250
Feet of cuttings & core added to the McCracken Core Library	60,000	66,389	60,000	56,194	60,000	33,435	50,000	50,000	60,000
Borings logged for identification of coal occurrence	1,000	992	1,000	813	1,000	918	0	1,000	1,000
Leaking Petroleum Storage Tanks/Spill Sites (5)	15	3	15	12	11	3	10	10	10
Geologic Investigations pertaining to Industrial Minerals (6)	N/A	N/A	N/A	7	10	11	10	10	10

(1) While the number of geologic investigations of proposed landfills appears low, each new site requires extensive field investigations to determine its geologic suitability to keep waste isolated from drinking water.

(2) Geologic investigations conducted at existing solid waste disposal facilities encompass a variety of tasks such as the monitoring of groundwater, assessment of gas migration, dye tracing to track contaminant movement, and other activities.

(3) Siting evaluations include septic tank evaluations for subdivisions, evaluations for animal waste lagoons, municipal lagoons and point source discharges.

(4) Geo-hydrologic assistance includes work plan review, investigative reports, cleanup investigation and oversight and on-site assistance for Superfund, Federal Facilities, Resource Conservation Recovery Act, Dry Cleaner and voluntary cleanup sites.

(5) Each leaking storage tank spill site investigation is a highly complex and time consuming activity. Each site must be thoroughly investigated by drilling numerous borings into the subsurface to determine the source and characteristics of groundwater or soil contamination. These investigations help identify parties responsible for releases.

(6) This is a new measure in the FY 2009 budget therefore, prior year data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

7a. Provide an effectiveness measure. (continued)

Number of Geographic Reference System (GRS) stations established

Fiscal Year	Projected Stations per year	Actual Stations per year	Projected Sq. Miles per year	Actual Sq. Miles per year
2008	N/A	161	N/A	2,045
2009	N/A	47	N/A	597
2010	34	60	N/A	0
2011	130	N/A	1,651	N/A
2012	130	N/A	1,651	N/A
2013	130	N/A	1,651	N/A

Note: To more accurately count miles we changed our methods to simply count the square miles in each county with a station. Significant decrease in GRS stations for FY 2009 and FY 2010 represents reduction in staff due to fund solvency issues. Future fiscal year projections are based on a return to full staffing.

Cumulative Corners Restored

Note: Corners are destroyed annually which limits the cumulative gain in total corners restored.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

7a. Provide an effectiveness measure. (continued)

Number of Corners Monumented Annually by County and Private Surveyors

Due to fund solvency issues in the State Land Survey Program Fund, the department was unable to award contracts in FY 2010. FY 2011 Projections represent corners monumented by county and private surveyors with county or private funding. Projections for FY 2012 and FY 2013 represent corners monumented by county and private surveyors and a return to full funding of the PSD contract.

Note: Because of an increased interest in oil and gas resources in recent years and higher oil prices it has become more economically feasible for companies to drill for Missouri oil.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

7a. Provide an effectiveness measure. (continued)

Number of maps and publications produced, geologic data collected, and land survey records processed

	FY 2008		FY 2009		FY 2010		FY 2011	FY 2012	FY 2013
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Maps (geological & surficial materials) & Publications	21	11	25	15	16	11	15	15	15
Gaining/losing stream determinations	70	89	80	57	60	83	80	80	80
Abandoned mines/smelters investigated	500	732	500	573	500	529	500	400	400
Paper files, maps or logs digitized or scanned	1,000	2,931	1,000	3,568	1,000	1,694	1,000	1,000	1,000

Annual documents microfilmed, indexed and returned to county for public use

Note: Locally maintained documents have been destroyed by water, fire and contamination since the creation of this program. The Land Survey Repository can restore these records, providing security and avoiding economic loss to the citizens of those counties and state. This assumes the program will return to full staffing in FY 2012 and FY 2013.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

7a. Provide an effectiveness measure. (continued)

Total certified wells drilled is based on proper completion and approval of required paperwork, installation of pumps, and submittal of fees. Incomplete applications are not processed until complete, therefore the number of wells certified during a fiscal year may include applications received in a previous fiscal year; wells drilled in FY 2010 may not be certified until FY 2011 or FY 2012. Well drillers are required to submit the applications to the program within 60 days of completion of their work; however well owners are responsible for submitting additional required information and verifications. The program does not have enforcement authority over the well owners and therefore, cannot complete certification until all is complete. Other wells include monitoring wells, ground source heat pump systems reconstructions and exploratory test holes.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

7b. Provide an efficiency measure.

FY 2010	
Geologic inquiries received per FTE	215
Number of geologic investigations performed per FTE	43
Cost to collect comparable geologic core data	\$2,989,700

FY 2010	
Percentage of oil and gas related enforcement actions resolved prior to referral to AGO	100%
Percentage of producing oil leases inspected (1)	N/A
Percent increase in known orphaned wells added to inventory	0%

There are an estimated 2,000 or more abandoned and orphaned oil and gas wells in Missouri. The current balance of the Oil and Gas Remedial Fund is not sufficient to plug these wells. Wells drilled prior to regulation are not bonded and therefore funds do not exist in the Oil and Gas Remedial Fund to plug them.

(1) This is a new measure for FY 2011 and therefore FY 2010 actual data is not available.

Number of corners restored with in-house staff compared to in-house staff and contract PSD funding

	FY 2008	FY 2009	FY 2010	FY 2010	FY 2011	FY 2012	FY 2013
	Actual	Actual	Projected	Actual	Projected	Projected	Projected
Number of corners restored with in-house staff and PSD contracts	560	514	105	119	105	515	515
Number of corners restored with in-house staff only	79	65	65	58	65	65	65

The Land Survey Program (LSP) leverages dollars with county and private surveyors to restore corners annually. During FY 2010 and FY2011 the program will not award contracts which will result in a substantial reduction in the number of corners restored due to the decreasing revenues in the State Land Survey Program Fund.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of Geology and Land Survey

Program is found in the following core budget(s): Division of Geology and Land Survey

7c. Provide the number of clients/individuals served, if applicable.

The total number of individuals and organizations provided with geological assistance or information

	FY 2008	FY 2009	FY 2010
Geologic inquiries	5,478	6,380	5,805
Education presentations	43	76	105
Field assistance with geologic problems	60	93	66
Number of land survey repository orders received and processed	2,625	3,460	3,202

7d. Provide a customer satisfaction measure, if available.

Not available.

Other Funds: State Park Earnings Fund (0415); Cost Allocation Fund (0500); Parks Sales Tax Fund (0613); Meramec-Onondaga State Parks Fund (0698); and Babler State Park Fund (0911)

Note: Request retention of existing estimated appropriations.

Core Reallocation: The FY 2012 budget request includes a core reallocation of \$100,000 from Bruce R Watkins core, \$25,875 "E" from Payment in Lieu of Taxes core, \$72,390 "E" from Gifts to State Parks core, \$500,000 "E" from State Parks Resale core, \$200,000 "E" from Concession Default core, \$350,000 "E" from State Parks Grants core, and \$2,324,034 "E" from Outdoor Recreation Grants core to the Division of State Parks Core.

Note: This core budget is facing fiscal challenges.

2. CORE DESCRIPTION

The Division of State Parks manages 85 state parks and historic sites plus the Roger Pryor Pioneer Backcountry. We manage approximately 145,000 acres and an extensive recreation easement agreement on 61,000 acres with the L-A-D Foundation. The total acreage of the state parks and historic sites is less than one half of 1% of the total acres in Missouri. Each park and site contains unique and diverse natural and cultural resources, yet the public demands consistent levels of visitor services, facility maintenance, security, and resource management. The mission of the division is to preserve and interpret the state's most outstanding natural features; to preserve and interpret the state's most outstanding cultural landmarks; and to provide compatible recreational opportunities in these areas.

This core also includes funding for pass through appropriation authority of the Division of State Parks. Pass through appropriation authority includes funding for Bruce R Watkins, Payment in Lieu of Taxes, Gifts to State Parks, State Parks Resale, Concession Default, State Park Grants, and Outdoor Recreation Grants.

CORE DECISION ITEM

Budget Unit 78415C

3. PROGRAM LISTING (list programs included in this core funding)

Division of State Parks

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds) (2)	38,678,513	42,591,614	35,408,081	35,920,662 E
Less Reverted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	38,678,513	42,591,614	35,408,081	N/A
Actual Expenditures (All Funds)	33,610,182	33,860,484	28,245,434	N/A
Unexpended (All Funds)	5,068,331	8,731,130	7,162,647	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	2,823,335	3,699,017	3,167,874	N/A
Other	2,244,996	5,032,113	3,994,773	N/A
	(1 - 4)	(1 - 4)	(1 - 4)	(1 & 2)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

- (1) For comparison purposes, prior year actual and current year financial data from Division of State Parks' pass-through appropriations are included above.
- (2) Request retention of the existing estimated appropriations.
- (3) Fiscal uncertainties and hiring limitations, as well as reduced operating and delayed equipment replacement purchases, have resulted in lower expenditures.
- (4) Estimated appropriations are needed on the Outdoor Recreation grants to allow encumbrances for projects which pay out over multiple fiscal years. The encumbrances roll over into the next fiscal year's core appropriation causing large lapses.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

1. What does this program do?

State Parks Operations: The mission of the Division of State Parks (DSP) is to preserve and interpret the state's most outstanding natural features; to preserve and interpret the state's most outstanding cultural landmarks; and to provide compatible recreational opportunities in these areas. The division manages 85 state parks and historic sites plus the Roger Pryor Pioneer Backcountry. These state parks and historic sites are scattered throughout the state, each containing unique and diverse natural and cultural resources. The park system also includes five district offices and five support programs. Standardization of public services; efficient management of fiscal, personnel and equipment resources; property management of State Park lands and structures; providing information services, publicizing special events and managing a souvenir sales program; and consistent care for natural and cultural resources and recreation facilities require closely coordinated supervision and administration. In addition, the division provides law enforcement services and protection to park visitors, their property and the cultural and natural resources of the division.

Bruce R Watkins: allows the department, through a contractual agreement, to assist the Kansas City Board of Parks and Recreation Commissioners with the operation of the Bruce R. Watkins Cultural Heritage Center, which stands in tribute to the legacy of Kansas City's early African American pioneers and embodies the artistic, cultural and social history of the African American experience. Payment in Lieu of Taxes: In November 1994, Missouri voters adopted an amendment to the Constitution which allows the department to use Parks Sales Tax funds to make payments to counties in lieu of property taxes on lands acquired by the department after July 1, 1985. This item allows the department to meet the intent of the State Constitution by making payment in lieu of 2010 and prior years' taxes to counties in a timely manner. Gifts to State Parks: DSP receives funds from donors, insurance settlements, court awards, and other sources that are usually directed toward the accomplishment of a specific purpose. State Parks Resale: The Division of State Parks purchases items for resale to the public and to stock a central warehouse for sale to the individual parks and sites. Resale items include souvenirs and publications such as books, pamphlets, posters, postcards and photographs and also includes visitor convenience and safety items sold at small park stores. The division continually strives to enhance and upgrade the state parks' souvenir sales. Concession Default: Should a state park concessionaire be unable to complete the period of their contract or if other emergency situations arise, such as not being able to award a contract or not having bidders for a contract, the division must operate and manage concession operations. Such operations include lodging, park stores, boat rentals, and other visitor services usually provided by contracted concessionaires until a new concessionaire contract can be awarded or the division obtains additional appropriation authority to operate the concession on a permanent basis so that customer service is uninterrupted. State Park Grants: The division identifies and pursues grants that are consistent with strategic priorities such as conservation assessment program grants, battlefield protection programs for historic sites, and Recreational Trails Program grants for state parks. By receiving federal grant awards, the department is able to use alternate funding sources to meet operational and resource needs of the state park system. Recreation Assistance Grants: provides federal matching grants through Land and Water Conservation funds and Recreational Trails Program funds to develop parks and trails. The Land and Water Conservation Program offers funding for the acquisition and development of public outdoor recreation areas and facilities. The Recreational Trails Program provides funding to develop and maintain recreational trails and trail-related facilities for both non-motorized and motorized recreational trail uses. The department uses this appropriation to distribute these federal funds to communities and local governments.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

1. What does this program do (continued)?

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapter 253

State Parks and Historic Preservation

Missouri Constitution, Article IV, Sections 47(a)(b)©

Natural Resources - Parks and Soil and Water Sales and Use Tax

RSMo Chapter 258

Outdoor Recreation

3. Are there federal matching requirements? If yes, please explain.

Land and Water Conservation Fund Grant

50% Local

Recreational Trails Program

20% State/Local

The division applies for various small grants throughout the fiscal year (matching requirements vary by grant). Current grants are as follows:

Water and Sewer Infrastructure Projects

45% State

National Parks Service/Exhibits at Van Meter State Park

50% State

Dept of Conservation/Public Land Wildlife Resource at Roaring River

50% State

State Park

U.S. Department of Homeland Security/2008 Flood Recovery

25% State

Dept of Conservation/Wet Prairie Restoration on Confluence State Park

50% State

Museums for America Award

53% State

National Parks Service/Native American Graves Protection and

28% State

Repatriation Grant

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

4. Is this a federally mandated program? If yes, please explain.

The Department administers the Land and Water Conservation Fund (LWCF) on behalf of the National Parks Service and the Recreational Trails Program (RTP) on behalf of the Federal Highway Administration.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. For comparison purposes, prior year actual and current year financial data from Division of State Parks' pass-through appropriations are included above. FY 2011 Planned is shown at full appropriation.

6. What are the sources of the "Other" funds?

State Park Earnings Fund (0415); Cost Allocation Fund (0500); Parks Sales Tax Fund (0613); Meramec-Onondaga State Parks Fund (0698); and Babler State Park Fund (0911).

7a. Provide an effectiveness measure.

Note: Data collected by calendar year, therefore 2010 data will not be available until February 2011.

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

7a. Provide an effectiveness measure (continued).

Note: The FY 2010 Actual for RTP and LWCF is not yet available; grants will be awarded in October of 2010.

7b. Provide an efficiency measure.

Notes: Data source is the National Association of State Park Directors Annual Information Exchange. FY 2010 actual data will be available in April, 2011. National and regional figures do not necessarily include historic sites.

PROGRAM DESCRIPTION

Program is found in the following core budget(s): Division of State Parks

7c. Provide the number of clients/individuals served, if applicable (continued).

Map of Missouri State Parks and Historic Sites

PROGRAM DESCRIPTION

Department of Natural Resources

Division of State Parks

Program is found in the following core budget(s): Division of State Parks

7d. Provide a customer satisfaction measure, if available.

The Division of State Parks has adopted a 20/20 vision for the year 2020 to ensure the continued success of Missouri's system of state parks and historic sites as important reservoirs of our cultural and natural heritage for current and future generations to enjoy. The Parks 20/20 vision has three primary objectives: (1) to increase the visitation among all Missourians, especially the young; (2) to increase revenue to sustain operations, allow for growth and improve existing facilities; and (3) to develop a clear vision to ensure the relevance of state parks and historic sites in the future.

Voting Citizens Parks and Soil and Water Tax Renewal Approval Rate

Note: The Parks and Soil and Water Sales Tax Amendment 1 was voted on in August 2006 and passed with 70.8% approval. The Parks and Soil and Water Sales Tax will be resubmitted to the voters in 2016.

--------------------	---	---	---	---

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Core Reallocation: The department is reallocating the Bruce R. Watkins Cultural Heritage Center Core budget unit (78422C) to the Division of State Parks budget unit (78415C).

2. CORE DESCRIPTION

This core decision item allows the department, through a contractual agreement, to assist the Kansas City Board of Parks and Recreation Commissioners with the operation of the Bruce R. Watkins Cultural Heritage Center, which stands in tribute to the legacy of Kansas City's early African American pioneers and embodies the artistic, cultural and social history of the African American experience. The state assists in providing high-quality cultural activities to residents of the Kansas City Metropolitan area.

3. PROGRAM LISTING (list programs included in this core funding)

Not applicable - this funding has been reallocated to the Division of State Park budget.

CORE DECISION ITEM

Department of Natural Resources

Core Reallocation: The department is reallocating the Payment in Lieu of Taxes Core budget unit (78423C) to the Division of State Parks budget unit (78415C).									
2. CORE DESCRIPTION									
In November 1994, Missouri voters adopted an amendment to the Constitution which allows the department to use Parks Sales Tax funds to make payments to counties in lieu of property taxes on lands acquired by the department after July 1, 1985. This item allows the department to meet the intent of the State Constitution by making payment in lieu of 2010 and prior years' taxes to counties in a timely manner.									
3. PROGRAM LISTING (list programs included in this core funding)									
Not applicable - this funding has been reallocated to the Division of State Park budget.

Core Reallocation: The department is reallocating the Gifts to Parks Core budget unit (78425C) to the Division of State Parks budget unit (78415C).									
2. CORE DESCRIPTION									
The Division of State Parks receives funds from donors, insurance settlements, court awards, and other sources that are usually directed toward the accomplishment of a specific purpose. Section 253.040 RSMo authorizes the department "to accept gifts, bequests or contributions of money or other real or personal property to be expended for any of the purposes of Sections 253.010 to 253.100 RSMo.; except that any contribution of money to the Department of Natural Resources shall be deposited with the State Treasurer to the credit of the State Park Earnings Fund and expended upon authorization...". This request seeks that authorization from the General Assembly.									
3. PROGRAM LISTING (list programs included in this core funding)

Core Reallocation: The department is reallocating the Park Resale Core budget unit (78470C) to the Division of State Parks budget unit (78415C).									
2. CORE DESCRIPTION									
The Division of State Parks purchases items for resale to the public and to stock a central warehouse for sale to the individual parks and sites. Resale items include souvenirs and publications such as books, pamphlets, posters, postcards and photographs and also includes visitor convenience and safety items sold at small park stores. The division continually strives to enhance and upgrade the state parks' souvenir sales.									
3. PROGRAM LISTING (list programs included in this core funding)

-------------	---	---	---	---

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Core Reallocation: The department is reallocating the Concession Default Core budget unit (78480C) to the Division of State Parks budget unit (78415C).

2. CORE DESCRIPTION

Should a state park concessionaire be unable to complete the period of their contract or if other emergency situations arise, such as not being able to award a contract or not having bidders for a contract, the division must operate and manage concession operations. Such operations include lodging, park stores, boat rentals, and other visitor services usually provided by contracted concessionaires until a new concessionaire contract can be awarded or the division obtains additional appropriation authority to operate the concession on a permanent basis so that customer service is uninterrupted.

3. PROGRAM LISTING (list programs included in this core funding)

Not applicable - this funding has been reallocated to the Division of State Park budget.

Core Reallocation: The department is reallocating the Grants to State Parks Core budget unit (78492C) to the Division of State Parks budget unit (78415C).									
2. CORE DESCRIPTION									
The Division of State Parks applies for federal funds to further enhance state parks and historic sites. The division identifies and pursues grants that are consistent with strategic priorities such as conservation assessment program grants, battlefield protection programs for historic sites, and Recreational Trails Program grants for state parks. By receiving federal grant awards, the department is able to use alternate funding sources to meet operational and resource needs of the state park system.									
3. PROGRAM LISTING (list programs included in this core funding)									
Not applicable - this funding has been reallocated to the Division of State Park budget.

--------------------	---	---	---	---

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Core Reallocation: The department is reallocating the Recreation Assistance Grants Core budget unit (78495C) to the Division of State Parks budget unit (78415C).

2. CORE DESCRIPTION

This decision item provides federal matching grants through Land and Water Conservation Funds and Recreational Trails Program funds to develop parks and trails. The Land and Water Conservation Program offers funding for the acquisition and development of public outdoor recreation areas and facilities. The Recreational Trails Program provides funding to develop and maintain recreational trails and trail-related facilities for both non-motorized and motorized recreational trail uses. The department uses this core appropriation to distribute these federal funds to communities and local governments.

3. PROGRAM LISTING (list programs included in this core funding)

Not applicable - this funding has been reallocated to the Division of State Park budget.

State Historic Preservation Core	
2. CORE DESCRIPTION (continued)	
<p>Historic Preservation Grants provides authority to pass federal funds through for historic preservation grants and contracts. These grants are part of the department's grant from the federal Historic Preservation Fund and are used to support preservation activities in the State of Missouri. This appropriation also provides authority to pass Historic Preservation Revolving funds through for financial assistance to aid in the preservation of historically-significant publicly owned properties, such as county courthouses, city halls, educational facilities, etc. through the Missouri Heritage Properties Program. Civil War Commemoration Activities allows for cultural resource education and communication through the development of interpretive programs and exhibits. This appropriation will be used if federal funds become available for Civil War commemoration activities.</p>

PROGRAM DESCRIPTION

Department of Natural Resources

DSP - State Historic Preservation

Program is found in the following core budget(s): State Historic Preservation

1. What does this program do?

State Historic Preservation Office Operations: The State Historic Preservation Office (SHPO), in partnership with the U.S. Department of the Interior's National Park Service and local governments, is carrying out the mandates of the National Historic Preservation Act of 1966 (NHPA) in Missouri. The SHPO works with citizens and groups throughout the state to identify, evaluate and protect Missouri's diverse range of historic, architectural and archaeological resources. The SHPO funds and coordinates surveys to identify historic, architectural and archaeological resources throughout the state. The most significant properties identified in the surveys are nominated to the National Register of Historic Places, the federal list of properties deemed worthy of recognition and protection. This office is responsible for Section 106 reviews of federally funded or assisted projects to ensure compliance with federal preservation legislation. The office works with property owners, architects and developers to ensure that rehabilitation projects qualify for rehabilitation tax credits. Currently, both state and federal income tax credits are available for the qualified rehabilitation of certain historic properties. SHPO staff are responsible for responding to cases involving the discovery of unmarked human burials and providing educational services to the public to promote awareness and understanding of historic preservation.

Historic Preservation Grants: The State Historic Preservation Program is responsible for encouraging and supporting statewide activities leading to the identification, evaluation, and protection of Missouri's prehistoric, historic, and cultural resources. The NHPA, as amended, established a partnership between the federal government, state and local governments, and Certified Local Governments to help identify and protect historic resources. The federal program requires that states "pass-through" 10% of their federal allocation to help participating local governments carry out preservation activities in their communities. Pass through grants to local governments can be used for historic resource identification and survey activities, National Register nomination, planning activities, and educational activities. The Historic Preservation Revolving Fund provides financial assistance to aid in the preservation of historically-significant publicly owned properties, such as county courthouses, city halls, educational facilities, etc through the Missouri Heritage Properties Program. These National Register-listed or eligible historic resources typically cannot benefit from other funding tools such as the preservation tax credits. This Historic Preservation Revolving Fund appropriation will be used to pay existing obligations; new grants will be awarded when funding becomes available.

Civil War Commemoration Activities: The Division of State Parks is a comprehensive and diverse organization that administers the state parks and historic sites system and coordinates important statewide programs in the areas of outdoor recreation. One area of emphasis is to provide cultural resource education and communication through the development of interpretive programs and exhibits. This appropriation will be used if federal funds become available for Civil War commemoration activities.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP - State Historic Preservation

Program is found in the following core budget(s): State Historic Preservation

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

16 USC 470f - Section 106	National Historic Preservation Act
RSMo 194.400-194.410	Unmarked Human Burial Sites
RSMo Chapter 253	State Parks and Historic Preservation
RSMo 253.022	Department to administer the National Historic Preservation Act
RSMo 253.408-253.412	State Historic Preservation Act
RSMo 253.400-253.407	Historic Preservation Revolving Fund Act
RSMo 253.415	Local Historic Preservation Act
RSMo 253.420	Historic Shipwrecks, Salvage or Excavation Regulations
RSMo 253.545-253.561	Historic Structures Rehabilitation Tax Credit

3. Are there federal matching requirements? If yes, please explain.

Historic Preservation Fund Grant	40% State/Local
SHPO - NAGPRA Grant	28% State

4. Is this a federally mandated program? If yes, please explain.

SHPO administers the National Historic Preservation Act of 1966, which specifies requirements for state historic preservation offices.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. For comparison purposes, prior year actual and current year financial data from Historic Preservation's pass-through appropriations are included above. FY 2011 Planned is shown at full appropriation.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP - State Historic Preservation

Program is found in the following core budget(s): State Historic Preservation

6. What are the sources of the "Other" funds?

Historic Preservation Revolving Fund (0430); Economic Development Advancement Fund (0783)

7a. Provide an effectiveness measure.

Individual resources include the all historic properties identified in listings and placed on the Register such as buildings, sites, structures and objects identified in individual, group and district nominations. The increase in 2010 was due to the listing of several large district nominations which included a substantial number of individual resources. Since many nominations are driven by owners seeking listing so they may apply for historic tax credits, the department anticipates a decline in the number of new listings when compared to prior year actual as tax credit activity slows due to the economic downturn.

Under Section 106 of the National Historic Preservation Act, any expenditure of federal funds or issuance of a federal license requires the recipient of such funds or license to initiate a Section 106 review by SHPO staff to assess the impact the undertaking will have on historic resources listed or eligible for listing in the National Register. The increase in federal funding brought about by the American Recovery and Reinvestment Act (ARRA) has significantly increased 106 Review workload resulting in a higher number in FY 2010.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP - State Historic Preservation

Program is found in the following core budget(s): State Historic Preservation

7a. Provide an effectiveness measure (continued).

In FY 2010 there was an increase in the number of projects and amount awarded as a result of a second round of grants.

7b. Provide an efficiency measure.

Note: The processed federal tax projects are based on the federal fiscal year that runs October 1st through September 30th; therefore FY 2010 information has not been released.

PROGRAM DESCRIPTION

Department of Natural Resources

DSP - State Historic Preservation

Program is found in the following core budget(s): State Historic Preservation

7c. Provide the number of clients/individuals served, if applicable.

	FY 2008		FY 2009		FY 2010		FY 2011	FY 2012	FY 2013
	Projected	Actual	Projected	Actual	Projected	Actual	Projected	Projected	Projected
Number of Projects Reviewed	2,400	2,810	2,400	2,978	2,800	5,922	3,000	3,200	3,400

Under Section 106 of the National Historic Preservation Act, any expenditure of federal funds or issuance of a federal license requires the recipient of such funds or license to initiate a Section 106 review by SHPO staff to assess the impact the undertaking will have on historic resources listed or eligible for listing in the National Register. The increase in federal funding brought about by the American Recovery and Reinvestment Act (ARRA) has significantly increased 106 Review workload resulting in higher number in FY 2010.

Historic Preservation Tax credits used statewide.

This map depicts historic preservation tax credits used statewide. The Department assists in the administration of the 20% federal rehabilitation tax credits and the 25% Missouri rehabilitation tax credit. The Federal credit is administered by the National Park Service while the state credit is administered by the Department of Economic Development. The role played by the Department of Natural Resources is two-fold: 1) to verify the historic status of the property for which the credits are sought, and 2) to ensure that rehabilitation work is done in accordance with the secretary of the Interior's Standards for Rehabilitation.

Source: MO Department of Natural Resources, GIS, (2009)

7d. Provide a customer satisfaction measure, if available.

Not available

Core Reallocation: The department is reallocating the Historic Preservation Grants Core budget unit (78490C) to the State Historic Preservation budget unit (78420C).

2. CORE DESCRIPTION

This appropriation provides authority to pass federal funds through for historic preservation grants and contracts. These grants are part of the department's grant from the federal Historic Preservation Fund and are used to support preservation activities in the State of Missouri. Occasionally federal funds are available for other projects.

This appropriation also provides authority to pass Historic Preservation Revolving funds through for financial assistance to aid in the preservation of historically-significant publicly owned properties, such as county courthouses, city halls, educational facilities, etc. through the Missouri Heritage Properties Program.

3. PROGRAM LISTING (list programs included in this core funding)

Not applicable - this funding has been reallocated to the State Historic Preservation budget.

Core Reallocation: The department is reallocating the Civil War Commemoration Activities Core budget unit (78421C) to the State Historic Preservation budget unit (78420C).

2. CORE DESCRIPTION

The Division of State Parks is a comprehensive and diverse organization that administers the state parks and historic sites system and coordinates important statewide programs in the areas of outdoor recreation. One area of emphasis is to provide cultural resource education and communication through the development of interpretive programs and exhibits. This appropriation will be used if federal funds become available for Civil War Commemoration Activities.

3. PROGRAM LISTING (list programs included in this core funding)

Not applicable - this funding has been reallocated to the State Historic Preservation budget.

CORE DECISION ITEM

Department of Natural Resources

Other Funds: Natural Resources Protection Fund - Damages Subaccount (0555); Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568)									
Note: Request retention of the estimated appropriations for Other Funds.									
2. CORE DESCRIPTION									
Environmental law violations can affect the quality of life of the citizens and have a long lasting effect on the state's natural resources. Violators who are liable must compensate the state for the injuries to the environment caused by their actions. These funds are then available for assessment, restoration or rehabilitation of injured natural resources, and monitoring in accordance with RSMO 640.235.									
DNR is focusing on our Natural Resource Injury assessment and damage calculation efforts for impacted sites across the state. This effort includes a comprehensive strategy for natural resource damage assessment and restoration which will allow us to address known sites or injuries in a more timely and complete manner. We anticipate we will be able to identify and quantify the impacts sooner allowing us to proceed to restore, replace or acquire equivalent resources sooner. Identifying and addressing negative impacts will allow us to make improvements to protecting, improving or preserving our natural resources now and into the future									
3. PROGRAM LISTING (list programs included in this core funding)									
Environmental Damages									

CORE DECISION ITEM

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Environmental Damages

Program is found in the following core budget(s): Environmental Damages

1. What does this program do?

Violations of water pollution, air pollution, hazardous waste, solid waste, and other environmental laws can affect the quality of life of the citizens and have a long lasting effect on the state's natural resources. Violators are liable and must compensate for the injuries to the environment caused by their actions. These funds are then available to help restore injured resources, provide improvements to offset the damage, or provide background data to help measure or mitigate similar future actions that may injure the environment.

Funds received as a result of natural resource damages, per statute, are deposited 10% (up to \$100,000) to the Chemical Emergency Preparedness Fund, with the remaining funds deposited to the Natural Resources Protection Fund - Damages Subaccount (0555). These funds are then available for assessment, restoration or rehabilitation of injured natural resources, and monitoring in accordance with RSMo 640.235. Court ordered settlements may also be deposited to the Natural Resources Protection Fund - Water Pollution Permit Fees Subaccount (0568).

The funds received from damages in the Natural Resource Protection Fund must be used to pay for restoration or rehabilitation of the injured or destroyed natural resources; pay for the development of or restoration of a natural resource similar to that which was damaged or destroyed; or, to provide funds for the department for reasonable costs incurred in obtaining an assessment of the injury or loss of natural resources (Section 640.235.2 RSMo).

The Hazardous Waste Program conducts natural resource damage assessments at sites with injured natural resources. The Department and federal co-trustees, have developed Natural Resource Damage Assessment and Restoration Trustee Councils to facilitate natural resource damages activities at various sites. Our representative works to obtain settlements and develop restoration plans for injured sites in Missouri, independently and in coordination with our federal co-trustees and representatives from public, private and nonprofit entities. In Southwest Missouri, the Department and U.S. Fish & Wildlife Service, are partnering with the Department of Conservation, The Nature Conservancy, Audubon Society, the Missouri Conservation Heritage Foundation and others to develop a regional restoration plan.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo Chapters 640 and 644	Missouri Clean Water Law
RSMo Chapter 640	Missouri Safe Drinking Water Law
RSMo 260.350 through 260.434	Hazardous Waste Facility Permits – Permitting, Inspection and Enforcement
RSMo 260.435 through 260.480	Abandoned or Uncontrolled Sites (Registry)
RSMo 643.010 through 643.192	Air Pollution Control
RSMo 260.200 through 260.255	Solid Waste Management
RSMo 640.235	Natural Resources Protection Fund Damages

3. Are there federal matching requirements? If yes, please explain.

No

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Environmental Damages

Program is found in the following core budget(s): Environmental Damages

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities. FY 2011 Planned is shown at full appropriation. The department is requesting retention of the "E" appropriations on the Natural Resources Protection Fund – Damages Subaccount (0555) and the Natural Resources Protection Fund - Water Pollution Permit Fee Subaccount (0568) to allow the department to expend funds received from natural resource damages in a timely and efficient manner.

6. What are the sources of the "Other " funds?

Natural Resources Protection Fund – Damages Subaccount (0555); Natural Resources Protection Fund – Water Pollution Permit Fee Subaccount (0568)

7a. Provide an effectiveness measure.

The department funds "on the ground" long-term projects related to water quality monitoring, natural resource damage assessment and restoration activities with NRD monies; examples include:

- Conducting regional dissolved oxygen studies (water quality monitoring). The data will then be used to determine whether the dissolved oxygen standard in the Water Quality Standards is appropriate as part of the department's efforts to restore and maintain the water quality of all Missouri waters. The goal is to ensure that the Water Quality Standards reflect the dissolved oxygen levels which are characteristic of those waterbodies.
- Contracting for development of a simplified groundwater assessment methodology to assist the department with using the simplified methodology at sites as well as assist in prioritizing groundwater sites. This methodology will allow the department to provide a consistent approach to assessing natural resource damages to groundwater.
- Pershing State Park vicinity survey work (restoration) for the second required component of the Higgins Ditch/Locust Creek waterway planning. Ground survey data is needed of the stream channels and riverbanks, for designing gradient control structures that will stop the diversion of Locust Creek into the local drainage ditch and away from the natural streambed. This will provide measurements on channel dimensions and gradients that will work with other data of floodplain elevations and features.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Environmental Damages

Program is found in the following core budget(s): Environmental Damages

7a. Provide an effectiveness measure (continued).

Natural Resources Damages (NRD) Site Activities Administered by the Hazardous Waste Program

	FY 2008 Actual	FY 2009 Projected	FY 2009 Actual	FY 2010 Projected	FY 2010 Actual	FY 2011 Projected	FY 2012 Projected	FY 2013 Projected
Sites Screened for NRD Action	1	1	4	1	2	3	3	1
Sites Screened Out - No Further Action	0	0	0	1	0	1	1	3
Ongoing/Pending NRD Assessments	40	41	44	44	46	48	50	48
- NRD Assessed	0	0	0	0	8	0	2	1
- NRD Settlements	1	0	0	0	2	0	0	0
- NRD Recoveries	1	0	3	0	8	0	0	0

Of the On-going/Pending NRD Assessments, a portion of the sites have been assessed, reached a settlement and/or recoveries made. The remaining sites are awaiting further action.

Annual Sample Collection for the East Fork Black River

	FY 2009 Projected	FY 2009 Actual	FY 2010 Projected	FY 2010 Actual	FY 2011 Projected	FY 2012 Projected	FY 2013 Projected
Chemical Samples (10 sites)	240	266	120	130	120	120	120
Biological Samples (8 sites)	16	16	16	16	16	16	16

As a result of the failure of the Upper Taum Sauk Reservoir, chemical sampling will continue due to concerns over sediment deposits and water quality, and biological sampling will continue to study injury and recovery of the biological community. The Environmental Services Program plans to continue sampling through FY 2013. If long term data trends show clear improvement, sampling may be suspended or conducted with reduced frequency. This was a new measure in FY 2009, therefore prior year data is not available.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Environmental Damages

Program is found in the following core budget(s): Environmental Damages

7b. Provide an efficiency measure.

Hazardous Waste Sites with Natural Resource Damage Activity per FTE

FY 2009 and 2010 actuals decreased from FY 2008 due to additional staff working on these issues, which we expect will continue.

7c. Provide the number of clients/individuals served, if applicable.

Hazardous Waste Sites with Natural Resource Damage Activity

Funds recovered as a result of Natural Resource Damage (NRD) claims and/or settlements are deposited into the Natural Resource Protection Fund Damages Subaccount (0555). These funds are used to restore, replace, rehabilitate or acquire the equivalent of the injured natural resources so that the public can use and enjoy these natural resources. The chart above represents the number of sites where the department has worked with some type of NRD activity including but not limited to assessing injuries, reviewing and commenting on documents, settlement negotiations, and liaison functions. FY 2009 actual decreased from FY 2008 due to the complexity of several sites. Although there will be increased NRD efforts in FY 2011 and FY 2012, the total number of sites with NRD activity is not projected to increase due to the complexity of the sites being addressed.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Environmental Damages

Program is found in the following core budget(s): Environmental Damages

7c. Provide the number of clients/individuals served, if applicable (continued).

Natural Resource Damages Sites Administered by Hazardous Waste Program with Ongoing/Pending Assessment Activity as of FY 2010

EXAMPLE

ASARCO Bankruptcy Joint Settlement

Natural Resources Injured

- Terrestrial habitat - heavy metal contamination of vegetation and soil
- Riparian habitat - heavy metal contamination of vegetation and soil
- Aquatic habitat - heavy metal contamination of sediment

Natural Resource Damages Jointly Recovered

- Tri-State Mining District: approximately \$20 million
- Southeast Missouri Lead Mining District: approximately \$41 million

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Jobs Now Projects

Program is found in the following core budget(s): Jobs Now Projects

1. What does this program do?

Senate Bill 1155 passed during the 92nd General Assembly. Section 100.255 (11) identifies "Jobs Now projects." The essence of jobs now projects is to award an "entity" for cost saving innovations. The primary focus of jobs now projects are: the purchase, construction, extension, and improvement of real estate, plants, buildings, structures, or facilities used primarily as infrastructure facilities or public facilities. When any entity (including DNR or a DNR employee) provides a certified design or operation plan which is demonstrably less than the usual and customary average industry determination of cost then the entity or company proving such service may receive payment in an amount equal to the usual and customary fee for such project plus additional compensation equal to two times the percentage by which the cost is less than the usual and customary average industrial determination of cost. In addition, the entity would receive compensation equal to twenty-five percent of the amount of any annual operational costs which are lower than the customary average industry determination of cost for a period of time of one-fourth the design lifetime or five years whichever is less.

Possible applications include the department's efforts in conjunction with communities or private consultants involving the design of a wastewater treatment facility. Working together with the community, the private company, or an individual, an employee who develops an innovative design that will result in savings to the community may be eligible to receive a monetary award. Individuals within the community or the private entity may also be eligible. Designing more efficient state park facilities is another example; savings recognized would benefit the entire state park system.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 100.255 Jobs Now Projects

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: Actual expenditures for all fiscal years are as of June 30 and did not include lapse period. Planned FY 2011 is shown at full appropriation.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Jobs Now Projects

Program is found in the following core budget(s): Jobs Now Projects

6. What are the sources of the "Other " funds?

Not applicable.

7a. Provide an effectiveness measure.

There is no experience or basis for determining measures of effectiveness. The department spent approximately \$83 million related to public drinking water and wastewater infrastructure activities during FY 2010. Recommendations to reduce the construction and operating cost for these communities saves them money.

7b. Provide an efficiency measure.

There is no experience or basis for determining measures of efficiency.

7c. Provide the number of clients/individuals served, if applicable.

There is no experience or basis for determining the number of clients served. In FY 2010, approximately 151 communities utilized the department's water and wastewater infrastructure loans and grants programs. In addition, the state park system includes over 85 state park and historic sites with many public buildings (cabins, showerhouses, etc).

7d. Provide a customer satisfaction measure, if available.

None available.

Department of Natural Resources

Other Funds: DNR Revolving Services Fund (0425)									
2. CORE DESCRIPTION									
The department bills the programs for internal services such as vehicle replacements, interdivisional agreements, and conferences/training. The department also bills other governmental agencies or members of the general public for external services such as publication/data sales, the Environmental Management Institute (EMI), environmental education, and environmental services. This appropriation gives the department the ability to respond to both internal and external customers. Loss of this appropriation would result in a slower, more cumbersome and therefore, more costly payment method and, in some cases, the inability to respond to increasing demands by our internal and external customers.									
3. PROGRAM LISTING (list programs included in this core funding)

General Revenue	0	0	0	N/A
Federal	0	0	0	N/A
Other	241,990	229,429	2,075,415	N/A

(1)

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.
 Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

NOTES:

(1) Lapse of \$2,075,415 in FY 2010 is primarily due to the department delaying the replacement of vehicles during FY 2010.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Natural Resources Revolving

Program is found in the following core budget(s): Natural Resources Revolving Fund

1. What does this program do?

The department bills the programs for internal services such as vehicle replacements, interdivisional agreements, and conferences/training. The department also bills other governmental agencies or members of the general public for external services such as publication/data sales, the Environmental Management Institute (EMI), environmental education, and environmental services. This appropriation gives the department the ability to respond to both internal and external customers.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 60.595 Natural Resources Revolving Services Fund

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Note: Actual expenditures for all fiscal years are as of June 30 and did not include lapse period activities. FY 2011 planned expenditures are shown as full appropriation.

6. What are the sources of the "Other " funds?

DNR Revolving Services Fund (0425)

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Natural Resources Revolving

Program is found in the following core budget(s): Natural Resources Revolving Fund

7a. Provide an effectiveness measure.

Operating Expenditures, Revolving Services Fund

Percentage of Fleet that is Alternative Fuel

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Natural Resources Revolving

Program is found in the following core budget(s): Natural Resources Revolving Fund

7a. Provide an effectiveness measure. (continued.)

A new Laboratory Information Management System came on line during FY 2010. This performance measure has been modified to track the number of parameters analyzed by the laboratory. Therefore, prior year projections are not available.

7b. Provide an efficiency measure.

The DNR Revolving Services Fund allows the department to receive monies from the delivery of services and the sale or resale of maps, publications, and documents. These funds are used to purchase goods or services, publish maps and publications, and pay for shipping charges, laboratory services, core library fees, workshops, conferences and interdivisional agreements. This appropriation gives the department the ability to respond to both internal and external customers. Not having this appropriation would result in slower, more cumbersome and therefore more costly payment method, and in some cases, the inability to respond to increasing demands by our internal and external customers.

7c. Provide the number of clients/individuals served, if applicable.

Maps (geological & surficial materials) & Publications	FY 2008		FY 2009		FY 2010		FY 2011	FY 2012	FY 2013

Note: Request retention of estimated appropriation for all funds.

2. CORE DESCRIPTION

The department deposits revenue it receives as soon as possible, as a cash management practice. Since the department has many different revenue streams, there are occasions when revenue payments received by the department need to be refunded. This appropriation provides the means to efficiently refund these revenues to the entity that made the payment without having a negative impact on the department's operating budget.

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Refund Accounts

Program is found in the following core budget(s): Refund Accounts

1. What does this program do?

The department needs appropriation authority to promptly return funding to citizens and other organizations. Since the department collects many fees, there are occasions when fees or other payments received by the department need to be refunded.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

There is no specific federal or state statutory or constitutional basis for this decision item.

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and did not include lapse period activities. Planned FY 2011 is shown as full appropriation.

6. What are the sources of the "Other" funds?

Other Funds: Missouri Air Emission Reduction Fund (0267); State Parks Earnings Fund (0415); DNR Revolving Services Fund (0425); Historic Preservation Revolving Fund (0430); Cost Allocation Fund (0500); Natural Resources Protection Fund-Water Pollution Permit Fees (0568); Solid Waste Management Fund-Scrap Tire (0569); Solid Waste Management Fund (0570); Metallic Minerals Waste Management Fund (0575); Natural Resources Protection Fund-Asbestos (0584); Underground Storage Tank Regulation Program (0586); Natural Resources Protection Fund-Air Pollution Permit (0594); Water and Wastewater Loan Revolving Fund (0602); Parks Sales Tax Fund (0613); Soil and Water Sales Tax Fund (0614); Water and Wastewater Loan Fund (0649); Groundwater Protection Fund (0660); Energy Set-Aside Program Fund (0667); State Land Survey Program Fund (0668); Hazardous Waste Fund (0676); Safe Drinking Water Fund (0679); Coal Mined Land Reclamation Fund (0684); Oil and Gas Remedial Fund (0699); Biodiesel Fuel Revolving Fund (0730); Stormwater Loan Revolving Fund (0754); Rural Water and Sewer Loan Revolving Fund (0755); Geologic Resource Fee Fund (0801); Confederate Memorial Park Fund (0812); Missouri Alternative Fuel Vehicle Loan Fund (0886); Drycleaner Environmental Response Trust Fund (0898); Mined Land Reclamation Fund (0906); Babler State Park Fund (0911)

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Refund Accounts

Program is found in the following core budget(s): Refund Accounts

7a. Provide an effectiveness measure.

7b. Provide an efficiency measure.

The department achieves efficiency through the use of estimated appropriations to promptly process refunds to citizens and other organizations.

7c. Provide the number of clients/individuals served, if applicable.

Not available

7d. Provide a customer satisfaction measure, if available.

Not available

PROGRAM DESCRIPTION

Department of Natural Resources

AWO - Sales Tax Reimbursement to GR

Program is found in the following core budget(s): Sales Tax Reimbursement to GR

1. What does this program do?

The department collects sales tax on various items. In the Division of State Parks, sales tax is collected on souvenirs, camping fees, wood sales, gift shop sales, cave tours, historic site tours, ATV usage permits, ATV accessories, vending machine sales, swimming pool fees, pay phone receipts (if the department owns or rents the pay phone from the phone company), rentals of shelter houses, and rentals of cabins and other guest quarters, etc. In addition, the Division of Geology and Land Survey collects sales tax on maps and publications sold to the general public. By having this appropriation, the department is able to promptly and efficiently transfer state tax revenue to the General Revenue Fund.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 144.020.1 Tax imposed upon all sellers
 RSMo 144.010.1(11) Defines seller as a person
 RSMo 144.010.1(6) Defines person

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

Notes: Actual expenditures for all fiscal years are as of June 30 and did not include lapse period activities. FY 2011 planned expenditures are shown at full appropriation.

PROGRAM DESCRIPTION

2. THIS REQUEST CAN BE CATEGORIZED AS:

<input type="checkbox"/> New Legislation	<input type="checkbox"/> New Program	<input type="checkbox"/> Supplemental
<input type="checkbox"/> Federal Mandate	<input type="checkbox"/> Program Expansion	<input type="checkbox"/> Cost to Continue
<input type="checkbox"/> GR Pick-Up	<input type="checkbox"/> Space Request	<input type="checkbox"/> Equipment Replacement
<input type="checkbox"/> Pay Plan	<input checked="" type="checkbox"/> Other: <u>Federal funding authority</u>	

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

This appropriation authority will allow the department to pursue and implement new federal grant programs as soon as the grant is awarded. This authority will allow the department the flexibility to operate more effectively and efficiently as new federal funding opportunities are available.

NEW DECISION ITEM
RANK: 006 OF 008

Department of Natural Resources			Budget Unit <u>79645C</u>						
Agency Wide Operations									
DI Name: Federal Funding Opportunities			DI# 17800002						
<p>4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)</p> <p>The department is requesting an estimated appropriation as the amount needed will depend on federal grants awarded. The current request of \$113,531 represents a recent grant application for the department's Division of Geology and Land Survey (DGLS). The opportunity arose for a grant "Development of Innovative and Advanced Technologies for Geologic Sequestration". Due to the highly competitive nature of this grant, the department did not receive these funds.</p>									
5. BREAK DOWN THE REQUEST BY BUDGET OBJECT CLASS, JOB CLASS, AND FUND SOURCE. IDENTIFY ONE-TIME COSTS.

Core Reduction: The FY 2012 budget request includes a core reduction of \$91,791 from budget unit 79686C.									

CORE DECISION ITEM

Department of Natural Resources
Agency Wide Operations
Cost Allocation Fund Transfer Core

Budget Unit 79685C & 79686C & 79687C

2. CORE DESCRIPTION

Cost Allocation Fund Transfer: Dedicated funds within the department share in the cost of administering the programs in the department. This cost share proposal uses the department's federal indirect cost rate as a method of allocating administrative costs to dedicated funding sources within the Department of Natural Resources. The indirect cost rate used is an established rate approved by our federal cognizant agency, the Department of Interior, and provides a standard methodology that can be used consistently throughout the department. Each dedicated fund's share is computed based upon its proportionate percentage of personal services, fringe and expense and equipment appropriations.

Cost Allocation Fund Transfer- OA ITSD - DNR: Dedicated funds within the department share in the cost of administering the Office of Administration Information Technology Services Division - DNR (OA ITSD - DNR) costs.

Cost Allocation Fund Transfer- Leasing: Dedicated funds within the department share in the cost of administering the department's leasing (leased and state-owned facilities) costs.

3. PROGRAM LISTING (list programs included in this core funding)

Not applicable - This core decision item represents appropriated transfers from the department's dedicated funds to the DNR Cost Allocation Fund. These transfers provide the funding for the department's appropriations from DNR Cost Allocation Fund. The specific DNR Cost Allocation Fund appropriations/activities are included in other core budget decision items, HB13 budget decision items and OA ITSD - DNR (HB5) budget decision items.

CORE DECISION ITEM

Department of Natural Resources
 Agency Wide Operations
 Cost Allocation Fund Transfer Core

Budget Unit 79685C & 79686C & 79687C

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds) (1)	12,679,875	18,597,394	18,487,394	17,543,795
Less Reverted (All Funds)	0	0	0	N/A
Budget Authority (All Funds)	12,679,875	18,597,394	18,487,394	N/A
Actual Expenditures (All Funds)	11,601,254	16,879,666	15,053,433	N/A
Unexpended (All Funds)	1,078,621	1,717,728	3,433,961	N/A
Unexpended, by Fund:				
General Revenue	0	0	0	N/A
Federal	0	0	0	N/A
Other	1,078,621	1,717,728	3,433,961	N/A

(2)

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

NOTES:

(1) Financial data includes operating and pass-through appropriations.

(2) The OA ITSD - DNR and Leasing transfers were a new decision item in FY 2009; thus the increase in appropriation and expenditures in FY 2009.

Cost Allocation Fund Transfer - Reconciliation

NEW DECISION ITEM
RANK: 007 & 008 OF 008

Department of Natural Resources	Budget Unit <u>79685C & 79687C</u>										
Agency Wide Operations											
Cost Allocation Fund Transfers	DI# <u>17800003 & 17800004</u>										
3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.											
Dedicated funds within the department share in the cost of administering the programs within the department. Those dedicated funds' share is computed based upon its proportionate percentage of personal services, fringe and expense and equipment appropriations. This new decision item request provides funding for planned expenditures including an increase in fringe benefit costs.											
4. DESCRIBE THE DETAILED ASSUMPTIONS USED TO DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source or standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)											
<table><thead><tr><th></th><th><u>Request</u></th></tr></thead><tbody><tr><td colspan="2">Appropriated Transfer increase related to existing activities:</td></tr><tr><td>DNR - to fund core reallocations and increased fringe benefits (budgeting unit 79685C - DI# 17800003)</td><td>\$ 1,636,256</td></tr><tr><td>OA ITSD - DNR to fund crease fringe benefits costs (budgeting unit 79687C - DI# 17800004)</td><td>\$ <u>199,597</u></td></tr><tr><td colspan="2">Total Increase-CAF Appropriated Transfers \$ 1,835,853</td></tr></tbody></table>			<u>Request</u>	Appropriated Transfer increase related to existing activities:		DNR - to fund core reallocations and increased fringe benefits (budgeting unit 79685C - DI# 17800003)	\$ 1,636,256	OA ITSD - DNR to fund crease fringe benefits costs (budgeting unit 79687C - DI# 17800004)	\$ <u>199,597</u>	Total Increase-CAF Appropriated Transfers \$ 1,835,853

Other Funds: Not applicable.									
2. CORE DESCRIPTION									
This core provides the department the mechanism to transfer cash from the department's Federal Fund to the Office of Administration, Information Technology Services Division Federal Fund. This provides funding for the OA ITSD-DNR's federal appropriations.									

CORE DECISION ITEM

Department of Natural Resources

Budget Unit 79688C

Agency Wide Operations

OA ITSD Federal Fund Transfer

3. PROGRAM LISTING (list programs included in this core funding)

Not applicable - This core decision item represents appropriated transfers from the department's federal fund to the OA ITSD's Federal Fund.

4. FINANCIAL HISTORY

	FY 2008 Actual	FY 2009 Actual	FY 2010 Actual	FY 2011 Current Yr.
Appropriation (All Funds)	N/A	2,788,018	2,788,018	2,788,018
Less Reverted (All Funds)	N/A	0	0	N/A
Budget Authority (All Funds)	N/A	2,788,018	2,788,018	N/A
Actual Expenditures (All Funds)	N/A	2,653,020	2,225,000	N/A
Unexpended (All Funds)	N/A	134,998	563,018	N/A
Unexpended, by Fund:				
General Revenue	N/A	0	0	N/A
Federal	N/A	134,998	563,018	N/A
Other	N/A	0	0	N/A

(1)

Actual expenditures for all fiscal years are as of June 30 and do not include lapse period activities.

Reverted includes Governor's standard 3 percent reserve (when applicable) and any extraordinary withholdings.

NOTES:

(1) This was a new decision item in the FY 2009 budget, therefore FY 2008 data is not applicable.

Note: Fringes budgeted in House Bill 5 except for certain fringes budgeted directly to MoDOT, Highway Patrol, and Conservation.

Other Funds: State Environmental Improvement Authority Fund (0654)

Note: Request retention of estimated appropriation for the State Environmental Improvement Authority Fund.

2. CORE DESCRIPTION

This appropriation allows the EIARA to participate in the State Retirement System and provide this benefit to its employees. Providing these benefits enhances the EIARA's ability to recruit and retain high quality employees.

3. PROGRAM LISTING (list programs included in this core funding)

Environmental Improvement and Energy Resources Authority

PROGRAM DESCRIPTION

Department Natural Resources

Environmental Improvement and Energy Resources Authority

Program is found in the following core budget(s): Environmental Improvement and Energy Resources Authority

1. What does this program do?

The Environmental Improvement and Energy Resources Authority (EI ERA) is a quasi-governmental agency that serves as the financing arm for the department. EI ERA's primary mandate is to provide financial assistance for energy and environmental projects and to protect the environment. EI ERA also conducts research, supports energy efficiency and energy alternatives and promotes economic development. The five primary initiatives of the EI ERA are:

1. In cooperation with the Missouri Clean Water Commission and the U.S. Environmental Protection Agency (EPA) and other state agencies, EI ERA helped establish the Missouri State Revolving Fund (SRF). The SRF provides loan monies to communities and districts for construction of wastewater and drinking water projects or secures these loans to reimburse DNR for direct loan expenditures and leverages those loans to provide additional loan funds.
2. In cooperation with the department's Division of Energy, the Missouri Energy Efficiency Leveraged Loan Program was developed to provide funds to city and county governments and public school districts for energy efficiency improvements in facilities or buildings.
3. EI ERA also coordinates recycling market development to expand and support recycling and waste recovery through the Missouri Market Development Program.
4. EI ERA issues Private Activity Bonds for pollution prevention projects that qualify under the US Tax Code.
5. In FY 2006 EI ERA was awarded a grant from the EPA to establish and manage a revolving loan and subgrant fund to clean up contaminated properties known as Brownfields. The management and financial aspects of the MO Brownfields Revolving Loan Fund Program is managed by the EI ERA with oversight of the cleanup provided by DNR's Voluntary Cleanup Program.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Safe Drinking Water Act (1996)

US Tax Code

42 USC 9601

RSMo 260.005-260.125

RSMo 640.100-640.140

RSMo 640.651-640.686

RSMo 644

RSMo 260.335

Comprehensive Environmental Response, Compensation & Liability Act, as amended

EI ERA authorizing statutes

Missouri Drinking Water Act

Energy Loan Program

Missouri Clean Water Law

Solid Waste Management/Market Development

3. Are there federal matching requirements? If yes, please explain.

Both the federal Clean Water and Drinking Water State Revolving Fund Capitalization grants require a 20% state match. Traditionally match was funded through the sale of State Water Pollution Bonds or State General Revenue. During FY 2004, EI ERA began providing the match through the sale of its bonds for the Drinking Water Program. The funding mechanism was duplicated for the Clean Water SRF Program; the first clean water SRF bond issue of FY 2005 included state match. This relieves the state of the need to use state funds to pay debt service on state match bonds.

4. Is this a federally mandated program? If yes, please explain.

No

PROGRAM DESCRIPTION

Department Natural Resources

Environmental Improvement and Energy Resources Authority

Program is found in the following core budget(s): Environmental Improvement and Energy Resources Authority

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

6. What are the sources of the "Other" funds?

State Environmental Improvement Authority Fund (0654)

7a. Provide an effectiveness measure.

Note: Projections are very difficult to make as bond financing occurs as projects are ready to proceed. Many variables, such as business climate and interest rates can impact when a company or community will apply to the authority for financing. There were no bonds issued in FY 2010 due to financial market conditions.

PROGRAM DESCRIPTION

Department Natural Resources

Environmental Improvement and Energy Resources Authority

Program is found in the following core budget(s): Environmental Improvement and Energy Resources Authority

7b. Provide an efficiency measure.

Interest savings to communities through SRF water and wastewater program

Note: Interest savings reflect only the interest rate subsidy realized through our reserve fund model of financing. Another savings which is not easily quantified is the reduced interest rate achieved as a result of EIERA's AAA bond rating. This rating, which is higher than the vast majority of Missouri communities, allows EIERA bonds to be purchased at a lower interest rate than the communities could achieve by issuing their own bonds. Projections are very difficult to make as bond financing occurs as projects are ready to proceed. Many variables, such as business climate and interest rates can impact when a company or community apply to the authority for financing.

7c. Provide the number of clients/individuals served, if applicable.

7d. Provide a customer satisfaction measure, if available.

Not available.
